

MAIL SERVICE IS NOT HURT HERE

FAST TRAINS TO LOS ANGELES CONTINUE

Lack of Tourist Travel to San Francisco Given as the Reason for Reducing Transcontinental Time

Telegraphic reports in Sunday morning papers stated that the transcontinental railroads had discontinued all extra fast trains between San Francisco and the east, thus decreasing the mail service and transportation between the east and the west coasts by twenty-four hours.

According to Postmaster Flint, however, this change in the transportation schedule will not affect Los Angeles.

"Our eastern mails have no connection schedule will not affect Los Angeles," said Mr. Flint, "and so far as I know, the mails between Los Angeles and the east will be carried and delivered in the same rapid time that has been the custom."

"The cause of the discontinuance of the fast trains between San Francisco and the east is said to be that, since the winter tourist traffic to that city has been almost entirely cut off by the disaster of last spring and even business transportation has been materially lessened on that account. For this reason the railroads have found it unprofitable to continue the fast trains."

Los Angeles has become even more of an attraction to transcontinental travelers as a result of the northern city's misfortune, and the immigration here this winter will be greater than in any previous year.

Although the question has not been definitely settled it is more than probable that the railroads entering Los Angeles will improve the train service between here and the east.

WHAT OF A. A. ROBINSON?

His Retirement from Mexican Central Causes Speculation

The announcement from New York that Albert A. Robinson has retired from the presidency of the Mexican Central railway has been received with interest, and since the formal announcement there has been much conjecture in railroad circles as to the reason for his resignation.

No satisfactory explanation has so far been offered, and, with the exception of the general knowledge that Mr. Robinson on the eve of his departure from Mexico City to New York to attend the reorganization meeting of the directors, made the announcement that he would retire from his office, no intimation has been given that he would not continue in his office.

In making the statement that he would retire from the presidency, Mr. Robinson also stated that an announcement of great interest to the public concerning the Mexican Central would be made.

Dispatches from Mexico stated at the time that it was impossible to ascertain what the announcement would be and also that Mr. Robinson refused to give any reason for his relinquishment of control.

It was stated at that time that Mr. Robinson would be succeeded temporarily by Vice President C. R. Hudson, to assume management of the road November 15. This statement was either without foundation or plans of the directors were changed between the time it was made and the meeting, for instead of Mr. Hudson, Eben Richards, vice president and general counsel, was elected as successor to the president pending a permanent election.

Mr. Robinson, the retiring president, is one of the best known railroad men in the country, having been president of the Mexican Central for almost fourteen years, and prior to his election as such having been general manager of the Santa Fe. His home is in Topeka, and he is personally known to nearly every railroad man in that part of the country.

CITIZENS COMMANDEER COAL

Serve Notice of Intention on Northern Pacific Officials

By Associated Press. SPOKANE, Wash., Nov. 25.—Last week at Prosser, Wash., about 250 responsible citizens attached their names to a paper addressed to the Northern Pacific, serving notice that they would commandeered coal from cars coming through, depositing the money for the coal taken with the agent.

Superintendent Beamer at Spokane

says he had already taken steps to relieve the fuel famine at Prosser.

SHORTS TO SAIL NORTH TODAY

Panama Chairman Ready to Receive Canal Contracts

PANAMA, Nov. 25.—Theo. Shonts, chairman of the Panama canal commission, will leave tomorrow for New York.

He will be ready to receive bids for canal contracts tomorrow morning. At Colon he will confer with all the chiefs of the department before sailing.

Access to Mineral Belt

A new railroad has been projected in Montana and may connect with the Northern Pacific at Twin Bridges, linking that road with rich mineral regions of Dillon and Beaverhead counties. The project has been launched by W. A. McCutcheon of Pittsburgh, president of the Gilmore Mining company of Gilmore, Idaho. The new line, as at present proposed, will extend a distance of fifty miles from Gilmore to Armstead, near Red Rock. The road will ultimately be extended from Armstead to Dillon, and perhaps later to Twin Bridges, to join with the Northern Pacific.

To Clear Blockade

ARKANSAS CITY, Kas., Nov. 25.—G. C. Starkweather, acting general manager of the Denver, Enid & Gulf road, has been sent to the Pecos Valley to help the officials of the latter line in clearing the freight blockade, which has reached alarming proportions. Starkweather has taken train dispatchers and operators from the Santa Fe to assist him.

