a contract to Barnes & Innes, house movers, to move from its location to a piece of property owned by him at Florence and Figueroa avenues.

Tells How He Took Store Bunker said: "I moved the building because I had a right to move it. It belongs to me and was rented to J. H. Henry, who ran a grocery in it until he failed in business two weeks ago."

"The building was located on a lot which belongs to Ivins and was leased by Henry. I paid for having the building built and owned it absolutely. When Henry failed I wanted to move it off of the property, as I am justified in doing."

"It was a very simple question to get away with it. I expected an injunction or something of that sort if Ivins if he knew I intended to move the building, and so I hired the movers with the agreement that they were to begin work at 8 o'clock in the evening. No one noticed that the building was being moved until after it was gone. It was a good joke then to watch them trying to find it."

Dr. Bachman Creates Part in Morosco's New Play, "The Judge and the Jury"

After once having been in the glare of the footlights and listened to the plaudits of the public in front, it is difficult for one to retire absolutely and permanently from the stage.

The doctor, before settling down to the more prosaic life of a dental specialist, spent several seasons on the stage, having been with some of the leading road and stock companies of the east, among which were W. A. Brady's and Edward E. Rice's attractions.

Under the stage name of Carl Williams he was at the head of his own company for a season, playing with much success the popular Swedish dialect character John Erickson in "Our Swedish Cousin," a play of his own writing. He is also the author of several new plays, among which are a pastoral play of the middle west called "Dakotah," an emotional drama of the Director's period entitled "The Altar of Love," a Swedish dialect comedy idyl, "Olaf Neilson" and "Tanis the Sand Digger," the latter being founded on a popular novel of life in the Virginia mountains.
