

PART III ANGELS PURSUED BY LOSING LUCK

SACRAMENTO LEADS AT EVERY STAGE OF GAME

CHAMPIONS DEFEATED AFTER HEAVY STICK WORK

Locals Outbat Senators, Getting Three Doubles, but Hoodoo Clings Fast and Northerners Nose Out at the Wire

Sacramento 3, Los Angeles 2

If ever a team had harder luck than Frank Dillon's champions of the season past have experienced in several games this year their troubles have never been set down in print. Yesterday's game with Sacramento at Chutes park was the hardest one to lose the local fans have seen this season. Five times during the afternoon the score looked close to a tie and twice it seemed as if the Angels could not be prevented from scoring two runs and assuming the lead. After outbating the Senators, the Angels stranded a half dozen men on third, had three caught at the plate, and finally managed to squeeze in two tallies, though it took all the night's feet possessed by the entire Angel brigade swinging their combined potency into line at once to bring over the two scores.

Beal got two doubles and Hosh cracked out another one, but this made little difference. The Fates had set it down that the game played under the soft southern sun on the eighth day of our Lord, nineteen hundred and nine, should go to the lads from the Capital city, and no amount of lucky hitting or good fielding could prevent it.

Brown Sticks It Out In the face of a heavy rapid fire of hits from the skirmish line of the champion, Pitcher Fred Brown stuck to his guns and with splendid support from his teammates pulled out a bod hole into a victory. He rallied at critical points, brought up his reserves, and when the last play was made he had routed the enemy—meaning our warriors—in impressive style.

After two fairly quiet innings Sacramento woke up and pounded Hosh for three hits. Zamlock and Graham singled neatly, placing Zamlock on third. On Brown's sacrifice Zamlock scored, and a moment later Shinn swatted the ball hard for a two-base hit, sending Graham to the plate. Doyly bunted to Hosh, and Graham slid under Ross, who was prepared to catch him at the plate. Although Beal doubled in the next inning, the Angels got and got to third, the hopes of the locals for a score were disappointed when the Chicagoan was caught at the plate. Brown scored on a sacrifice hit, and the fourth on his single and Flanagan's double and Ross repeated the old trick of a fake throw to second, catching Flanagan, who was between third and home, between the bags, when he shifted the ball to Hosh. This concluded the scoring for Sacramento. With three runs ahead of them, the Angels singled up, and in the seventh and eighth two Senators crossed the pan. Judd Smith scored on his single and a repeater by Hosh, and in the eighth Beal came home on his own double, the second of the game, and Smith hit singled over first.

Los Angeles endeavored to bring over the winning run in the last inning. Ross went out on a pop in front of the plate. Hosh singled again, Daley took the Raymer-Beal sacrifice, and Graham closed the chapter by flying out to House. The tabulated score:

Table with columns for Los Angeles and Sacramento, listing players and their statistics (AB, R, H, SB, PO, A, E).

Notes of the Game Hosh had everything with him in the batting line yesterday and hit Brown all over the field. The fast little pitcher made a record, getting four hits out of four times at bat.

Beal got his usual double yesterday in the fourth and came right back with another in the eighth. The batting record of the Windy city wonder now stands: Thirteen hits, six of them doubles, in five games. Enough said.

Yesterday was kids' day and the boys were happy when the doubles were lined out. They kept up a continual round, and this statement of Henry Berry vouches. It was an enthusiastic crowd as well, and the Pasadena ball movement seems to have been rather a boost for the local game than otherwise.

Several times an Angel reached third to die away into nothing. It was a hard luck game for the locals all the way. Good fielding abounded.

The largest crowd that ever turned out at Chutes on a Saturday was present yesterday, and this statement of Henry Berry vouches. It was an enthusiastic crowd as well, and the Pasadena ball movement seems to have been rather a boost for the local game than otherwise.

Oakland Finally Wins From Hogan's Vernonites W. Hogan Makes Longest Home Run on San Francisco Grounds with Hard Drive Over Fence

SAN FRANCISCO, May 8.—Oakland proved an easy victory today in a one-sided contest, winning their first game in the present series with Vernon by a score of 7 to 1. The feature of the game was a home run by Hogan in the seventh, whose drive over the center

STOCKTON, May 8.—A double by Miller in the opening inning gave Stockton such a lead that San Francisco never overcame it. The game was clinched in the eighth. Score: Stockton 6, hits 8, errors 2. San Francisco 3, hits 8, errors 4. Batteries—Hoag and Hackett; Cooper and Burke.