Manager Emery Dies

By Associated Press. SAN JOSE, Nov. 25.—Richard F. Emery, general manager of the San Jose & Santa Clara electric railway system, died suddenly this morning of acute indigestion. He was a native of Baltimore, where the body will be taken for burial.

Railroad Notes

The New York Central lines are training apprentices in the railroad workshops. Each road in the system has its own organization. The boys are placed at actual work in various departments of the machine shops under the supervision of the foreman, and after learning the trade they are given good positions in the shops.

Many Kansas City people will be pleased to learn of the recent appointment of L. S. McClellan to the passenger department of the Southern Pacific in San Francisco, says the Kansas City Journal. Mr. McClellan until last spring was general agent for the Washburn in that city and spent the summer in North Dakota.

The passenger department of the Seaboard Air Line is handing out a novelty in the advertising line, it being a card with a thermometer attached and along with this a card of the traffic agent presenting it, with the legend on it "When it is zero keep a little cozy corner in your heart for the Seaboard," followed by a postscript, "When the mercury rises don't ask us to move."

An impression prevails among the traffic men that the proposition to charge 50 per cent a day for the delay of cars beyond the allotted time for loading or unloading will prove acceptable to a majority of the consignees and shippers. It is meeting opposition, however, on the part of roads which usually depend on cars of another line to handle their traffic, paying the per diem for the use of cars.

JURY SAYS DEATH ACCIDENTAL

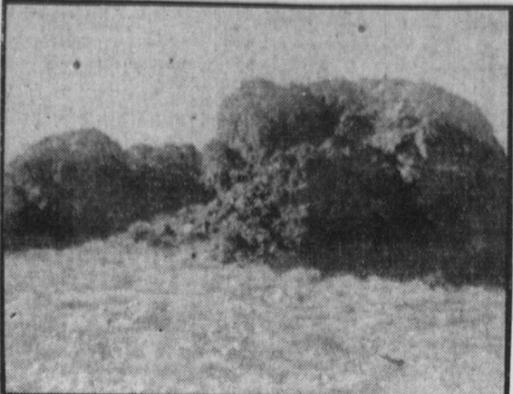

No Testimony Against Street Car Company Introduced in Coroner's Inquest

Coroner Trout and his jury yesterday returned a verdict of accidental death in the inquest held over the body of Judge Albert E. Cowles, formerly a member of the bench of Lansing, Mich. Although witnesses to the accident in which Judge Cowles was killed said at the time that the street car that had mangled the jurist's body was running at a high rate of speed and displayed no headlight, no testimony to this effect was introduced at the inquest yesterday. No one said anything against the street car company, and a verdict of accidental death was the result. Judge Cowles was killed Friday night near the corner of LaSalle and Adams street. The body was shipped to Lansing, Mich., at 8 o'clock last night, where it will be met by relatives.

EUGENE HIGGINS NOT MME. CALVE'S FIANCE

Special to The Herald. MARSEILLES, Nov. 25.—The suggestion that Eugene Higgins of New York was the fiance of Emma Calve, the singer, was denied emphatically by Mr. Higgins himself tonight.

\$100 Invested in MOHAWK at 4 Cents Has Earned \$41,400 \$100 Invested in MOHAWK JUNIOR at 4 Cents May Earn \$41,400

Just a Word About Goldfield in General

The past few weeks has witnessed the most excitement of any which has characterized the market since the early days of Comstock lode when Virginia was said to have sold for \$1500 a share on the San Francisco exchange. It is only natural that Goldfield should be the cause of the excitement at present, as Goldfield is in reality the continuation of the famous Comstock lode which gave to the world approximately \$300,000,000 in precious metal. The tremendous production of the Mohawk has started the world because every month approximately \$2,000,000 per month—\$24,000,000 per year, and this will probably be doubled within the next twelve months. Stock in this famous mine sold a short time ago at 4 cents a share and today it is selling on the exchange for \$17. The profits for the thirty-one days of October on eighteen of the Goldfield stocks was \$21,583,750. Not a single stock on the Goldfield list has failed to show a profit to the investor over the listing prices. Last week we listed the Daisy Extension at 6 cents a share, Saturday it sold on the San Francisco exchange at 7 cents and 8 cents a share, a profit to our investors of 16 2/3 to 33 1/3 per cent in three days. This is an actual fact that you may prove to your own satisfaction by asking any of the 500 men and women who bought this stock of us last week.

