IN THE PUBLIC EYE

President Andrews of Brown university served in the civil war as a private, and lost an eye, besides being otherwise injured.
Lord Mayor Davies of London has an unusual faculty for collecting valuable specimens of silverware and has some fine examples of the silversmith's art.
King Oscar of Sweden resembles Mr. Gladstone in his ability as a tree chopper. Sweden is distinguished for its splendid pine trees, and nothing delights its ruler more than to go into the forests, axe in hand, and spend the whole day leveling some giant that would be arranged by its admiring admirers.
In 1833 the admirers of the great Spanish poet, Jose Zorrilla y Moral, placed upon his head a crown of solid gold. The poet was forced by lack of money to pawn this crown, and as the gold was not of the purest, the crown has since been melted, and the gold has been used for other purposes.

BUSINESS PROPERTY

FOR SALE—CHOICE BUSINESS PROPERTY ON BROADWAY—Broadway property, centrally located, is the surest thing in Los Angeles. It advances steadily in value, and is free from all uncertainty, and must in the nature of things continue to advance. It cannot do otherwise. It is settled now beyond any possibility of doubt that Broadway is the place in the lead as the main business thoroughfare of the city. The finest buildings are going up on it, and the best stores are occupying them as fast as they can be completed. Owners of vacant property are besieged by merchants to build for them, or to grant them ground leases, that they may build themselves, and the prices offered are almost beyond belief. Anything offered for sale is snapped up immediately, and always at an advance over what was paid for it before. And the fun in this respect has but lately commenced. Comparatively few people have yet begun to realize what it all means—what is ahead of them. From this on values will advance very much more rapidly than heretofore. Within the next two years there will be more money made by the rise in Broadway realty than by all other business in the town. There is still one piece of property, of the choicest kind, that can be bought at a bargain. This is the First M. E. church property, on the west side of the street, midway between Third and Fourth. It is in the very center of everything, and surrounded by the very finest of the new buildings. On one side is the elegant Grant building, on the other the magnificent Laughlin, soon to be occupied by the Coulter Dry Goods company, while near it are the Boston store, the Los Angeles Furniture company, the Vile de Paris, the Bradbury block, and many other structures and firms famous all over the coast.

BUSINESS PROPERTY

FOR SALE—SNAPS—OWNER GOING TO KLONDIKE; 2 lots on Central ave., near Fifth, with all street work paid; owner leaving for Klondike, and will sell the property at a bargain. Also 3 lots at the corner of San Pedro and Twenty-fifth at even greater sacrifice.
G. C. EDWARDS, 230 W. First.

FOR SALE—SEWING MACHINES

FIVE CENTS A LINE
THE "SUPER" SEWING MACHINE at \$25.00; (no agents' commissions), is the latest production and fully guaranteed by one of the oldest, largest and most respected factories on earth, the Davis company.
The mechanical construction of the "Super" is on such perfect lines that durability, ease of running and quiet are its dominating features.
The sewing qualities of the "Super" at \$25.00 are perfect. It will sew from one thickness of material to six thicknesses of material, full cloth, without breaking the thread. The thread cannot be broken, even though the machine be turned in the wrong direction. This is an entirely new feature in shuttle sewing machines, and adds much to the comfort and pleasure of sewing.
The upper tension works automatically and never fails to give a uniform tension on all kinds of thread, cotton, silk or linen, producing a smooth, even seam, and is provided with the only practical thread release.
The feed is positive in its movements; the stitch can be made long or short without affecting the tension.
The shuttle is cylindrical, is absolutely self-threading, is light and ground; has a perfect tension, and carries a large amount of thread.
The needle is self-setting. The "Super" is self-cleaning, and every point except the eye of the needle.
The take-up is driven by a rotary cam, is positive in its action, and has no springs to get out of order.
The presser lifter has a high and a low lift. The construction permits removal of the face plate for cleaning the mechanism without disturbing any of the working parts in the machine.
All wearing points of the "Super" at \$25.00 are of the best steel, hardened and ground to order, and are of uniform size.
For winding bobbins automatically the "Super" is fitted with no pins, held by friction clutch, with no noise, rattle or break.
The head plate is flush with top of table; the head is attached to the table by nickel-plated hinges, and held in front by a spring lock something entirely new.
The nickel plated bright parts are of the finest quality, and the janneting of head and arm is superb, being hand polished after varnishing.
The attaching device is easily applied and is silver finished steel, handily arranged in strong metal case.
The cabinet work of the "Super" at \$25.00 is quartered oak, and is finished. The cover is of bent wood, light and ornamental, and the skeleton drawer cases are of neat design.
Go direct to the makers and put the agents' profits in your own pocket by buying from the manufacturer.
DAVIS AND ADVANCE OFFICE, 427 S. Broadway, between Fourth and Fifth sts.