CAMBRIDGE, Mass., May 8.—Harvard defeated Dartmouth in the track meet, 29 to 25.

Monrovia High School Baseball Team Which May Win Suburban League Banner

Left to right, top row—Shepard, Harvey, Captain Brown, Renaker, Or and all. Middle row—Glenney, Boyd, Cornes. Bottom Row—Dismuke, Schultz.

MONROVIA HIGH IS PLAYING FAST BALL

Three One-Sided Victories Testify to Class of Youngsters Who Have Won Every Game Played This Year

With a present standing of 1000 in the Suburban league Monrovia high school is looked upon as a likely winner in the race for the pennant. Monrovia has won her three league games on the enemies' territory by the following scores: Glendale, 14 to 2; Bonita, 15 to 4; Citrus, 29 to 7. Covina is the only other school which shows a 1000 average. Crandall and Dismuke have been twirling major league ball for the football players, but three games having been lost during the entire season. Harvey on first base and Shepard at short have likewise been doing excellent work, playing many errorless games.

The batting of the entire team is greatly improved over that of last year. Rev. Mr. Bradford of the First Christian church being coaching, and a marked improvement has recently been noted.

SAN FRANCISCO DEFEATS PORTLAND IN CLOSE GAME

PORTLAND, May 8.—Fournier's wild throw in the third inning today and close decisions are mainly responsible for San Francisco's victory over Portland. Fournier, however, redeemed himself toward the end of the game.

Table with columns for San Francisco and Portland, listing players and their statistics (AB, R, H, P, A, E).

RACING RESULTS

RESULTS AT LOUISVILLE LOUISVILLE, Ky., May 8.—Six races were run at Churchill Downs this afternoon and in each event the track record was broken, which is a fact of some importance in the consideration of fruit culture.

The Chirimoya Among the native fruits are a number which grow in profusion, which are almost unknown to the outside world. The most notable record shattered was the last race, when Bellevue ran a mile and a quarter in 2:06-1/5, which is a mile and a sixteenth in the fourth race. This lowered The Mink's record, made on May 27, 1908. Summaries: First race, five and a half furlongs, selling—Emard won, Madman second, Marie third; time 1:43-3/5. Breaks track record. Second race, purse, two-year-old fillies, four furlongs—Turf Star won, Zarah second, Grassy Damsel third; time 1:17-1/5. Third race, six furlongs, handicap—Jeff Bernstein won, Hanbridge second, Plate Glass third; time 1:21-2/5. Fourth race, 1 1/8 mile, Clark handicap—Mama won, Arlet second, Huck third; time 1:43-1/5. Fifth race, four furlongs—Joe Morris won, King Solomon second, Demas third; time 1:12-1/5. Sixth race, 1/4 mile—Bellevue won, Nadzu second, Orneka third; time 2:06.

RESULTS AT OGDEN

OGDEN, May 8.—But few favorites finished here today. Glaucus, a 10 to 1 chance in the second race, had things his way the entire race, winning easily. The Potter cafe handicap, at a mile and a sixteenth, went to Huapala with Peck, who was apparently too much for the favorite, Timothy Wen. Results: First race, half mile, selling—Warfare, 197 (Borch) won, Silver Fir, 107 (Cavanaugh), second; Katty, 102 (Mendon), third. Time 50-1/5. Kitty Rode, 102 and Sixteen also ran. Second race, five furlongs, selling—Glaucus, 195 (Graham) won, La Chata, 190 (Hermann), second; Jean Woodson, 192 (Gloward), third. Time 1:03-1/5. Banham, Barnmaid, John A. Mallon, Nappa and Sly Ben also ran. Third race, six furlongs, selling—La Reine Hindoo, 95 (Kirschbaum) won; Chief Desmond, 109 (Archibald), second; Bolman, 105 (Cavanaugh), third. Time 1:17-1/5. Sam Barber, Sam Preston, Oriflamb, Elevation and Rumance also ran. Fourth race, half mile and a sixteenth, the Potter handicap—Huapala, 161 (Jarrett) won; Copec, 95 (Howard), second; Rubric, 165 (Sandy), third. Time 52-1/5. Rafter Royal, Timothy Wen also ran. Fifth race, seven-eighths of a mile, selling—Cardinal Sarto, 116 (Palms) won; Friar Elgin, 104 (Archibald), second; Taxer, 116 (Donitz), third. Time 1:31-1/5. Proper, Kobelski, Spindoolk and Kurapatkin also ran. Sixth race, mile, selling—Woolen, 109 (Sullivan) won; Mike Jordan, 107 (Palms), second; Boston, 102 (Andrews), third. Time 1:48-1/5. Pretensio, Markie Mayer, Invader and Buna also ran.

