

STATE HIGHWAYS FOR GOOD ROADS

MOVEMENT STARTED HERE IS GAINING FAVOR

Measure Already Prepared Will Be Read at Meeting Saturday in the Chamber of Commerce Assembly Room

There is a possibility that the good roads movement started in Los Angeles two weeks ago will develop into a state affair at the second meeting of the association, to be held Saturday morning at 10 o'clock in the assembly room of the Los Angeles chamber of commerce.

Reports received by promoters of the movement indicate that interest in the project has extended throughout the state and that a number of delegates from cities in Southern California will be present at Saturday's meeting.

The committee of three attorneys having in charge the drafting of a suitable bill have practically completed their work, and the measure will be read at the coming meeting.

F. W. Blanchard, chairman of the committee on legislation, said yesterday: "The bill, if passed, will benefit the entire state by giving all the counties equal privileges. It will provide for the appointment of a county highway commission, the sole duty of which will be to construct and maintain new roads. The commission will pay no attention to crossroads or do any of the work now done by the supervisors, but will devote its time to the construction of a system of main highways."

"The bill probably will recommend the construction of 250 miles of macadam road, the location and distribution of it to be decided before the bond election is held. It is estimated that the amount of road can be constructed with the money derived from the \$3,000,000 issue proposed."

Many Invitations Sent Out S. A. Butler, president of the temporary organization, said yesterday that invitations had been sent to every civic and commercial organization in Southern California to send representatives to the next meeting, and he expressed his belief that the movement would develop into a state wide affair.

Mr. Butler continued: "Governor Gillett assured me he would do everything in his power to further good roads along good lines, and that he would work for the passage of a suitable bill. The legislature, I believe, will consider such a bill favorably."

"It is all important that we hasten the legislation and I intend to suggest to the conference Saturday that one or more persons be selected to go to Sacramento and push the bill."

"We want to keep this movement out of politics, and it may be arranged to have the proposed highway commission appointed by the court. We must guarantee the people that the bond money will be put into the hands of competent road men and expended wisely and honestly."

VETERAN DES OF HIS INJURIES

Philip Kelly, the aged man who was so injured by being run over by a Santa Fe locomotive January 21 that he is recovering from the physicians at the receiving hospital to amputate his feet and hands, died at the county hospital yesterday morning.

Kelly was an old soldier. For several years the man lived at the Sawtelle "widow's home," but about five months ago left that place to take a position as a marble cutter.

The operation at the receiving hospital was the first one of the kind ever performed in California. During the illness only two operations of a similar nature were performed, and in both cases the patients died.

Even after the operation Kelly felt confident he would live and made many plans for the future. The physicians at the county hospital watched the case fully, but said if anything would save the man's life it would be his hopefulness and confidence that he would not die. He grew weaker each day, however, and late Tuesday night called the physicians to him and told them he wanted to be buried with his wife.

Kelly's body will be removed to the Sawtelle home and the funeral will be held from there Friday.

FRANK STADLER CASE IS CONCLUDED AT LAST

Frank Stadler pleaded guilty to a charge of running a "blind pig" when his case was taken up in Police Justice's court yesterday.

Stadler was arrested about a year ago on a charge of violating the liquor ordinance. Every time the case was called Stadler or his attorneys asked for a continuance.

Combination Suits

Better ones—not necessarily higher priced, but better fitting—and because better fitting better wearing.

A suit that "draws," is "short in the body," is an abomination, a destroyer of bodily comfort and a good disposition. Silverwood's for better suits—just snug enough—just right.

Two styles—ankle length, long sleeves; knee length, short sleeves. Mercerized list, Egyptian cotton, worsted, \$1.50 to \$5.00.

WILL PRODUCE SNOWY MARBLE

NEW COMPANY PROMISES A GREAT ENTERPRISE

Plans to Open a Mountain Where the Precious Stone Lies in Almost Inexhaustible Quantities—Other Products Contemplated

Southern California is to have another gigantic manufacturing and industrial enterprise. It comes in the form of the White Water Marble, Power and Development company, which is being organized by local capitalists in and about Los Angeles.

This mountain of marble has been held by conservative men until such a time as the demand for the materials at hand would be needed. It is seemingly strange that such a great mountain with its possibilities should exist so near to Los Angeles and not have heretofore been exploited.

It is a great mountain 750 feet high at an angle of forty-five degrees, that has a stratum of pure white marble over a mile in length, starting at the base of the mountain, going to its highest elevation, and then down on the other side.

Experts say there are unlimited possibilities—a thousand years of work on such a mountain would not quarry out the supply of marble there deposited, and now for the first time it comes to the public light.

Marble Most Precious Pure white marble has been a scarcity in this country for years, and most of it has been imported from Italy at a prohibitive expense, and now Southern California will enjoy the distinction of being the only section in America that can offer to the world an unlimited supply of this valuable stone.

