GETS TWO YEARS ON FATHER'S CHARGE MERRIMAN, WITHOUT COUNSEL, PLEADS GUILTY Confesses to Theft of Lens and Purse from Photo Studio—Committed to Crime Before Leaving for Mother's Home

Edward Merriman pleaded guilty to grand larceny in Judge Wilbur's court yesterday and was sentenced to two years' imprisonment at San Quentin.

Merriman was accused of breaking into the photographic studio of Charles Hartman at 202 Mercantile place and stealing a lens valued at \$155 and a purse containing \$215 belonging to a patron of the studio. He was arrested at Albuquerque, N. M.

Detective Hosiak testified that Merriman had confessed and that the lens had been recovered.

A few days before the theft Merriman received a ticket to Chicago from his mother, who lives there. His father is employed by Hartman and both rooms in the same building.

The prisoner told the court a rambling story of having gone to the place to get a valise, and having left the room for a moment to bid his father good-by by the door closed and locked with his key on the inside.

Without explaining how or why he took the lens he attempted to relate his experience in the town where he was apprehended, claiming the officers had another man in custody, and that he had admitted the charge so the other man might go free and continue his trip eastward.

Judge Wilbur interrupted him to pass sentence.

"KING OF SAFE CRACKERS" SOUGHT IN LOS ANGELES Edward Quinn, an Escaped Convict, Whose Name Has Been Synonymous with Theft, Is Wanted in Illinois

A hundred dollars reward has been offered for the return of Edward Quinn, alias R. A. Vance, who has escaped from the Illinois state penitentiary and is thought by the Illinois police to have come to Los Angeles.

Quinn is 47 years of age, five feet 5 1/2 inches high, has dark hair mixed with gray, fair complexion, hazel eyes and wears glasses. His picture has been sent to the Los Angeles police in order they may keep a lookout for him. He escaped from Joliet August 25.

Quinn is known as "the king of safe-breakers." So great is his reputation in the East that the people speak of "quinn" things rather than stealing or safe-breaking.

HURT IN COLLISION, ASKS THOUSAND DOLLARS DAMAGE Peter Backman Wants Redress from Los Angeles Railway Company for Injuries and Broken Wagon

Peter Backman bought suit yesterday against the Los Angeles Railway company for damages received in a collision between his wagon and a Conella avenue car.

The plaintiff alleges that as he was driving on Moneta avenue near Forty-second street on October 15, 1906, a car came suddenly around the corner and crashed into the wagon, throwing Backman from his seat, painfully injuring him.

The complaint declares the accident was caused by the carelessness of the motorman, who, Backman avers, made no attempt to stop the car.

For a doctor bill of \$675 and damages to the team and wagon amounting to \$225, he asks \$1000 damages and costs.

DEALER IS FINED \$25 WHEN ARRAIGNED IN JUSTICE SELPH'S COURT YESTERDAY, J. W. Waddington pleaded guilty to the charge of selling and offering for sale milk that contained less than 3 per cent of butter fat and less than 8 1/2 per cent of solids other than the required fat.

He was fined \$25. Waddington is a Santa Monica milkman, and the prosecution was the result of an investigation made by J. L. Starr, state dairy inspector, who swore to the complaint.

PTOMAINE POISON IS BUT LITTLE UNDERSTOOD Poisons by ptomaines probably is as little understood as any of the common ills that befall man, says the California Fruit Grower.

Not frequently found in canned vegetables. Hebrew Ancients Knew Its Dangers and Deuteronomy Forbade Eating Anything That "Dieth of Itself"

Throughout the entire scientific world recently special attention has been paid to the subject of ptomaine poisoning for the purpose of preventing its occurrence. Professor S. C. Prescott of the department of Industrial Biology of the Massachusetts Institute of Technology has given to the world lately much valuable information concerning his experiments.

Cause of Ptomaine Ptomaines are produced by the combined action of hundreds of minute organisms—the so-called putrifying bacteria—and are found in the foods eaten by all humanity except the vegetarian. Ptomaines therefore are virtually as many in number as the different animal food products.

The word ptomaine is derived from the Greek word for corpse, the first ptomaines having been discovered in bodies. The name was suggested in the early 80's by an Italian scientist. The ancient Hebrews knew the danger from this source, and one of the commandments in Deuteronomy is: "Ye shall not eat anything that dieth of itself; thou shalt give it unto the stranger that is within thy gates, that he may eat." Which was a valuable safeguard for the "chosen," but a little rough on the other fellow.

Food poisoning may be caused in various ways, the substance most commonly affected being meat, sausage, fish, milk and cheese, in which bacterial action produces ptomaine poisoning readily. These bacterial changes usually take place in the flesh before it is cured or cooked.

Portion of Cost of New Office Will Be Charged Against Jobs Where Testing Is Done Under City Engineers

One of the important questions in connection with the public work under the department of the city engineer is the quality of asphalt used by contractors for paving purposes.

For nearly a year the city engineer has been subjecting samples of asphalt and asphalt paving mixtures to chemical inspection.

This work has been done as a branch of the inspection service and all charges outside of certain small expenses for apparatus and chemicals have been borne by the jobs under construction.

The chief engineer finds, however, in order to give the best results, certain general work must be done, which work cannot be charged against jobs, and for which the city engineer has no means of paying.

To enable this work to be done the board of public works yesterday requested the city council to create the position of asphalt tester at a salary of \$4.50 per day, this position to be in addition to other positions now created in the department of the city engineer.

As is the case in other engineering work, the larger portion of the expense of this inspector will be charged against the job for which this service is rendered and thus the expense to the city will be light.

The work is of great importance, and it is the opinion of the board that changes already made in the quality of asphalt used as a result of such testing will save the city thousands of dollars in asphalt repairs in years to come.

SAVES CITY THOUSANDS IN ASPHALT REPAIRS OFFICIAL TESTER IS PROPOSED BY BOARD

EPES RANDOLPH SUED FOR \$175,000 STOCK 3000 SHARES CANANEA COPPER INVOLVED Lycurgus Lindsay Asks Recompense for Purchase of Greene's Option from Railroad Man—Could Not Get Paper

Lycurgus Lindsay has appealed to the courts to aid him in gaining possession of 3000 shares of the Cananea Copper company stock, valued at \$175,000.

In a complaint filed yesterday it is set forth that prior to August 10, 1906, W. C. Greene was entitled to purchase any number of shares of the company's stock up to 10,000. On that date he sold his option to Lindsay and Epes Randolph, railroad man and millionaire copper king of Arizona. Greene received \$50,000 in cash, the agreed amount.

On August 15, 1906, Lindsay alleges, Randolph sold to the plaintiff all his right and title to any part of the option. The deal was consummated at Tucson. When Lindsay applied to the company for the 3000 shares he wanted he found Randolph had ordered the company to deliver the stock to no one but himself.

After repeated efforts to get the stock he has brought suit against Randolph.
