

OSLER HIMSELF IS FIFTY-FIVE

BEGAN HIS LIFE WORK AFTER HE WAS FORTY
Still Engaged Upon Gigantic Task, Though His Own Usefulness Should Have Long Since Passed

Special to The Herald. ST. LOUIS, March 12.—Professor William Osler, now 55 years old, did not himself achieve fame until he had passed his fortieth year, which he now fixes as the useless age for other men.

His books gave him international fame. His first work, "The Cerebral Palsies of Children," was published in 1859, when he was 40 years old; "Chorea and Choreiform Affections," in 1894; "Lectures on Abdominal Tumors," in 1895; "Angina Pectoris and Allied States," in 1897, and "The Principles and Practice of Medicine," a textbook that is now regarded as standard and used in nearly all the best medical schools in the country, ran to a fifth edition in 1902.

At present Dr. Osler is engaged upon the gigantic task of translating and editing Nottinagle's Encyclopedia of Medicine. The series consists of twenty volumes, and Dr. Osler has just completed the sixth.

What Sulphur Does For the Human Body in Health and Disease

The mention of sulphur will recall to many of us the early days when our mothers and grandmothers gave us our daily dose of sulphur and molasses every spring and fall.

It was the universal spring and fall "blood purifier," tonic and "cure-all" and mind you, this old-fashioned remedy was not without merit.

The idea was good, but the remedy was crude and unpalatable and a large quantity had to be taken to get any effect.

Nowadays we get all the beneficial effects of sulphur in a palatable, concentrated form, so that a single grain is far more effective than a tablespoonful of the crude sulphur.

In recent years, research and experiment have proven that the best sulphur for medicinal use is that obtained from Calcium (Calcium Sulphide) and sold in drug stores under the name of Stuart's Calcium Wafers.

They are small, chocolate coated pellets and contain the active medicinal principle of sulphur in a highly concentrated, effective form.

Few people are aware of the value of this form of sulphur in restoring and maintaining bodily vigor and health; sulphur acts directly on the liver and excretory organs and purifies and enriches the blood by the prompt elimination of waste material.

Our grandmothers knew this when they dosed us with sulphur and molasses every spring and fall, but the crudity and impurity of ordinary flowers of sulphur were often worse than the disease and cannot compare with the modern concentrated preparations of sulphur, of which Stuart's Calcium Wafers is undoubtedly the best and most widely used.

They are the natural antidote for liver and kidney troubles and cure constipation and purify the blood in a way that often surprises patient and physician alike.

Dr. R. M. Wilkins while experimenting with sulphur remedies soon found that the sulphur from Calcium was superior to any other form. He says: "For liver, kidney and blood troubles, especially when resulting from constipation or malaria, I have been surprised at the results obtained from Stuart's Calcium Wafers. In patients suffering from boils and pimples and even deep-seated carbuncles, it has repeatedly seen them dry up and disappear in four or five days, leaving the skin clear and smooth. Although Stuart's Calcium Wafers is a proprietary article and sold by druggists and for that reason taboed by many physicians, yet I know of nothing so safe and reliable for constipation, liver and kidney troubles and especially in all forms of skin diseases as this remedy."

At any rate people who are tired of pills, cathartics and so-called "purifiers," will find in Stuart's Calcium Wafers a far safer, more palatable and effective preparation.

Don't Miss Catalina Island Scenic Excursion via the Salt Lake Route \$2.50 ROUND TRIP Saturdays and Sundays

SCIENTIST WHO PLACES 40 AS LIMIT OF MAN'S USEFULNESS

PROF. WILLIAM OSLER

MRS. CHADWICK IS FOUND GUILTY

(Continued from Page One.) she flushed deeply and raised her hand in a bewildering fashion to her head. Suddenly her limbs seemed to give way beneath her and she sank feebly into her chair. Her head fell forward on her hands and a succession of strangling sobs came from her, while Emil Hoover and Judge Wing sought vainly to comfort her.

"The government moves for sentence, your honor," said District Attorney Sullivan.

"We desire to enter a motion for a new trial," said Judge Wing. "I will at a future time set a date for the argument on the motion for a new trial," said Judge Taylor, "and I presume the matter can rest until that time."

"That is satisfactory to the government," said Mr. Sullivan.

Judge Wing bowed a silent assent and stepped back to the side of his distracted client.