RESULTS AT PIMLICO

PIMLICO, Md., May 8.—Results: First race, selling, four and a half furlongs—Reyburn won, Compton second, Busy third; time 55. Second race, selling, six furlongs—Memento won, George W. Lebit second, Sophie Honours third; time 1:14-1/5. Third race, Merchants' handicap, mile and sixteenth—Lark won, Siska second, Gowen third; time 1:44-2/5. Fourth race, the Chesapeake steeplechase, selling, about two miles—Waterbury won, Lush second, Great Jubilee third; time 4:25. Fifth race, amateur handicap, mile—Rio Grande won, Astor second, Persever third; time 1:42. Sixth race, selling, mile and sixty yards—Green of the Hills won, Siska second, George G. Hall third; time 1:46-3/5. Seventh race, mile and sixty yards—Court Lane won, Great Jubilee second, Hugh Kang third.

BASEBALL PLAYER KILLED

BOISE, Idaho, May 8.—Milton Bush, 27 years old, assistant cashier of the Boise State bank, died today from an injury sustained in a practice game of baseball last evening. Bush, who was a member of the Bankers' baseball team, was struck on the head by a ball and an hour later was removed from the field in an unconscious condition. It is believed they would enjoy going to the game and are entitled to passes. If they care for them I am going to have them issued.

MINISTERS GET SEASON PASSES

PORTLAND, Ore., May 8.—"For some time I have been thinking about it and I have at last decided I will give each minister in Portland a season pass to the baseball game," is the announcement of Judge W. W. McCredie, owner of the Portland team in the Pacific Coast and Northwest leagues.

NAVY BOAT CREW WINS

ANAPOLIS, Md., May 8.—Navy varsity defeated Columbia in the two-mile boat race today. Navy's time, 9:56-3/5; Columbia, 10:04-1/2.

PRINCETON FRESHMEN WIN

NEW HAVEN, Conn., May 8.—The Princeton freshmen defeated the Yale freshmen in the track meet, 57 1/2 to 46 1/2.

NATIONAL LEAGUE

BROOKLYN, May 8.—A three-cornered fight between Lennox of Brooklyn on one side, and Knabe and Gleason of Philadelphia on the other nearly caused a riot at the Brooklyn game with Philadelphia here today. The fight in the eighth inning, Knabe, although he appeared to have plenty of room to pass the Brooklyn man, Lennox, presented the act by striking Knabe on the head with a baseball bat and the two clinched. Gleason, who was on the coaching line, jumped in, but before the fight became general Knabe had slipped and fallen. The two, all three were ordered out of the game. As Gleason walked to the bench a spectator in one of the boxes threw a paper wad and a pop bottle at him. A special policeman who started to arrest the player's assailant was interfered with by the spectators, when a crowd of 1200 rushed on the field. But a swarm of policemen and detectives who were outside the grounds rushed in at this point and quelled the disturbance. The game then proceeded quietly, Philadelphia winning 8 to 2, batting Scamian freely. Deminger, who replaced Knabe, broke a finger on the first ball pitched and also retired. Score: Philadelphia 8, hits 13, errors 2. Brooklyn 2, hits 8, errors 5. Batteries—Morgan and Schiel; Mattern and Bowerman. Umpires—Cusack and Truby.

STANDING OF THE CLUBS

Table showing standings for Pacific Coast League, American League, and National League.

STATE LEAGUE

NEW YORK, May 8.—Boston bunched four hits on Quinn in the fourth inning today and thereby defeated New York in this inning. Spencer sent three men over the plate with a double. The New York club has released Pitcher Ford to Jersey City. Score: Boston 6, hits 8, errors 2. New York 4, hits 10, errors 3. Batteries—Morgan, Steel and Spencer; Quinn, Warhop and Kleinow.

AMERICAN LEAGUE

PHILADELPHIA, May 8.—Philadelphia made it three straight over Washington by winning today's game. Washington made four double plays. Score: Philadelphia 1, hits 5, errors 0. Batteries—Krause and Thomas; Burns, Hughes, Smith and Street.