The company proposes to incorporate a marble plant a lime and brick factory, lime kilns, granite and marble quarry, and a cement plant, together with adequate power plant derived from water power that exists in their immediate neighborhood, sufficient to supply power for their present needs and later on to further develop it to the extent of supplying San Bernardino, Riverside, Colton, Bloomington and other adjacent towns with electric light, or power for their electric railways.

Reside the great quantities of marble that exist here—millions of tons of the finest sand exist at the base of the hill, which is owned by the new company taking over the marble property.

Also to Make Glass With this sand glass will be manufactured, sand and lime brick, sand-lime brick having come into great favor during the last few years as a factor in building. Its strength, uniformity of size and its fire surface make it very practical for building purposes, and can be manufactured at a cost of about \$5 to \$6 per thousand, the present selling price ranging anywhere from \$25 to \$40 per thousand.

The German government for years has been using sand-lime brick in the erection of government buildings. Also, the American government has seen fit to build their barracks of the sand-lime brick, thus guaranteeing the stability of this brick.

The lime kilns will be erected for the furnishing of lime for the brick factory, and later on lime will be shipped as an industrial proposition in connection with this new company.

The glass factory will add a unique feature to Southern California, and make itself very profitable, as the demand at the present time is greater than the facilities for getting the supply here. Cement being the great factor of the age in construction work, will naturally be the main product of this new company. Cement today is selling at a high price, while the manufacturing cost, providing the facilities at hand, is very low, thus offering a good profit to any one who goes into this venture, though it requires a great deal more capital to erect a cement plant than it does any other industrial.

The new company expects to establish a brick plant that will turn out 20,000 bricks a day at a cost of about \$20,000, the plans and specifications for this plant having been already gotten up.

CATCHES BURGLAR WHILE AT WORK

Patrolman Nelson Follows Frank Morris into a Store and Nabs Him Just in Time

Frank Morris, said by the police to be a burglar who has been looking for a job, was arrested by Patrolman Neelon early yesterday morning and booked on a charge of burglary.

According to Neelon he saw Morris force an entrance into the grocery store of James Mitchell, Fifth and Crocker streets, and rob the cash register.

Neelon was walking along Fifth street when he saw a man acting in a suspicious manner and crouching in the shadow of a building. The patrolman removed his star and donned a cap he carried in his pocket.

While the officer was awaiting the arrival of the wagon A. B. Werner approached, and Neelon became suspicious of his actions. He stopped Werner and asked his business and why he was on the street at that hour.

Werner could give no satisfactory reply, so Neelon took him to the police station and there Morris was released yesterday, as no charges were made against him.

According to the police, Morris is well known as a crook. It is said he served a term in the city jail on a charge of carrying concealed weapons last September. At that time Morris was found to have a bunch of skeleton keys, a mask and a revolver in his pockets when arrested. The officers are confident he is guilty of several of the recent robberies.

WOMEN'S CLUBS

Gives More Paintings to Club Mrs. Henry Wilson Hart yesterday presented to the Ruskin Art club two more paintings from her fine collection, one by Elmore Wachtel and the other by Marian Cavanaugh Wachtel. Both are in oil and very handsome.

Today the club has planned to entertain with a reception and tea at the club room in the Blanchard building in honor of Mrs. Hart, who will leave shortly for New York and Paris. Mrs. J. W. Hendrick will be assisted in her duties as hostess by Mesdames Alexander Caldwell, W. M. Dixon, I. L. Hibbard, W. H. Housh, G. L. Washburn and Misses A. E. Wadleigh and Victoria Winter.

A musical program will be given during the afternoon and Mr. Bernstein will have on exhibition a number of his pictures that have never before been seen in Los Angeles.

Yesterday morning at the regular meeting of the club Mrs. J. B. Owens and Miss E. Wadleigh were in charge. Mrs. W. S. Bartlett gave a talk on the origin and function of public squares in cities and gave detailed descriptions of squares in Venice, London and Boston.

The club appointed a delegation to go to Sacramento to grow an Arbor Day plant tree which should be named after Mrs. H. H. Boyd.

Pass First Day Successfully The first day of the annual convention of the State Federation of Women's Clubs at Bakersfield yesterday was eminently successful. The members of the state federation executive board met at 9:15 in the morning, and an hour later the executive board and the presidents of all the organizations in the federation, who comprise the council, convened. During the morning the delegates and alternates were met by the members of the credentials committee, who include Mrs. Mary R. Green, Watsonville, San Francisco district; Mrs. C. J. Haas, Stockton, Alameda district; Mrs. J. S. Jones, Fresno, San Joaquin district; Mrs. J. M. King, Banning, southern district, and Mrs. Andrew T. Stewart, Los Angeles, Los Angeles district.

The subjects under discussion during the sessions were: "Are High Schools and Sororities Delinquent?" "Should Women be Permitted to Vote on School Questions?" "Free Kindergartens?" "The Grade Work in the Public Schools Too Difficult for the Mind of the Average Child?" "Should Sewing Be Taught in the Public Schools?"

In the evening the members of the delegates and alternates were met by a reception to the visiting women. Today the nominating committee will meet and the momentous question of who shall be president will come up.