Loose Her Composure Mrs. Chadwick soon composed herself, raised her hand, wiped her eyes and rose to her feet. Attended by Emil Hoover and the marshal she walked slowly to the elevator. It was not there, and in the slight delay most of Mrs. Chadwick's composure deserted her utterly.

She was carried into the elevator and taken into the office of Marshal Chandler and placed on a sofa.

An attack of hysteria followed and lasted fully fifteen minutes, the sobs and cries being distinctly audible in the hall outside. The two nurses were in prompt attendance and applied restoratives.

In about half an hour from the time she entered the marshal's office Mrs. Chadwick was restored to comparative composure and was then taken to the jail.

From the time of leaving the marshal's office until the door of the jail closed upon her, she kept up a continuous moaning that was distressing to hear.

ARIZONA RAIN-SOAKED

Places on Desert Dry for Years Are Covered With Water

By Associated Press. EL PASO, Tex., March 11.—The whole territory of Arizona is covered with water as a result of heavy rains and snows and in many places the desert that has not known water for a decade is now a lake. At Silver City there has fallen twenty-eight inches of rain during the last eight months, and rivers heretofore dry are now crossed by ferries.

All records for moisture have been broken in this section.

Railroads are demoralized not only from washouts, but from soft tracks, which will in many instances have to be rebuilt and rebalanced. Much damage has been done to mining shafts.

Sale of Stock Exchange Seat By Associated Press. NEW YORK, March 11.—A seat on the New York stock exchange has been sold for \$32,500. This is the high record price. The name of the purchaser was not disclosed.

Henry Clay Barnabee, the comic opera comedian, is an invalid, lying helpless at his home on Riverside drive, New York. His affliction is the result of a fall in St. Louis last autumn.

MISSOURI DEADLOCK SHOWS NO WEAKENING

Little Prospect of Compromise Among Republicans as to Agreement on Cockrell

Special to The Herald. ST. LOUIS, Mo., March 11.—With the end of the legislative session probably but a few days distant, the Missouri senatorial fight seems farther from a settlement than on the opening day.

Senator Francis M. Cockrell continues to receive the largest number of votes on every ballot. He lacks, however, enough to elect, and although there has been some talk of a union between the Democratic and Republican voters, there is really not the smallest likelihood of such an arrangement.

Thomas K. Niedringhaus, the Republican caucus nominee, is next in the list. Every day there are rumors that Niedringhaus will either lose his entire following or that an agreement in his favor will be reached. These reports have invariably proved false and there seems as little prospect of a compromise among the Republicans as to an agreement on Cockrell.

GOVERNMENT EXPLORERS RETURN TO SAN DIEGO

Steamship Albatross Makes Port After Four Months' Work in the South Pacific

By Associated Press. SAN DIEGO, March 11.—The U. S. S. Albatross is in port after four months' exploration and soundings in the South Pacific. She crossed between continent and islands four times, carrying on deep-sea explorations and soundings and gathering specimens of marine life.

The explorations were under the direction of Professor Alexander Agassiz, who had as his guests and fellow workers Henry B. Bigelow of Boston, Professor Kofoid of the University of California and Professor Chamberlain. None of them will speak of the scientific results of the trip, claiming that their reports must be forwarded to Washington to find their way to the people through official sources. Their work was directed according to plans outlined by Government Fish Commissioner Bowers.

COLUMBIA HAZERS GET EVEN WITH KINGDON GOULD

Sophomores Catch the Student Who Formerly Held Them Off With a Gun

By Associated Press. NEW YORK, March 11.—Hazers at Columbia university have, it is reported, finally succeeded in exercising their arts on Kingdon Gould, son of George Gould, who caused considerable excitement some time ago by drawing a revolver and driving off a band of sophomores when they attempted to capture him.

Six sophomores, representing a secret organization, are said to have taken young Gould by surprise as he was leaving the university. They placed him under parole until night, when he was duly hazed, and the class was avenged for the manner in which he spouted their plans to make him an unwilling guest at their dinner.

SUGAR DUTIES PROBLEM

Government May Have to Refund Fifty-Four Million Dollars

By Associated Press. WASHINGTON, March 11.—Treasury officials today, in commenting on the decision yesterday of the United States court at New York in the case of the American Sugar Refining company against the United States, stated that the government would take an appeal from the decision.