COLLEGE BASEBALL

At New Haven—Yale 2, Andover 1. At Worcester—Holy Cross 1, Harvard 6. At Madison—Chicago 5, Wisconsin 1.

HARVARD DEFEATS DARTMOUTH

CAMBRIDGE, Mass., May 8.—Harvard defeated Dartmouth in the track meet, 29 to 25.

MEXICO SHOWS POSSIBILITIES TO FRUIT GROWERS

VERA CRUZ ATTRACTS MANY AMERICANS

GENERAL CONDITIONS BETTER THAN NORTH SLOPE

Many Products That Grow in Tropical Profusion Are Unknown to Communities in United States

Attention of fruit growers is being attracted to the possibilities of fruit raising in Southern Mexico. This industry has been increasing rapidly in this district, fostered by the Mexican government, and hundreds of Americans are pouring into the state of Vera Cruz, into the region of the raising of tropical fruits.

In the state of Vera Cruz, from the coast up to an altitude of 3500 feet above sea level, conditions for fruit culture prevail which are better than north to the Pacific slope of this republic; but these facts seem to have been entirely overlooked by investors, and no serious attempt has yet been made to develop its fruit industry. While in the northeastern part of the republic in many places it is necessary to irrigate the lands, and the orchards are annually exposed to danger from frosts, the southern region, along the line of the Ferrocarril Vera Cruz al Istmo, has abundant rainfall and is free from cold sufficient to injure the fruit trees in general. The soil is fertile, and there has long been a market for the products of the soil. The importance of these two facts cannot be overestimated in the consideration of fruit culture.

The Chirimoya Among the native fruits are a number which grow in profusion, which are almost unknown to the outside world. The most notable record shattered was the last race, when Bellevue ran a mile and a quarter in 2:06-1/5, which is a mile and a sixteenth in the fourth race. This lowered The Mink's record, made on May 27, 1908. Summaries: First race, five and a half furlongs, selling—Emard won, Madman second, Marie third; time 1:43-3/5. Breaks track record. Second race, purse, two-year-old fillies, four furlongs—Turf Star won, Zarah second, Grassy Damsel third; time 1:17-1/5. Third race, six furlongs, handicap—Jeff Bernstein won, Hanbridge second, Plate Glass third; time 1:21-2/5. Fourth race, 1 1/8 mile, Clark handicap—Mama won, Arlet second, Huck third; time 1:43-1/5. Fifth race, four furlongs—Joe Morris won, King Solomon second, Demas third; time 1:12-1/5. Sixth race, 1/4 mile—Bellevue won, Nadzu second, Orneka third; time 2:06.

The guayaba or guava, Psidium sp., which is native to this section, offers great possibilities to the cultivator of tropical fruits. The guayaba is found nearly everywhere throughout the tropical region, but as yet little or nothing has been done to perfect its cultivation. It is a native of the Gulf slope of the Gulf slope it flourishes, growing in dense thickets in many places. Naturally the fruit in its wild state is rather small, but it is a heavy bearer and under favorable conditions a single tree will produce several bushels of fruit. The yellow pulp contains several varieties of delicate flavor, and is also a heavy bearer. Both varieties ordinarily have blossoms and fruit in every stage of development at the same time. With only the most primitive cultivation and by simply keeping under control the rampant tropical vegetation, the bearing capacity of the tree is increased manifold and the size and quantity of the fruit are also greatly improved. This is another case where opportunity offers a wide and interesting field for experimenters.

The pineapple is cultivated to a considerable extent in the region bordering on the Gulf, near Vera Cruz, and with satisfactory results. It grows to a good size and is of fine flavor. It seems to flourish at any altitude under 4000 feet above sea level, and comes into bearing in one year. The pineapples of this section are of the common variety, which was found at an early period in the history of Mexico and is most common. It is a large fruit, and stands shipment well. The latter variety is entirely free from spines and the flesh is much more tender and juicy. It grows to a large size. Specimens from twelve to fourteen inches in length and eighteen inches in circumference are found here. The larger ones command as much as 75 cents (American) each, and the demand is far ahead of the supply. The "pine" flourishes in all kinds of soil. The best results are obtained at an elevation of 1500 to 3000 feet. The plant thrives best in sandy soil, but good results are obtained even in clayey soils. The cultivation of the

MILES IS TENNIS CHAMPION LONDON, May 8.—Eustace H. Miles, former amateur British tennis champion, captured the title at Queen's club tonight, defeating N. S. Lytton in straight sets.

