One and one-half stories; cement porch and clinker brick columns, w. h. chains around front door to dining room. Bath and trunk room, finished in white enamel; balance rich, finished oak stain. If you have seen me early, EDWIN ALDERSON, 128 So. Broadway.

**Notes for Women**

**Homes for American Students**

A plan has been made so that a limited number of American women wishing to study at Oxford, England, may be admitted to an English home. It will give the young woman an opportunity to see real English life and give her an opportunity to travel during the vacation. Women's colleges are very enthusiastic over the plan and the faculty of Oxford university has cordially endorsed it.

**Savory Rice**

Spread three cups of cold boiled rice upon a platter and set in the open oven that every grain may dry. Meanwhile heat a little butter in the frying pan and fry a sliced onion in it. When the slices are browned remove them with a perforated spoon and lay the rice by the spoonful into the pan. Stir until each grain is coated with the butter. Turn the rice into a heated colander, shake hard and set at the side of the range for five minutes. Serve in a deep vegetable dish.

**To Clean Plated Ware**

To restore plated metal stands when the silver is worn off get 5 cents worth of mercury and 1 cent's worth of prepared chalk; mix them well together, making them into a paste with a little water. Rub the paste on the tarnished article with a small piece of leather until it is bright again.

**The Sin of Borrowing**

It has been decided at Radcliffe college that hereafter women taking the part of men in the plays that are given must not wear trousers, but may wear, instead, bloomers. It has been found that girls borrowed clothes from the Harvard students, and Miss Irwin, the president, objected, and the new ruling was made.

**Anti-Handshaking Society**

An anti-handshaking society has been formed at Lyden. Members who shake hands will be fined two shillings, and the money will be pooled and expended in the purchase of lottery tickets for the benefit of the members who obey the rules.

**Assuming Matronly Toilet**

Miss Alice Roosevelt appeared for the first time at the New Year's reception wearing diamonds, as she thinks she is almost a matron now and may properly wear diamonds. She wore a message bouquet of orchids, too, which are part of the velvet and diamond age of women.

**After the Truants**

In Chicago and Boston the school boards and judges of the criminal courts are asking themselves why it is that so many children like to play truant. Are the schools responsible for the fact? And if so what can be done to change them. Judge Mack in Chicago, who is making a record as a judge of the juvenile court, has sought the school board for some solution of the fact that the schools do not do more to prevent juvenile wrongdoing. In Boston the school board is asking the judges the same question.

**Frost Cakes**

Beat the whites of six eggs to a stiff froth, adding a little at a time, two cupfuls of granulated sugar. When this is thoroughly whipped in add two beaten yolks and one-third cupful of butter; then after another thorough beating add one cupful of finely sifted flour. In which has been sifted one teaspoonful of baking powder. Flavor with almond, bake in a long tin, and when done cover with a boiled icing and cut into squares.

**Excuse Albums for Tardy Guests**

It behooves those going to house parties to arrive at their destinations promptly on time, for several hostesses are promptly to keeping "excuse albums." In those volumes the tardy guests must write their excuses.

**FRICK MAY BUY A PAPER**

Wants to Prevent Further Hostile Cartoons Getting in a Pittsburg Publication

Special to The Herald.

PITTSBURG, Jan. 21.—It was rumored in Pittsburg banking circles yesterday that the Leader had been bought by the H. C. Frick interests. It is not denied that \$1,250,000 was offered for the Leader ten days ago by Frick interests, and was refused. Another, larger, offer was made later. The first move made by Frick was about ten days ago when the Leader came out with a cartoon representing him with a dollar sign on his back. "The work of Frick," it was alleged to have said his broker, "Buy that paper for me."

**Great Rush for Manhattan in Nevada**

Plans of Great Western Gold Company. Another Big Strike in Carrigan Property—Railroad to the Mines

The Redding Free Press announces that big things have been planned by the Great Western Gold Company for 1906, and among them will be the early installation of a second and larger furnace at the Ingot smelter and the erection of a zinc plant, in which zinc white will be produced from the fumes of the smelters.

The additional furnace and machinery has already been ordered and will be shipped during the present month. At a meeting of the stockholders of the Great Western, held in St. Louis on December 27 last, the following officers and directors were elected: T. S. Henderson, president; O. E. Adams, vice president; P. H. Noel, secretary and treasurer; M. E. Dittmar, managing director; F. Keller, A. R. Fleming, Thomas Walsh.

The directors have reorganized and outlined a plan of development work and plant installation that means much for Nevada county.

The profits from the Afterthought smelter will be more than doubled, and this, with the manufacture of zinc and the consequent employment of more men, will make things hum in the Afterthought section.

**New Mining Company**

The Barstow Mining and Milling company has filed a certificate of incorporation with the county clerk at San Bernardino, says the Sun. The principal place of business named is Los Angeles. Capital stock \$1,000,000, in shares of the par value of \$100, which have been subscribed as follows: James Graybill, 18,995 shares; Won Kee, 6600 shares; C. W. Roach, 8500 shares; T. A. Smithson, 8500 shares, and B. A. Stephens, 50 shares.

The property owned by the company is located opposite Barstow, near an old cemetery. The first locations were made by C. W. Roach, a special officer of the Santa Fe, who claimed to have discovered gold galore. Soon all manner of startling accounts of rich strikes were in circulation, and a stampede was created.

