SEATTLE, Wash., April 27.—Rain delayed the game for nearly an hour this afternoon and when the trouble started the team from the orange lands went to pieces. Four stolen bases and two indications by Eager let three runs through for the Siwashes in the first inning. A well executed bunt by Russ Hall, a pass for McHale and a long safe one down the right foul line by James netted two more in the third and then the meeting was out so far as the Angels were concerned.

Skel Roach pitched blue ribbon ball except in the third inning, when he let down for five hits that netted the visitors three runs. The score:

FOLLOW ME WINS AT GOOD ODDS. SAN FRANCISCO, April 27.—All though played at 12 to 1, Follow Me proved to be a repeater and won the fourth race, which was exciting. The start in this race was in front of the grand stand and the race-goers witnessed another accident when Chestnut stumbled and threw Jockey Smith. AMAZED BY RICH IMPERIAL VALLEY

BUSINESS MEN HOME FROM A TRIP OF INSPECTION

REGION IS GARDEN SPOT

Prominent Merchants of Los Angeles Say That Borderland Country Is a Bonanza for Farmers

The delegation of Los Angeles business men that visited the Imperial valley district Tuesday and Wednesday under the auspices of the chamber of commerce, with Secretary Frank Wiggins as the active host, arrived home yesterday afternoon.

"It is a wonderful section," said Secretary Wiggins. "It is the country for the farmer, where land can now be had as low as \$30 an acre, with all water rights, the cheapest land left in California for all purposes.

"If nothing happens the Imperial valley will become densely populated within a few years. The land is rich enough down there to support hundreds of thousands of people. The possibilities of the land, which is remarkable for its richness, are unlimited. Everything grown anywhere can be produced in the valley and at a good profit.

Plenty of Water. There is water in great abundance. A power plant to cost \$350,000 is to be built for the distribution of the water which flows from the Colorado river. The water is so plentiful that some of the farmers after irrigating their land cut holes in the sides of the runways and let the water overflow into the roads, causing some of the thoroughfares to become in poor condition, but generally the water is well husbanded and utilized to the best advantage.

"Our party visited Calexico, Holtville, Imperial and Brawley, besides going out into the country to see the farms and orchards. The journey was made by conservative business men like myself, to acquaint themselves with actual conditions in the valley, and like myself all were amazed at the development of the country and the many evidences of prosperity. We expected to find patches of cultivated land, but instead there are miles and miles of as well kept farms as one would find in old Illinois or Ohio.

Big Grain Crop. "We were reliably informed that there are ready for shipment no less than 300,000 sacks of barley and wheat produced in the valley.

"Stock raising is carried on extensively and profitably. It is estimated that there are 15,000 cattle and 10,000 hogs in the sections we traversed, omitting those that had been fattened and shipped.

"Great crops of barley and wheat are produced and alfalfa grows like weeds. It is the stock feed of the valley and many crops are grown from one sowing.

"We were royally entertained at all points visited, but we had little time for pleasure. It was purely a business trip, and all of the business men return enthusiastic over the valley and its possibilities.

Fred L. Alles visited the valley four years ago and wrote up the country for one of the Los Angeles papers. "I was greatly surprised," he said, "to note the advancement that had been made since I was down there in 1901. The valley is blossoming as the rose, and there are big fortunes in the valleys for the farmers or any man who will devote himself to agricultural or stock raising pursuits. The crops are marketed largely in the skin of the hogs, the horses and the cattle, and a man with even a few acres will become independently rich in a few years.

"I saw land that four years ago was condemned as poor now growing some of the best crops in the valley. All of the land is good."

Favorable Expression. The following resolution regarding the valley was made: "The business men engaged in the special excursion to the Imperial valley on April 26, 1905, desire to express to the Southern Pacific company and to the citizens of Calexico, Holtville, Imperial and Brawley their high appreciation of the courtesies extended to them in this opportunity to inspect the magnificent new farming section just developing in the Imperial valley.

"There we found, in what was practically a barren desert three years ago, more than one hundred thousand acres of fertile soil in a high state of cultivation, producing for market this year three hundred thousand sacks of grain, and many carloads of horses, cattle and swine.

"We found there thrifty towns, progressive business firms, and abundance of water flowing in canals and ditches, and the promise of a future development which will be a great factor in the upbuilding of the business interests of Los Angeles and Southern California.

Doctor Brigham Says MANY PHYSICIANS PRESCRIBE

Lydia E. Pinkham's Vegetable Compound

The wonderful power of Lydia E. Pinkham's Vegetable Compound over the diseases of womanhood is not because it is a stimulant, not because it is a palliative, but simply because it is the most wonderful tonic and reconstructor ever discovered to act directly upon the generative organs, positively curing disease and restoring health and vigor.

Marvelous cures are reported from all parts of the country by women who have been cured, trained nurses who have witnessed cures and physicians who have recognized the virtue of Lydia E. Pinkham's Vegetable Compound, and are fair enough to give credit where it is due.

If physicians dared to be frank and open, hundreds of them would acknowledge that they constantly prescribe Lydia E. Pinkham's Vegetable Compound in severe cases of female ills, as they know by experience it can be relied upon to effect a cure. The following letter proves it.

Dr. S. C. Brigham, of 4 Brigham Park, Fitchburg, Mass., writes: "It gives me great pleasure to say that I have found Lydia E. Pinkham's Vegetable Compound very efficacious, and often prescribe it in my practice for female difficulties.

"My oldest daughter found it very beneficial for relieving her some time ago, and my youngest daughter is now taking it for a female weakness, and is surely gaining in health and strength.

"I freely advocate it as a most reliable specific in all diseases to which women are subject, and give it honest endorsement."

Women who are troubled with painful or irregular menstruation, bloating (or flatulence), leucorrhoea, falling in, inflammation or ulceration of the uterus, ovarian troubles, that bearing-down feeling, dizziness, faintness, indigestion, nervous prostration or the blues, should take immediate action to ward off the serious consequences, and be restored to perfect health and strength by taking Lydia E. Pinkham's Vegetable Compound, and then write to Mrs. Pinkham, at Lynn, Mass., for further free advice. No living person has had the benefit of a wider experience in treating female ills. She has guided thousands to health. Every suffering woman should ask for and follow her advice if she wants to be strong and well.

Heels of New Rubber. Eminent scientists admit that a person weighing 150 pounds who walks three miles a day lifts 1,188,000 pounds. Where do rubber heels come in? Does it stand to reason that the heel of new rubber is essential? That it sheathes your walk through life with comfort? Rubber heels carry out what nature intended.
