

The Granite Contact Mines Company

Capitalization 1,250,000 Shares. Par Value \$1.00

Treasury Reserve 500,000 Shares for
Development Purposes Only

All of the officers are well-known residents of the Bullfrog Mining district, whose integrity and ability as mining and business men can easily be investigated; they form a combination which assures every stockholder that no honest, intelligent effort will be spared to make the GRANITE CONTACT A HUGE SUCCESS. By no means the least consideration with any stock offering is the MEN who are AT THE HEAD OF THE ENTERPRISE. A HIGHLY MERITORIOUS MINING PROPERTY, CONSERVATIVE MANAGEMENT AND A SQUARE DEAL constitute the basis on which the Granite Contact proposes to make money for its stockholders.

The Granite Contact Property Joins the Great Skidoo Mines

on the north. The Contact Group consists of seven full claims, having the same general formation, the vein matter and mineralization of the same general character as the Ramsey-Thompson strike known as the Skidoo mine.

**Four Feet of \$100 Ore Has Been Proven Up
on Claim Number 2, and on Number 3 There
Is a Solid 12 Feet High Grade Milling Ore**

The Granite Contact property has Six Gold Bearing Quartz Ledges, all well defined, having widths varying from two to twenty feet. The ledges have been opened and values proven on the surface for upwards of 600 feet in length. Assays run from \$8.60 to \$900.

Officers and Directors:

President—JOHN W. SELLER, Mine Operator, prominently identified with the Bonanza Mountain and Black Spar companies and locator of the Rush.

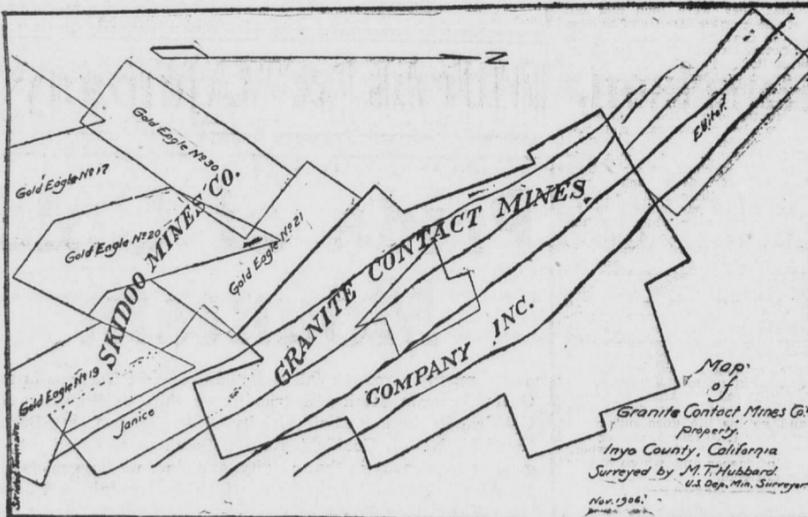

Vice President—CLAY TALLMAN, Attorney-at-Law, Rhyolite, Nevada.

Secretary—J. J. FAGAN, Pioneer Broker and Real Estate Man of the Bullfrog District.

Treasurer—G. B. KEENAN, Cashier of the Bullfrog Bank and Trust Co., Rhyolite.

Director and Superintendent—A. V. CARPENTER, Mine Operator, associated with President Seller in numerous mining enterprises.

All of the above named are well-known residents of the Bullfrog Mining District whose integrity and ability as mining and business men can be easily investigated. They form a combination which assures every stockholder that no honest, intelligent effort will be spared to make the GRANITE CONTACT a huge success. By no means the least consideration in connection with any stock offering is the MEN WHO ARE AT THE HEAD OF THE ENTERPRISE. A HIGHLY MERITORIOUS MINING PROPERTY, CONSERVATIVE MANAGEMENT AND A SQUARE DEAL constitute the basis on which the GRANITE CONTACT proposes to make itself a winner.

Fifty thousand shares were first placed on the market at 15 cents a share. This offering was quickly subscribed for, mostly by local people, and a second allotment at 18 cents quickly followed. A 20-cent allotment was largely oversubscribed. A limited amount of stock is offered at 25 cents.

Advantageous Location

Within a twelve-month no camp on the desert will be better supplied with all the essentials for economical and practical mining than the Emigrant Springs section of the Panamint. The ores are mostly free milling. The Skidoo company has the pipe on the ground for its 8-inch 24-mile pipe line from Telescope Peak to the mines, furnishing an ample water supply for milling and domestic purposes for the entire district. Telescope mountain is covered with an abundance of timber suitable for mining uses. The climatic conditions on the summit of the Panamints are ideal for year-round mining. MOST OF ALL, A RAILROAD INTO THE CAMP is promised within a year; Mahomet is going to the mountain where the gold is found.

The GRANITE CONTACT is less than a half mile from the Montgomery Townsite, which will be the center of milling operations, and the property is so situated as to receive the benefit of all the advantages herein enumerated.

The Opportunity Herewith Presented

Not a SINGLE REPUTABLE BULLFROG STOCK has failed to make money for those who invested early, when the first issues of stock were disposed of at nominal prices. MANY MADE FORTUNES; more are kicking themselves for not taking advantage of the opportunity. THE SAME OPPORTUNITY IS AGAIN PRESENTED; a strictly high-grade property with an unexcelled surface showing, situated in a new camp with proven enormous ore bodies carrying phenomenal values, where the foremost mine operators of Nevada are carrying out an aggressive program of development. This is the proposition. The Opportunity is HERE and NOW.

There Is Every Indication That Granite Contact Stock Will Be in the Dollar List Within 6 Months

PROGRESS AND DEVELOPMENT. Schwab, Montgomery, et al., are the most active operators at present; \$115,000 cash was paid for the Skidoo group before a foot of development work was done. More than this amount was already exposed on the surface; 317 taken from the multitude of veins gave an average of \$82 per ton. Two general samples taken by the writer from a 3-foot vein about 4000 feet in length and from 2 1-2 foot vein 2000 feet in length, ran \$486 and \$86 respectively. There is undoubtedly more free gold in sight here on the surface than in any other camp on the desert, more work is being done and more money expended on this property alone, during the two months' ownership, than during the first six months on any property in the Bullfrog district.

This company has installed and in operation a 200-ton mill, supplied and run by water from its 24-mile 8-inch pipe line. No company has been organized on this property. The partners contributed \$250,000 to the treasury. This is absolute proof of the implicit confidence of these well-known operators in the future possibilities of this great district. Bob Montgomery has said unequivocally that the Skidoo mines far outrival the justly famous Shoshone Bonanza.

Senator Nixon, George Wingfield, John W. Seller, A. V. Carpenter, L. M. Sullivan and the Patricks are but a few of the other Nevada operators now taking hold.