To Speak at Y. M. C. A. A meeting of great interest to the young men of the city will be held in Triangle hall, Young Men's Christian association, Sunday afternoon at 3:20, at which time Dr. R. D. Hunt of U. S. C. will speak on the subject, "The Will and the Way."

"pine" is very simple. The land is cleared and as a rule is not plowed or turned over. A small hole is dug for the slip, and all the cultivation given, is an occasional clearing with a hoe. With this simple cultivation fine fruit is produced. One plantation near Tierra Blanca, state of Vera Cruz, owned by an American, and another near Jalapa, owned by a naturalized American-Italian, are the best, as far as known, in the entire republic. The fruit on both thrives well on clayey soil of only moderate fertility, which has been planted in corn for generations. As a rule, better results are secured from localities on steep hillsides than from those on level ground. Land suitable for the raising of pineapples is to be had in abundance, and at a much lower figure at a short distance from the railroad.

Citrus Fruits The most profitable orange plantations are those in fruits of the citrus varieties. All of them will flourish in altitudes up to 4500 feet, and bear plentifully. The sour orange and the lemon grow wild in the forests in great abundance, and bear fruit the greater part of the year. The trees are extremely hardy and free from insect attacks, and furnish excellent grafting stock, which may be had in unlimited quantities. Shipments of oranges are comparatively light as yet. During 1908 oranges were shipped to total value of \$33,417 gold. The oranges grown here, as a rule, seedlings, rather small, but of good flavor. Others grown in the Jalisco section are famous for their exquisite flavor. The fine California and Florida varieties grow vigorously and are excellent bearers. The fruit is large and of superior quality. Much ripe fruit, however, is found as early as August and September, and again, ripe fruit is often gathered in January and February. The seeded oranges are large in size, beautiful in appearance and of fine flavor. They would command the highest prices on any market.

Another enterprise that promises great inducement to planters is the cultivation of the lemon. The trees grow rapidly and begin to bear the second year. The fruit is large and of superior quality. Trees are laden with fruit all the year round. Some trees have not been without abundance of fruit for seven years. No cultivation is attempted, yet the trees are vigorous and grow to a large size. The fruit is compact and stands shipment remarkably well. Lemons will thrive on any soil and at all altitudes up to 4000 feet above sea level. The grapefruit pays the planter well. The trees grow to a large size and are most profitable. Trees have been known to carry 1000 fruits at about seven years, the branches covering a space of not less than eighteen feet in diameter and being bent under the weight of the fruit. The average size of the fruit was over four inches, and it was compact and fine.

The only question open to discussion as to the profits of the fruit business in this country is that of marketing the crop and the kinds that will best stand shipping. As there have been no crops to market, naturally no facilities have been provided for handling any large amount of fruit. There is plenty of push in transportation companies, but business must be in sight before they could be expected to supply the facilities. They will meet the producer half way in any enterprise that is taken up seriously. No more than this can be expected from the fruit business. The development of his business, may rest assured of square treatment by the transportation companies, the government and the officials of the state of Vera Cruz.

The fruit is compact and stands shipment remarkably well. Lemons will thrive on any soil and at all altitudes up to 4000 feet above sea level. The grapefruit pays the planter well. The trees grow to a large size and are most profitable. Trees have been known to carry 1000 fruits at about seven years, the branches covering a space of not less than eighteen feet in diameter and being bent under the weight of the fruit. The average size of the fruit was over four inches, and it was compact and fine.

The only question open to discussion as to the profits of the fruit business in this country is that of marketing the crop and the kinds that will best stand shipping. As there have been no crops to market, naturally no facilities have been provided for handling any large amount of fruit. There is plenty of push in transportation companies, but business must be in sight before they could be expected to supply the facilities. They will meet the producer half way in any enterprise that is taken up seriously. No more than this can be expected from the fruit business. The development of his business, may rest assured of square treatment by the transportation companies, the government and the officials of the state of Vera Cruz.

Another enterprise that promises great inducement to planters is the cultivation of the lemon. The trees grow rapidly and begin to bear the second year. The fruit is large and of superior quality. Trees are laden with fruit all the year round. Some trees have not been without abundance of fruit for seven years. No cultivation is attempted, yet the trees are vigorous and grow to a large size. The fruit is compact and stands shipment remarkably well. Lemons will thrive on any soil and at all altitudes up to 4000 feet above sea level. The grapefruit pays the planter well.