Our Bargain This Week

We are very glad of the opportunity to offer our clients stock in the Mohawk Junior at the rock bottom price of 4 cents a share. We are glad of the opportunity because we feel morally certain that it is an opportunity for you and for us to make money, and money makes glad the heart of every man. Up to the present time not a single share of the Mohawk Junior has been sold to the public, and we have decided to offer the first offering at a price so low that it will be almost impossible for any of its buyers to fall to realize the possible because every mining stock is a gamble pure and simple, no matter how great the percentage of chance is in favor of its winning. We are offering 100,000 shares at 4 cents a share, and we believe that every share of this stock will be sold at that price by Tuesday night. The second offering will be made at 5 cents and the third at 6 cents. As soon as the 300,000 shares are sold, this stock will be listed on the San Francisco exchange and we believe will immediately show profits to our clients the same as Daisy Extension is doing. We believe Daisy Extension will sell to 50 cents within 300 days and we believe that Mohawk Junior will sell to 40 cents within the same space of time. We believe this because we have been over the ground and carefully inspected it and know whereof we speak.

The Mohawk Junior Property

This property consists of three claims, "Nellie Bly," Nos. 1, 2 and 3, embracing 60 acres of ground, which is a third larger than the Mohawk and same size as Combination and the Daisy. It borders the Nancy Donaldson on the east and the leasers working on the Nancy Donaldson are said to have shipped ore assaying as high as \$200 to the ton and encountering a specimen ore that assayed \$53,000 per ton. There are three bold outcroppings of quartz on this property, one of which is undoubtedly the largest outcropping in the entire Goldfield district. This quartz is of the peculiar blue kind that characterizes the rich deposits in the Goldfield district and is identical with the quartz of the Mohawk. This ore assays on the surface \$4.33 per ton, which is a most excellent indication when it is remembered that this same kind of ore assayed 60 cents a ton on the famous Mohawk. This immense ledge of blue quartz dips into a porphyry dike that measures over 700 feet in width. Although this property at present is in its prospective stage, ore bodies of extreme richness will undoubtedly be encountered. It will give the stock of the Mohawk Junior a value at least ten times greater than it is selling for today. Property owned by this company is free and clear of all incumbrance and we believe the Mohawk Junior has an excellent opportunity to rival the developed Mohawk. The investors who bought this stock at 4 cents can sell it today at \$17 a share, a clear profit of \$41,400 on every \$100 invested. This statement is an absolute fact, and Mohawk Junior promises the same opportunity that Mohawk did a short time ago.

Only 100,000 Shares at Four Cents

We sold 400,000 shares of Daisy Extension at 6c in five days—now selling on the San Francisco Exchange at 7c and 8c, and will probably go to 60c in 200 days. Our past record indicates what we will do with Mohawk Junior. Will you join our party of money makers?

Organization and Capitalization

We have organized and promoted the following companies: The Goldfield Gold Elk, which shows our clients a profit of 500 per cent; the Copper Czar, which shows our clients a profit of 350 per cent, and the Daisy Extension, which shows our clients a profit of 33 1/3 per cent. We do not ask 25 cents to 50 cents per share for our stock and sell only 50,000 or 100,000 shares and keep the balance ourselves for promoting, but we sell from 400,000 to 800,000 shares and start the stock at rock bottom, giving our clients a chance to come in with us on the promoting of the company, receiving the promoters' profits, which are always the surest and the largest. Monday and Tuesday will see our first offering oversubscribed, so we advise all our old clients who have followed us from one company to another to wire or telephone their orders Monday morning so they may not miss this opportunity to buy at 4 cents. Hoping that we may be as successful with our new company as we have been with our previous promotions we beg to remain, Very truly yours, F. A. McDONALD COMPANY.

ISSUES CIRCULAR TELLING PLANS

Committee on Epilepsy Treatment Makes Public Appeal for Funds for Southern California Project

The establishment of a state institution for the treatment of epilepsy is being agitated in this part of the state by a number of prominent people and physicians. The Southern California committee on epilepsy is working hard to bring conditions to the point where the establishment of an institution here is certainly the best place for the treatment of the poorer classes.

"Whatever further action the committee may recommend, it will guard against drawing epileptics from other states to California by the establishment of an institution here. It will seek to make such an institution, if established, as nearly self-supporting as possible. The proposed institution would not be in any way objectionable in a community. It should be placed on such an area of land as to be removed from surrounding residences and the epileptics segregated under proper care.

Open Air Needed

"One-story buildings, which are suited to epileptics, avoiding falls on stairs and lessening the number of attendants necessary, are practicable in this climate. They are in easy access to the outer air, which is important for the sufferers. Real camp life for the class has never been tried.

Colony Plan Advised

"As you are aware, great advances have been made in recent years in the care and treatment of epileptics. It has been found that their welfare and that of the community is best promoted by providing special institutions for them on the colony or village plan. There are a number of such colonies in Europe and at least fifteen of our own states have made or are making colony provisions for indigent and semi-dependent epileptics. By means of colony life the condition of these persons may be improved and their capacity for self-support increased.

"There being in California no special provision for epileptics, representative citizens met on October 29, 1906, to consider the needs of this unfortunate class. At this meeting a committee was appointed to investigate and report upon the condition of epileptics throughout the state as a step toward bettering this condition. This committee asks you to cooperate in this humane and important work.

"It is expected that the committee will meet about December 10 and that the colony question for epileptics in this state will be discussed by prominent physicians and others interested in the subject.

"Dr. Ross Moore, a member of the committee, regarding epilepsys said yesterday afternoon: "Epilepsy is a disease that has many apparent causes. It does not run wholly in the line of fits as many suppose. The fundamental cause of epilepsys the physicians do not claim to understand. It must be realized that each case must be treated on its own merits.

Are Social Outcasts

"One very bad feature of the disease is that the person who is afflicted with it is practically a social outcast. People do not want him around even to mow their lawns for fear he will have a fit. This condition makes it impossible for him to earn his livelihood unless by menial labor. An epileptic child cannot attend school for the same reason.

"Many of the victims are people of high intelligence, and it is a great hardship for them to be treated as they

BOY DIES FROM LOSS OF BLOOD

Bullet Severs Artery in the Groin and Death Wins in a Wild Race to the Receiving Hospital

Henry Berger, 15 years old, the stepson of Harry Andrews, 2023 Huron street, was almost instantly killed yesterday afternoon by the accidental discharge of a rifle in the hands of a companion, Henry Bock.

The accident occurred late in the afternoon near the home of Chief Forester Beane, about twelve miles north of the city, in the vicinity of the Crescent.

The boys were riding in a light buggy and were returning from a day's hunting. Near the place of the accident young Berger got out of the buggy to cut a whip from a bush. As he was leaning over in the act of whittling with his knife the rifle, which lay on the lap of Henry Bock in the vehicle, was accidentally discharged.

The bullet pierced the right groin of Berger, and severed an artery.

Two men in a wagon behind the boys saw the accident and placed both lads in their vehicle to take them to the East Side station. News of the accident was at once telephoned to the receiving hospital and an ambulance arrived at the East Side station soon after the injured boy was taken there.

The boy's body was emitting a steady flow of blood from the severed artery, and the driver of the ambulance drove his horses like mad in an effort to get to the receiving hospital before the lad's life had been sapped by the constant drain from the wound. But the race for life was useless. While the boy was being taken from the ambulance at the hospital entrance the boy gasped his last breath.

The mother is now ill and at the hospital. Her husband notified her of her boy's death last night and her suffering was pitiful.

Henry Berger's body has been taken to Pierce Bros' morgue, where an inquest will be held upon it today.

MISSIONARY TELLS OF WORK

Shows Need of Spreading the Gospel to the Uttermost Parts of the Earth

"What Shall I Do?" was the subject of S. B. Kurtz, missionary to the Philippines, at the Y. M. C. A. meeting yesterday afternoon. He said in part:

"What shall we do?" was not a question only for the people in the time when Christ was on earth. Not only for the people, the publicans, the soldiers and others who came to John the Baptist at Jordan, nor yet alone for the crowds who gathered about the Lord, saying, "What shall we do that we might work the works of God?"

"There is no intellectual obligation and circumstances in which men find themselves the same question arises.

"In every day life, amid the complex relations and difficult problems, and in the sphere of our moral life too, the consciousness of spiritual obligations all press the same question upon our mind and often we utter the question aloud: "What shall I do?"

"Kant's three questions often confront us at the starting point of our greater activities: "What can I know? What shall I do? What may I hope?" We agree with a certain philosopher who divides Kant's last question into

CONDEMN AND INDORSE ROOSEVELT

Go Slow, Says Cincinnati

CINCINNATI, Nov. 25.—The congregation of Allen A. M. E. church, the largest and most representative negro congregation in Cincinnati, passed resolutions today disapproving of the denunciations of President Roosevelt for the summary action he took in regard to the 25th infantry affair.

The resolutions denounced those colored soldiers who by hiding behind their comrades made the latter suffer.

Texas Condemns President

TEXARKANA, Texas, Nov. 25.—At the state negro Baptist convention today lynching was condemned and President Roosevelt was censured for discharging the negro troops without trial.

Seattle Regrets Act

SEATTLE, Nov. 25.—As a result of President Roosevelt's recent act in discharging colored soldiers of the Twenty-fifth infantry for riotous conduct in Brownsville, Texas, the negroes of Seattle today passed resolutions

two, and makes it "What may I beget and "What may I acquire and enjoy?"

"These questions should be taken into careful consideration by every thoughtful man. Take them in their order and they make a study interesting and soul-stirring in view of the life of Christ and other great persons in history.

"What men say makes an impression upon the world of thought if the saying has some import and is recorded in life, in literature or in art. But what men do is a more definite test of character.

"Men do not find satisfaction in doing merely the things which relate to the four senses. Like the rich young ruler we are driven to the query: "What shall I do that I may inherit eternal life?" The spiritual man craves to be doing something, something which will last after we go on beyond this changing world.

"The doing of righteousness, or our religious life should be the most practical thing of our life. The best is offered us in following Christ, the savior and friend of men. He is and has always been active for our good. He beckons us all to ceaseless activity. When we wish to know what life holds for us he points us to his own example and with authority and unanswerable logic says:

"Follow me, I am the way, the truth and the life."

"Note the stability of Christianity and its morals. It is a power for living a better life, for doing the right and for hating the wrong. It sets forth an obligatory morality, and we know that if Christianity should die morally would die unless the doing of good should become in man, socially, politically and every other way a pronounced appetite, and we know that even while all the heaven bestowed agencies of Christianity are at work men will today break through the restraints and do wrong.

"There is no intellectual justification for wrong doing. It sets man in essential antagonism with God and man, and certainly mars the beauty and order of a glorious system.

"Christ is a great leader of men. He sets them to work and sees to it that no work is left unaccomplished in vain. It is to be taken into account for eternity. What you do to help men will appear in judgment.

"It is a good thing to get our work upon our nerves. We know that men have their business upon their nerves, the getting of houses, land and gold. But what are we doing securing an inheritance incorruptible, undefiled and that fadeth not away?"

LOoting in Kansas City

By Associated Press.

KANSAS CITY, Mo., Nov. 25.—The systematic looting of the Kansas City branch of the Montgomery-Ward company of Chicago has been discovered

and as a result a number of the employees have been arrested.

Epilepsy Fits St. Vitus Dance

Are nerve diseases, and unless checked, lead to destruction of both mind and body. The weak, shattered nerves must have something to strengthen and build them back to health.

Dr. Miles' Restorative Nerve is a remarkable nerve tonic and stimulant. It strengthens the nerves, relieves the nervous strain, and influences refreshing body-building sleep and rest. Persistent use seldom fails to relieve these afflictions.

"I was taken with epileptic fits; had eleven in less than 12 hours. My father sent for our family physician, but he could do very little for me, and I grew worse every day, and at last they had three doctors with me, and I still would not get better. My father heard of Dr. Miles' medicine and bought a bottle of Nerve and a box of Nerve and Liver Pills. I had taken only a few doses until I began to feel better. I took 12 bottles, and it cured me sound and well. It has been worth all the work to me. I recommend it wherever I go. You may use this as a life-long testimonial to the merits of your medicine, for I am enjoying the best of health and feel that my life and health is due to this wonderful medicine." LEVY WILLIAMS, R. F. D. No. 2, Boston, Ga.

Dr. Miles' Nerveine sold by your druggist, who will guarantee that the first bottle will benefit. If it fails, he will refund your money.