The question at issue is the exact date when the Cuban reciprocity treaty went into effect. If yesterday's decision is sustained the government will be compelled to refund about \$54,000,000 paid by the American Sugar Refining company as customs duties on sugar imported from Cuba.

TORN TO ATOMS BY HIS BOMB

TERRORIST PROVES HIS OWN EXECUTIONER

Carried an English Passport, but the Police Believe He Was an Emisary of a Parisian Revolutionary Organization

By Associated Press. ST. PETERSBURG, March 11.—The explosion of a bomb at the Hotel Bristol, adjoining the Hotel d'Angleterre here, just before daylight this morning, blew to atoms the owner of the bomb, who had an English passport and gave the name of Alfred Henry McCullough, and wrecked the adjoining rooms, killing the wife of an officer and injuring several other lodgers. The explosion was heard blocks away, and created a tremendous sensation.

McCullough's legs were torn off, and the flesh of the upper portion of his body splattered the walls and ceiling, which were red with blood. At the British embassy and consulate McCullough was unknown, but it is believed that he was a British subject.

The bomb was of the same power as those which killed the late Minister of the Interior Von Plehve and Grand Duke Sergius, creating the same havoc as did the explosions at the Hotel du Nord last spring.

The preliminary investigation of the police leads them to believe that McCullough was engaged either in packing his effects, as the Hotel Bristol was to be vacated today, or in preparing for some desperate enterprise today when the bomb, which like all the infernal machines of the terrorists, was provided with gravity tubes, fell and exploded, as the one at the Hotel du Nord did.

The police immediately surrounded the hotel, mounted gendarmes allowing no one to go within fifty paces. An independent investigation made by the Associated Press seems to establish beyond question that the man killed was a terrorist leader. His passport, of course, was fictitious, but the man was a foreigner, not a Russian.

At the Hotel de Paris, where he had been stopping from time to time since the middle of January, McCullough was described as a very innocent looking man between 30 and 40 years old, resembling more a Frenchman than an Englishman and speaking French with the fluency of a native. He also spoke English, which, however, he had little occasion to use at the hotel. He kept much to himself, going away on frequent short trips.

Just before Grand Duke Sergius was assassinated the man was absent for two days, which might connect him directly with the grand duke's murder. McCullough professed to be engaged in business, but in view of what has happened his movements are admitted to have been mysterious. Some of the police are inclined to think he was a direct emissary of the Paris revolutionary organization.

Repeated Peasant Strikes By Associated Press. WARSAW, March 11.—Agitation among the peasants against the use of the Russian language in the local administration is increasing. The acting governor general of Warsaw issued a proclamation today imposing severe penalties on persons who in any way interfere with local officials.

Peasant strikes constantly break out in new quarters where laborers are admittedly well treated. This is regarded as indicating that a systematic campaign has been opened throughout the country by Socialist agitators.

DISPUTE OVER PRESENTS

English Court Decides the Ownership of Wedding Gifts

Special Cable to The Herald. LONDON, March 10.—The question as to whether husband or wife is entitled to certain wedding presents came before Judge Russell at Croydon county court this week, when Edith Alice Weston sued her husband, a member of parliament, of Thornton Heath.

The plaintiff said that she had been separated from her husband.

His honor stated that if a person knew the plaintiff and she got a wedding present from that person, it was her own, but if the person knew both, both husband and wife would be entitled to it.

In the end the defendant informed the court that the case had been withdrawn.

ENCOURAGE ART IN ALGERIA

Plans Perfected to Give Promising Students Scholarships

Special Cable to The Herald. PARIS, March 11.—Algeria is to have a rival to the famous Villa Medicea in Rome. Jannart, the governor general of Algeria, has just put into effect a scheme which has long been under consideration by which young artists showing talent will be awarded annual scholarships to study art in a splendid villa of the pure Moorish style, situated on a hill overlooking Algiers.

FAKED PAINTINGS ARE SEIZED

Spurious "Masterpieces" Taken in a Raid by Paris Police

Special Cable to The Herald. PARIS, March 11.—At the request of several auctioneers and on the warrant of a judge d'instruction, a commissary of police in the Faubourg Mont Marte quarter visited salesrooms of the Hotel Drouet this week and seized "faked" pictures bearing the signatures of Bondin, Corot, Courbet, Harpignies and Jongkind.
