THREE KILLED, MANY OTHERS WOUNDED IN NEW YORK

FIRE ON THEATER AUDIENCE

Highbinders Enter Celestial Play House and Begin Shooting With Revolvers—Many Captured by Police

By Associated Press.

NEW YORK, Aug. 6.—As a result of a battle between members of the big Chinese societies in the Chinese theater in Doyer street tonight, three Chinese were killed, two others probably fatally wounded and many others injured.

Suddenly, as the actors on the stage reached a climax in the play there was a loud explosion quickly followed by several others in the front of the theater near the stage.

When five policemen managed to force their way into the theater they found five men lying in pools of blood and a score were hiding under benches, the backs of which were splintered with bullets.

CANINE SYBARITE ROLLS ON BED OF JEWELS

Bloodhound Leaps Into Show Window and Creates Havoc With Precious Gems

With diamond rings on his toes and gold chains entwined about his neck, a huge bloodhound, who performs the duties of night watchman in a West First street pawnshop, rolled in riches and luxury for half an hour last night.

The dog, which has the reputation of being one of the finest of the breed in Los Angeles, became enraged at a number of persons who were standing on the sidewalk looking at the display in the pawnshop window.

Being unaccustomed to such unusual wealth the dog tried to dispose of all his sudden riches at once but entangling alliances were made and for half an hour chaos reigned in the jeweler's window.

Nickie platted clocks became excited and rang out wild alarms, diamond sunbursts winked and blinked in employment of the sport but when a silver bejeweled hatpin joined in the revelry and stabbed the dog in the side he let out one long, dismal howl.

When the dog saw the array of officers in front of the building he recognized his friends and fellow defenders of property and turned, leaped over the partition, and slunk away to the rear of the building.

NEW ORLEANS, Aug. 6.—The fever report today shows a great improvement over the middle of the week and the fact that there were only two new sub foci, one uptown and one downtown, is a source of special encouragement.

President Roosevelt and Surgeon General Wyman have both been wired by the citizens' committee of New Orleans that all of the funds that the service may require outside of its own stated expenditures will be supplied by the people of the city.

Surgeon White returned today from Gulf Port and Ocean Springs, where he had gone to arrange for the improving of the camp at Fontainebleau, on the Louisville & Nashville road, and stated that he would probably not establish any camp on the Mississippi coast in view of the attitude of the people of Ocean Springs and Governor Vardaman's expressed determination to abide by their wishes.

Dr. Larue announced that Archbishop Chappelle was holding his own and there was no change in his condition since last night.

Two vessels of the naval brigade, the Marie S. and Wolverton, returned tonight from Rigolets, where they had gone under orders from the governor to protect the fishermen in Louisiana waters from the depredations of the Mississippi patrol boats.

AFRICA HOME OF FEVER

Theory of Officials as to Origin of the Disease

WASHINGTON, Aug. 6.—The current number of Public Health Reports, published by the service presided over by Gen. Wyman, contains an article on yellow fever, which is in part as follows:

"The dispatch printed in the present issue of the Public Health Reports from the American consul at Goree-Dakar, on the west coast of Africa, an area of great epidemiological interest, reporting the presence of yellow fever in Senegal, with an incidental exodus of foreigners, draws attention to the obscure but none the less important question of the initial home of yellow fever.

"One case of yellow fever was reported at Vera Cruz July 11. At Beliz, British Honduras, during the week ending July 6 there was an additional case, with one death; in Honduras seven cases, with three deaths from yellow fever, occurred at Puerto Cortez in the same week, and the disease was reported to be epidemic at San Pedro, thirty-five miles from Puerto Cortez, on the line of railroad. All the smaller towns along the line are said to be free from the disease.

"Dakar, where the appearance of yellow fever is at present reported, is situated on the extreme point of Cape Verde, in the French colony of Senegal, of which it is one of the chief towns, one and one-half miles north of Goree, the two places often being known by the compound name Goree-Dakar. Dakar has a population of about 3500. It is connected by a railroad 163 miles long with St. Louis, the residence of the governor. St. Louis

is situated at the mouth of the Senegal. The first authentic accounts of yellow fever in Africa are descriptions of an epidemic that prevailed at St. Louis in 1778, and was traced to importation from Sierra Leone.

Reports Repeated Outbreaks

"In a recent foreign office publication the British vice consul at Grand Bassam discusses the extensive prevalence of yellow fever in that French colony in 1892, and says that the disease had reappeared again and again in such continuous and disastrous outbreaks that in 1899 it was proposed to abandon the town completely.

"Owing to the recent rumors of yellow fever on the west coast of Africa, a request was made June 12, 1905, to the consul general at Monrovia, Liberia, for a report on the prevalence of the disease. The British vice consul at Grand Bassam states that in 1903 the mortality was no less than 60 per cent of the population.

"The United States consul at Sierra Leone, writing at the beginning of the former extensive epidemic, says that the infected strip extended from the Gold coast on the east up to and including Half Jack on the west. The west African islands have suffered from time to time from yellow fever, which, however, does not appear to have a tendency toward the African continent.

"The health of Dakar, where yellow fever is now reported present, is not unimportant to the western hemisphere. It is the only port of Senegal, and is visited by Atlantic steamers on their way from France to South America. In constant coastwise communication with Sierra Leone and places to the southeast and north, it is in position to receive or transmit contagious diseases existing in that section.

Fever in Republics to South

"During the week ending July 1 one case of yellow fever occurred at Sierra Blanca, near Vera Cruz, where a number of cases have been reported lately, and one case, with one death, at Tehantepec, a river port of the isthmus of Tehantepec, having a population of about 15,000, mostly descendants of Indians.

"One case of yellow fever was reported at Vera Cruz July 11. At Beliz, British Honduras, during the week ending July 6 there was an additional case, with one death; in Honduras seven cases, with three deaths from yellow fever, occurred at Puerto Cortez in the same week, and the disease was reported to be epidemic at San Pedro, thirty-five miles from Puerto Cortez, on the line of railroad.

"From June 23 to July 6 seven cases and one death from yellow fever occurred at Livingston, Guatemala. Previous to the former date there had been five cases and four deaths.

Cleveland Pleasure Seekers Run Down by Pittsburg Flyer—Crash Comes Without Slightest Warning

By Associated Press.

CLEVELAND, Aug. 6.—The fast Pittsburg flyer No. 560 on the Cleveland & Pittsburg railroad, crashed into an eastbound St. Clair street car at 9:30 tonight, killing a child instantly and fatally injuring six people while fifteen others sustained injuries.

The accident happened without warning as the conductor had just crossed the railroad tracks to see that the line was clear and had thrown a safety derailer switch to permit the car to pass.

The headlight of the train was not visible nor was its rumbling heard until it was but a short distance from the crossing. The conductor let go the derailer switch in time to throw the rear truck of his car off the track but not in time to prevent the front end being struck and the car hurled around until it stood parallel with the railroad track.

The car contained forty passengers who were bound for their homes and for amusement resorts.

Only a few escaped uninjured and they were persons occupying the rear seats. The dead: CORA MAY MARTIN, 2 years old, daughter of James Martin.
