ceipts on account of Klondike gold are constantly replenishing the New York supply now.

It is expected, also, that the government bonds to be released by the return of government deposits on July 15 will go promptly into use for new issues of bank notes. This would add to the available supply of currency and facilitate an outward movement of gold.

Japanese loan seems to be viewed with more uncertainty. Even where the proceeds of the former loan were left on deposit here, the shifting in the loan account caused some temporary disturbance in the money market. Satisfaction is felt over the authoritative intimation that no withdrawal of the loan proceeds is intended before the last Japanese loan remains on deposit in New York and is placed in call loans here, so that the Japaneses government's handling of its balances might york money market.

The digestion of profits was persistent, and as a rule the day's important gains were restricted to a few stocks. The closing tone was irregular.

Bonds were steady. Total sales, par value, \$4,329,000.

United States bonds were unchanged on call.