FOR SALE—SEWING MACHINES

FIVE CENTS A LINE
THE "SUPER" SEWING MACHINE at \$25.00; (no agents' commissions), is the latest production and fully guaranteed by one of the oldest, largest and most respected factories on earth, the Davis company.
The mechanical construction of the "Super" is on such perfect lines that durability, ease of running and quiet are its dominating features.
The sewing qualities of the "Super" at \$25.00 are perfect. It will sew from one thickness of material to six thicknesses of material, full cloth, without breaking the thread. The thread cannot be broken, even though the machine be turned in the wrong direction. This is an entirely new feature in shuttle sewing machines, and adds much to the comfort and pleasure of sewing.
The upper tension works automatically and never fails to give a uniform tension on all kinds of thread, cotton, silk or linen, producing a smooth, even seam, and is provided with the only practical thread release.
The feed is positive in its movements; the stitch can be made long or short without affecting the tension.
The shuttle is cylindrical, is absolutely self-threading, is light and ground; has a perfect tension, and carries a large amount of thread.
The needle is self-setting. The "Super" is self-cleaning, and every point except the eye of the needle.
The take-up is driven by a rotary cam, is positive in its action, and has no springs to get out of order.
The presser lifter has a high and a low lift. The construction permits removal of the face plate for cleaning the mechanism without disturbing any of the working parts in the machine.
All wearing points of the "Super" at \$25.00 are of the best steel, hardened and ground to order, and are of uniform size.
For winding bobbins automatically the "Super" is fitted with no pins, held by friction clutch, with no noise, rattle or break.
The head plate is flush with top of table; the head is attached to the table by nickel-plated hinges, and held in front by a spring lock something entirely new.
The nickel plated bright parts are of the finest quality, and the janneting of head and arm is superb, being hand polished after varnishing.
The attaching device is easily applied and is silver finished steel, handily arranged in strong metal case.
The cabinet work of the "Super" at \$25.00 is quartered oak, and is finished. The cover is of bent wood, light and ornamental, and the skeleton drawer cases are of neat design.
Go direct to the makers and put the agents' profits in your own pocket by buying from the manufacturer.
DAVIS AND ADVANCE OFFICE, 427 S. Broadway, between Fourth and Fifth sts.

IN THE PUBLIC EYE

President Andrews of Brown university served in the civil war as a private, and lost an eye, besides being otherwise injured.
Lord Mayor Davies of London has an unusual faculty for collecting valuable specimens of silverware and has some fine examples of the silversmith's art.
King Oscar of Sweden resembles Mr. Gladstone in his ability as a tree chopper. Sweden is distinguished for its splendid pine trees, and nothing delights its ruler more than to go into the forests, axe in hand, and spend the whole day leveling some giant that would be arranged by its admiring admirers.
In 1833 the admirers of the great Spanish poet, Jose Zorrilla y Moral, placed upon his head a crown of solid gold. The poet was forced by lack of money to pawn this crown, and as the gold was not of the purest, the crown has since been melted, and the gold has been used for other purposes.

BUSINESS PROPERTY

FOR SALE—CHOICE BUSINESS PROPERTY ON BROADWAY—Broadway property, centrally located, is the surest thing in Los Angeles. It advances steadily in value, and is free from all uncertainty, and must in the nature of things continue to advance. It cannot do otherwise. It is settled now beyond any possibility of doubt that Broadway is the place in the lead as the main business thoroughfare of the city. The finest buildings are going up on it, and the best
