Oculist and Optician

Difference in Glasses

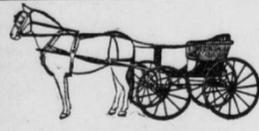

The value of a telescope or eyeglass does not depend so much upon its size and looks as upon the kind of lenses in it. The cheap kind, badly fitted, are not ground right. If you want a good and perfect-fitting lens, have our oculist prescribe for you—then we know it is right—and you will realize the difference after wearing a cheap lens. We only give the best, at but little more than you would pay a so-called optician.