Recently it was alleged that a systematic effort to jump the claims was made. The first attempt was thwarted by Won Kee and one of the white stockholders. Then it was alleged that Won Kee had been found on the claim alone later and brutally beaten by the jumpers, who secured temporary possession of the property, but were soon arrested by special officers of the Santa Fe.

It is stated at Barstow, that a mill, both for private use and custom ore, will be erected on the property.

**Carrigan Strike Excitement**

Mining men in the vicinity of the Carrigan strike on the Big Williams Fork Yavapai county, are greatly excited over the discovery there of a three-foot ledge of ore that assays \$4000 to the ton in gold.

Julius Mora, an Italian prospector who arrived from the Carrigan vicinity, brought to Phoenix the first news of the discovery, says the Gazette. Mora says that the depth of fifty feet on the Carrigan property the gold-bearing ledge is twenty feet wide, with a streak of three feet that runs into the thousands of dollars in gold. Some of the samples taken out are almost the pure stuff.

Important strikes are being made on other claims that surround the Carrigan claims, on four of which gold ore has been found. Many mining men and prospectors are preparing to go into the district.

At the present time about seventy-five men are at work sinking shafts on different claims. Eleven of them are employed by the company formed to develop the Carrigan property. As depth is gained the ore is getting richer.

Redmond Tooney, who has taken a bond on six claims in the district that adjoins those of Carrigan, is preparing to do extensive development work. The bond on Carrigan's claims is \$250,000 and is held by several wealthy Colorado mining men.

**Rush to Manhattan**

Manhattan, the new and fabulously rich gold camp in the Goldfield, Nev., district, is located eighty miles northeast of Goldfield and a week ago contained twenty inhabitants. It now contains 4000 eager prospectors for gold. A low estimate places the exodus from Goldfield to the new camp at 2000.

Life at Manhattan is strenuous, there being no law or order. Rich surface finds have made prospectors hysterical. Forty leasers are said to be sacking ore. The excitement at Manhattan was caused by W. F. Bond coming into Goldfield with samples glittering with gold. Many prospectors are also rushing to the new field from Tonopah and Bullfrog.

**Knows All About It**

N. J. Miller, at present a resident of San Francisco and formerly of Joplin, Mo., claims to know the location of "Scotty's" mine.

Miller declares he has located a claim of almost equal richness not far from "Scotty's." "It is in the Funeral mountains, east of Death valley," he said. "The nearest railroad is Koebe, the southern terminus of the Carson and Colorado. We go in from Barstow on the Santa Fe about 125 miles by pack team. Here are specimens," said Miller, producing the customary prospector's sack. "This run \$8000 to the ton. The poorest of them go \$400 to the ton. When Clark's road is extended to Bullfrog it will run about fourteen miles from our claim. We will have to pack out the ore on mules."

**VICAR'S QUEER CHALLENGE**

Strange Conditions for a Twenty-Four Hour Walk in the Mud and Special Cable to The Herald.

London, Jan. 20.—A disagreement which occurred at a recent meeting of the south and district education committee, has resulted in the issue of an extraordinary challenge being issued by the Rev. T. C. Simmons, vicar of Granthorpe, Lincolnshire. The vicar is one of the members of the committee.

"I challenge any member of my own age of the Louth and district education committee to try which of the two of us can walk the farthest in twenty-four hours, the conditions to be: "1. A muddy road. "2. A driving wind and heavy rain. "3. An umbrella held as perpendicularly overhead as the wind will permit.

"Imagine that before those twenty-four hours had elapsed not only the L. D. E. C., but also the public at large, however incredulous before, would find practical and visible demonstration of a perfectly convincing nature that occasionally a vicar and a school board official may be found going together."

The vicar's challenge has caused much amusement in the district, but it is unlikely that it will be accepted.

**REAL ESTATE TRANSFERS**

SATURDAY, JANUARY 20, 1906.

Ellen Zinn to D. Bowman—Lot 12 and 13, block S. Glendora, \$1000.

J. W. Messenger to Sarah B. Pillsbury—Lot 4, block 8, Alhambra, same tract, \$1000.

**UMBRELLA TRADE RUINED**

London Losing Reverence for Silk Tiles—Underground Railway Does the Rest

Special Cable to The Herald.

LONDON, Jan. 20.—The umbrella has two deadly enemies, which between them eventually will exterminate it. They are, according to a dealer interviewed by the Daily Mirror, the bowler and the twopenny tube.

Ten years ago a self-respecting business man would as soon have thought of starting for the city without his boots as without his hat, but all that is changed. Now the bowler is the inevitable wear of at least one cabinet minister. His weather-resisting qualities have endeared the somber dome of felt to the heads, hearts and pockets of great and small and with his adoption of the bowler hat the business man is more or less independent of the useful but troublesome umbrella.

Important strikes are being made on other claims that surround the Carrigan claims, on four of which gold ore has been found. Many mining men and prospectors are preparing to go into the district.

At the present time about seventy-five men are at work sinking shafts on different claims. Eleven of them are employed by the company formed to develop the Carrigan property. As depth is gained the ore is getting richer.
