WILL LEAVE FOR NEW YORK

MISS ALICE WERNLUND

A concert in which the Scandinavians of Los Angeles are very much interested will be given in Blanchard hall on Friday evening, June 30. It will be Miss Alice Wernlund's farewell appearance before going to New York to enter upon an operatic career.

Miss Wernlund possesses a lyric soprano of great possibilities. Her range is from a flat below the staff to F in alto. She has not been much before the public, preferring to become more finished before looking for recognition.

When the Savage Opera company was here last fall Miss Wernlund sang for the manager, with the result of having an engagement offered her. The professional work she

enters upon will not be allowed to interfere with her studying, which she expects to continue later in Europe, if pluck and ambition will take her there.

Although Miss Wernlund is of Swedish birth she has lived most of her life in Los Angeles and probably owes as much to this climate as to being born of a race of singers, for the possession of her brilliant voice.

Roland Paul, with whom she has been studying, will sing the prison duet with Miss Wernlund and also a group of short songs. Miss Natalie Talbert, elocutionist, and the "Svea" quartet, Swedish singers, will assist. In addition there will be orchestral music.

KRYPTOK GLASSES

The Only Invisible Bifocal (Two-in-One Glass) That Is Made Walter I. Seymour, 517 S. Broadway

The following is a copy of an ad taken from a recent issue of the "Review of Reviews", McClures, Book Lovers Magazine, etc.

KRYPTOK INVISIBLE BIFOCALS

The Evolution of Near-and-Far Glasses

When it is no longer possible to see both near and far through a single pair of glasses one must employ a two-part lens, or submit to the necessity of changing glasses continually. Many prefer the latter alternative because all bifocal lenses known to them are marred by unsightly lines that not only suggest infirmity of vision but intensify it.

The "KRYPTOK" is a combination lens put together in a new way, a perfect reading lens so skillfully inserted within the distance lens that no dividing line is visible.

If you would like to secure bifocal glasses that are easy to wear, young looking and unnoticeable ask the nearest of the following opticians to send you "KRYPTOK" Booklet "B" containing prices and full information:
