The Iowa Society

Will Hold
Their Annual
Basket Picnic
on Thanksgiving
at Naples

The pavilion will be thrown open to the free use of the society.

Champion swimmers of the Multnomah Club, Portland, will compete in swimming races.

R. G. Dunnigan, Roy Dunnigan and W. W. King, gold medal winners, will row in single scull races.

Motor Boat Races

"Pirate" and "Peerless"

Both fivers will race for "Blood."

FIELD MARSHAL CATES IS ACTIVE

HEAD OF CRACKERJACK GOLD MINING COMPANY

Millionaires Multiplying at a Mad
Rate in Southern Nevada—
Review of Late De-
velopments.

"Southern Nevada seems to be multiplying millionaires at a mad rate, which is well, but I want to tell you as forcefully as I can that Southern California before long will rival her in the good work," declares Willis A. Cates, president of the Crackerjack Gold Mining company, the principal operator in the booming Crackerjack district, in the Avawatz mountains, San Bernardino county.

"Tributary to Los Angeles, practically at the door of this city, there lies in the Crackerjack district the best mining territory I have ever seen, and I have seen all of any consequence in the United States. The district may not be as productive of gold, alone, as Goldfield is apparently proving to be; then again, it may, for it is enormously rich in the yellow metal, but in the aggregate of values, its productiveness, I believe, will, under adequate development, excel even Nevada's wonder. I realize that this sounds like an extravagant statement, but I know whereof I speak.

Ribs of Mineral Wealth
"The Crackerjack district is literally ribbed with mineral wealth—gold, copper, silver, iron and lead. It is not characterized by a mere sedimentary formation, but by ledge and dike systems of great continuity and depth. I have seen some phenomenal pinnings of gold from many different properties; properties widely scattered, indicating that the district is widely and richly mineralized in respect to gold alone. In copper I am satisfied that the district is far superior to Greenwater, allowing all that the intelligently optimistic claim for that undoubtedly remarkable camp.

"The Crackerjack district is on the same mineral belt as Greenwater, the great lode that carries also Tonopah, Goldfield, Manhattan and Bullfrog, and in the line of development of that lode it will be the next to startle the world with its output of wealth. It is featured by large, well defined, iron-capped dikes carrying at the surface splendid copper indications. I think the copper ore bodies are as heavy as those of Greenwater, while they cover a greater area.

"There is one iron-capped dike traversing the district for over three and one-half miles and ranging from forty to 310 feet in width. This dike assays 9-10 of one per cent in copper on the surface and fourteen per cent at less than two feet of depth. Sounds big, doesn't it? But it is a fact, just the same.

Pushing Developments
The Crackerjack Gold Mining company is pushing its development work as hard as possible, three shifts of miners being employed. Our tunnels in the sixty-four feet. When we have driven

this tunnel in about 425 feet we expect to cut out what we are confident is one of the greatest copper ore bodies in the entire west. This ore body is indicated on the surface of one of our claims about 250 feet northeast of our main workings by an iron-capped dike thirty feet wide. The surface assays of this dike show two per cent copper; assays only five per cent this portion cut the dike the latter will undoubtedly be wider and assay many times what it does at the surface, but if it only assays five per cent this portion of the company's holdings in the district will, alone, be worth not less than \$1,000,000.

"Operations on an important scale are commencing on adjacent properties, especially those of Moore & Tomlinson, Beck & Wilson, Heath of Los Angeles and the Crackerjack Tomboy company. Judge Ray and associates and McCalla, all of Rhyolite, are beginning the development of fine copper properties. The district is attracting the attention of mining men very widely. Up to ten men a day are coming in to inspect properties with a view to investment. Many large Nevada operators have lately examined the district and are trying to tie up holdings. When I left three prominent mining engineers, representing big mining interests, were at the camp.

Official Inspection
"Several copper properties have recently been handed at handsome figures and work commenced on them. T. L. Henderson, one of Nevada's most eminent mining engineers, has just given the district an exhaustive inspection and expresses himself as more than pleased with its indications. With the rapid settling up of the district transportation is becoming a subject of important consideration and a narrow gauge railroad is contemplated from Silver Lake on the Tonopah & Tidewater railroad to the new town-site of Crackerjack.

Death from Exposure
"Weather! Well, I should say we have had it, and then some. No such snow storm as we had last week has been known in twenty years before. The cold was intense and at one camp we had fifteen inches of snow, while in the canyon at Cave Springs there were three feet. On November 23 Mr. Matthews of Daguerre died from exposure. Two of our men left the camp at 4 o'clock p. m. to go but a short distance, and as they had not returned by 7:30, I sent out a searching party, which found them wandering in a blinding snowstorm only half a mile distant, but as much lost as though they were ten miles away. One of the searching party was lost, also, and only found his way back through hearing shots fired for the purpose of guiding him. As a rule, however, the weather in that region is splendid."

WORKMEN SET A RIVER AFIRE

PITTSBURG, Nov. 28.—A machinist and blacksmiths' boat, the property of contractors constructing the series of government dams in the Ohio river, caught fire while moored at a dam near Coropopolis, Pa., and was burned to the water's edge.

The fire was caused by a fireman who threw a scoop of hot cinders into the river. This ignited oil on the surface of the boat. The loss on boat, tools and machinery is about \$10,000.

THANKSGIVING OFFERS MANY OPPORTUNITIES BESIDES FEASTING SPORTS OF VARIOUS KINDS FOR TODAY

Ascot Park Will Open Winter Season of Racing. Automobiles Will Enter Hill Climbing Contest—Women Will Play Golf for Vice President's Trophy

No citizen of Los Angeles need suffer from lack of amusement today, as programs of diversified and attractive features have been arranged at the different parks, theaters and places of amusement in the city, and with golf, tennis, harness racing, football and the opening of Ascot park, the day will be one when every person can find some place to go.

Although the residents of this city will so far follow in the footsteps of the Pilgrim fathers as to participate in turkey dinners, they will change to a great extent the other forms of amusement indulged in by the early settlers and instead of practicing with bows and arrows will his away to the race track to see blooded animals pitted against each other, to the football fields, or to the great automobile hill climb at Riverside.

Ascot to Open
Probably the feature which will attract the greatest attention will be the opening day's races at Ascot park. The fascination about a horse race which causes men to leave their desks and assemble around the judges' stand will, without doubt, be working with renewed strength today, and the track will be thronged with an eager crowd to witness the races.

The football enthusiasts this is the greatest day in the year, as the championship games are always played on Thanksgiving. This is true this year, when the University of Southern California and the Sherman Indians will meet at Fiesta park in contest for the championship of Southern California. College circles are showing the greatest interest in this game and thousands of rooters will be on hand to watch the struggles of the university men who feel confident they will be able to turn the tables on their hitherto successful opponents.

Another place which will be thronged with spectators is Agricultural park, for there the members of the Los Angeles Harness Horse association will entertain with matinee races, the first of the season. Each year the number of persons who attend the harness races increases and it is predicted the crowd today will be a record breaker.

The women golfers of the Los Angeles Country club will also have their innings this afternoon when the contest for the vice president's trophy is called. The women are taking great interest in this contest, which was only recently added to the number of attractive features of the sport.

There will be few automobiles in the city today, as the average autist will be on his way to Riverside, there to either participate in or watch the climb up Box Springs hill. This contest has been in existence only a little

over a year but has attracted a great deal of attention from motor enthusiasts.

Rowing will be the principal sport witnessed by those who attend the Iowa association's picnic at Naples, where Dick and Ray Dunnigan will compete against each other. Both men are famous oarsmen and the struggle will be a hard one.

Baseball games will be seen at several of the parks and the amateur and semi-professional teams will line up against each other. The newly organized winter league will play off three of the games on its schedule.

All the hotels in the city have prepared specially arranged menus. At the Alexandria, the Lankershim and the Angelus the dinners served will be the most attractive, while at the Hollenbeck a menu containing all the delicacies of the season and one such as has seldom been attempted in this city for the day will be served.

In the suburban cities the hotels have also arranged high class dinners, the one to be served at the Raymond hotel in Pasadena ranking with those served by the finest chefs in the land, while that which will be served at the Hotel Hollywood will also rank with the highest.

It is not necessary for the residents of this city who are away from home to go to these high-class hotels for a real Thanksgiving dinner, as even the cheaper restaurants have arranged to give patrons dinners such as are not served on any other day. Even those who cannot afford to go to restaurants will be made happy, as the charitable societies of the city have for days been preparing baskets of edibles to give to deserving poor families who are without means of purchasing the luxuries which are enjoyed by the remainder of the world. Members of the Salvation Army and Volunteers of America have for days been taking up subscriptions to be devoted to this cause, and since yesterday noon have been carrying well stocked baskets to needy families in all sections of the city.

GOOD GRUB TODAY FOR PRISONERS IN COUNTY BASTILE

There will be joy in the county jail today, joy because of the fact that Sheriff White has provided a magnificent Thanksgiving feed for the hundred or more prisoners now within the walls of the county bastille.

As a usual thing the inmates of the jail dine twice a day, while those prisoners who work on the chain gang receive three meals daily. The chain

gang will not work today and therefore but two meals will be served, the first being the ordinary substantial breakfast with a few fancy trimmings and the second a banquet at about two o'clock in the afternoon. At that time the prisoners instead of the regular fare of corned beef and cabbage or some kind of hash, will receive roast pig with apple sauce, cranberries, mince pie, several kinds of vegetables and plenty of fruit.

Many extra delicacies and a new supply of tobacco were handed into the jail yesterday by relatives of the prisoners.

CHARITY WORKERS PLAN TO FEED MANY POOR PEOPLE

A true Southern California Thanksgiving will be celebrated today with turkeys and all the other good things. In place of snow and ice there will be green grass and flowers, but the traditions of the day will be observed. Yesterday Salvation Army lads and lassies worked hard way into the night preparing the baskets of food for poor families. It is expected that over 100 baskets containing all provisions for a good meal will be distributed today which will reach about 1000 people. The baskets will be distributed this morning at 130 South Spring street.

Poor mothers and children will be cared for by the Volunteers of America with a bountiful dinner at the headquarters, 128 East First street. The dinner will begin at 11 a. m., and those participating will be cared for in delays. Music will be rendered to cheer the waiting ones.

UNION SERVICES WILL BE HELD IN MANY CHURCHES

Perhaps one of the most interesting features of the day will be the Fellowship dinner at the Bethlehem institution, which will be participated in by all nationalities and will be like a family dinner.

The early part of the day will be occupied with religious services. In the different sections of the city union services will be held in Temple auditorium, at which Rev. Robert McIntyre, pastor of the First Methodist Episcopal church, will preach the sermon.

PRISONER TRIED BY PHONE

CHIPPEWA FALLS, Wis., Nov. 28.—John Hendricks, a farmer, went to Tarent and while there got into a quarrel with the village marshal and knocked him down. Hendricks then drove home and went to work. Later in the day Hendricks received a telephone message that a warrant had been sworn out for his arrest. He told the justice of the peace to hold the trial over the phone, as he was too busy digging potatoes to come to town. Hendricks was convicted and informed the justice that he would send the fine tomorrow morning by the rural mail carrier.

SHERMAN CHURCH IS DEDICATED

BISHOP CONATY OFFICIATES AT CEREMONY

Beautiful Edifice Given by Victor
Ponet and Named After Patron,
Is Scene of Impressive
Services

Rt. Rev. Bishop Conaty officiated at the dedication of St. Victor's church at Sherman yesterday morning, assisted by twenty-five priests of the diocese. The church, which commands a slightly view, together with the ground and furnishings, is the gift of Victor Ponet, after whose patron saint it was named.

Bishop Conaty was assisted by Rev. C. Molony as arch-priest, Revs. Joseph Barron and Edward Landry, C. M., as deacons of honor, and Rev. J. A. Reardon, master of ceremonies to the throne.

A procession was formed, the bishop blessing the walls of the building during the chanting of the Miserere.

Rev. P. G. Gay and T. P. Fahy chanted the litany. Solemn high mass was celebrated coram episcopo, Very Rev. Dr. Glass, C. M., celebrant; Rev. G. G. Freund, deacon; Rev. W. J. Gorrell, C. M., sub-deacon; Rev. T. J. Conaty, master of ceremonies; Master Leo J. Murphy, thurifer.

The mass was sung by the choir of the Blessed Sacrament church under the direction of Rev. D. W. J. Murphy, pastor of the church. As offertory "Abe Maris" was rendered as a 'cello obligato by G. Allan Hancock.

TRAIN KILLS A MISER; SCATTERS GOLD A MILE

BALTIMORE, Nov. 28.—Crowds are out along the Northern Central railway, near Ashland, picking up five, ten, fifty and hundred-dollar notes and gold coins, which were scattered for a mile along the tracks when a train killed Calvin S. Harlan today.

Harlan was a Quaker, and as he did not believe in banks, carried money in all his pockets. When he was hit by a train this morning he and his buggy were carried on the pilot of the engine to Cockeysville before the accident was discovered.

One passenger found a roll of bills containing \$5000 wedged between two rocks in the Gunpowder river, and wading out, secured it. Others picked up notes of various denominations all along Mr. Meyer, and the station agent at Ashland has found \$5000 along the roadside.

NEWS DIRECT FROM MINES

Good Showing for Standard No. 2 at
Cima—Find Valuable
Ore

William M. Fee, superintendent of the Standard mines at Cima, is in Los Angeles and will remain until the last of the week with his family. Mr. Fee brings most encouraging reports from the Cima district, and especially from the Standard No. 2, where development work is going steadily forward. The main shaft is now down to 250 feet and the company now has a branch office at 312 South Broadway, and the force there as well as at the main offices in the Pacific Electric building keeps busy attending the many who call to investigate the proposition. The General Securities company is the fiscal agent for Standard Mines No. 2.

HOOSIER GAS WELLS ARE COMING IN AGAIN

Special to The Herald.
MUNCIE, Ind., Nov. 28.—In further confirmation of its belief that natural gas is constantly generating and will be abundant in the State of Indiana for many years yet, the Heat, Light & Power company of Muncie, which has been investigating its mains and putting in extending its gas plant for more than a year, is now preparing to expend \$50,000 in the construction of immense gas reservoirs.

The details of this improvement will be taken up this week on the arrival in Muncie of George J. Marrott, the Indianapolis gas engineer, who has been called to Muncie to advise on the so-called failure of natural gas, to improve the equipment of his company, and to reach out after new gas wells. His theory that the pressure would increase as soon as the factories quit using gas fuel has been borne out. Many gas wells have tripled in pressure in the last two years.

A co-operative gas company owns three wells near Eaton. A year ago the best well had a pressure of nine pounds, as recorded by the gauge. The same well now has a pressure of thirty-two pounds and the other wells have increased in pressure proportionately.

More persons are using natural gas for heating than ever before. A year ago the best well had a pressure of nine pounds, as recorded by the gauge. The same well now has a pressure of thirty-two pounds and the other wells have increased in pressure proportionately.
