

# Remember Tomorrow Is Opening Day

## OF THE 3 Grade System Stores

Saturday, Nov. 6th

609-611 South Broadway

11,000 square feet devoted to Clothing, being the largest, greatest, grandest clothing establishment in the world, bar none.

Our clothes have the right look, the right feel and the good old honest value every time. Nothing like it ever shown before. All bright, new goods that sparkle with originality and brightness. Superb selections culled from the leading marts of Europe and America by the greatest buyers of merchandise in this country.

See our window display. Come in and get acquainted and see our beautiful store. Don't buy if you only come to look. Be a well dressed man.

Three-Grade System Suits and Overcoats look good and make good because each and every garment is the best there is at the price for style, fit and good sound wear. Our clothes will make you a well-satisfied customer—the surest foundation of a growing business.

**Souvenirs**  
For the Ladies  
A dainty luncheon and tea served free in our Boys' and Children's Department.  
For the Men  
A pair of genuine Boston Garters free with any purchase.

OUR 3 GRADE PRICES ON  
**Men's Suits \$15, \$20, \$25**  
and Overcoats

OUR 3 GRADE PRICES ON  
**Boys and Children's Suits, Reefers and Overcoats \$5, \$7.50, \$10**

OUR 3 GRADE PRICES ON  
**Hats for Men and Young Men \$2, \$3, \$4**

OUR 3 GRADE PRICES ON  
**Shoes for Men \$3.50, \$4, \$5**  
and Young Men

OUR 3 GRADE PRICES ON  
**Shirts for Men \$1, \$1.50, \$2**  
and Young Men

**We Give Trading Stamps**  
**30-Stamps Free-30**

THIS COUPON IS GOOD FOR 30 FREE STAMPS, IF PRESENTED WHEN MAKING ANY PURCHASE. THESE ARE FREE, IN ADDITION TO REGULAR STAMPS GIVEN WITH YOUR PURCHASE. REMEMBER, THIS COUPON WILL FILL ONE PAGE IN YOUR BOOK. THIS COUPON GOOD UNTIL NOVEMBER 10.

**Souvenirs for the Ladies and Gentlemen**  
**Whistles for the Boys**  
Premiums on Display

### News of the Mines and Oil Fields

EDITED BY CHARLES F. SPILMAN

**ANTELOPE VALLEY BUYS RICH MINE**  
**FAMOUS LIDA BONANZA HAS NEW OWNERS**  
Property in Kern County, Ninety Miles from Los Angeles, Which Has Produced Large Amount of Bullion

The Antelope Valley Gold Mining company of Los Angeles has purchased the famous Hamilton, or Lida, mine near Rosamond, in the south part of Kern county, a property which is credited with a production of \$300,000. The mine adjoins the holdings of the Antelope Valley company and can be worked to advantage in connection with the claims already developed by the company.

The Hamilton mine was discovered by E. M. Hamilton, while he was out on the Mojave desert for the benefit of his health. The mine is situated about ninety miles due north of Los Angeles and within three miles of the aqueduct. Mr. Hamilton built a five-stamp mill from the proceeds of his first shipment and has since been mining in a crude way, until poor health confined him to lighter duties. He has refused many offers for the property, and the Antelope Valley company is considered fortunate in finally acquiring the control of the company.

A. E. Wiley, president of the Antelope Valley Mining company, made the deal for the Hamilton mine and says that the company made the first payment October 30. It is his intention to sink a new working shaft, and as soon as conditions warrant the company will install a twenty-stamp mill. There is water in abundance and the final completion of the aqueduct and the installation of power plants will give cheap electric power for the operation of the machinery. By this time the company expects to have the mine in shape for the enlargement of the mill.

The old workings of the Lida mine are hardly in condition for mining operations, but it will take but a short time to sink a new working shaft. The ore is free milling, 95 per cent being recovered by amalgamation and cyan-

iding. At the old Hamilton mill there is a pile of tailings which carry values of from \$10 to \$100 a ton, the tailings being valued at \$40,000, and it is the intention to install a cyanide plant for the treatment of this rich residue.

E. M. Hamilton was a well known character in Los Angeles before he turned his attention to mining, having served two stormy terms in the city council. By his own story he had some hard knocks in the task of putting the mine on a producing basis, which were due to his entire ignorance of ore formations and to lack of capital. At the time he entered that section of the Mojave desert its mineral possibilities were unknown to the mining world. His example has since been followed by others and the Rosamond district is fast coming to the front.

A. E. Wiley, president and manager of the Antelope Valley, is an experienced and successful mining engineer and fully realizes the value of the new possessions of his company. He purposes to open the mine in a workmanlike manner and to install a mill just as soon as the developments warrant.

Some of the ore which was treated in the old Hamilton mill was very rich, but it was literally gophered out. The new shaft will be sunk close by the rich ore shoot which old man Hamilton discovered.

The formation of the Rosamond district is said to closely resemble that of Goldfield, with stratum of dacite underlying andesite. The richest ore in the Lida mine was found on the crest of a red, intrusive granite. If the ore deposition is the same as in the Goldfield district the dacite will carry the big and rich ore veins. On the Antelope Valley company's ground the erosion has bared this dacite for 7000 feet and the company is engaged in driving a cross-cut tunnel, which will enter the dacite at a depth of 300 feet beneath the outcrop of the vein.

The offices of the Antelope Valley Gold Mining company are at 622 South Broadway. The officers are: President, A. E. Wiley; vice president, H. V. Blenkron; secretary and treasurer, W. L. Blenkron; J. J. Reid, an experienced mine manager, is superintendent.

**PRICES OF METALS IN NEW YORK MARKET**

NEW YORK, Nov. 4.—Copper, easy; standard spot, \$12.40@12.75; December, \$12.35@12.75. Spelter, \$6.10@6.55. Lead, \$2.40@2.45. Silver, 30 3/4.

**M'KITTRICK WELL OPENS NEW FIELD**  
O'Donnell and Associates Drilled Well to Develop Land for One-Half Interest, Which Proves Valuable Property

The strike on the northeast quarter of section 6, 30-22 in the McKittrick apparently opens up a tremendous territory, and the country north and west of McKittrick bids fair to become a field equal to that in Kern River, says the Bakersfield Californian.

The strike proves the theory that has been advanced by a few oil men but which was generally scouted, that the oil pool in that section lies further to the west and away from the break. The new well on 6 is down only 300 feet, yet the drill penetrated a 150-foot stratum of sand and then went into limestone formation. Operations were continued and shortly the drill broke into another stratum, and a second body of rich sand has been uncovered.

The strike indicates the low rolling hills and possibly even the flat further out are petroleum bearing, and the possibilities for an immense field being opened up in that section are bright.

Jim O'Donnell and his associates, who are doing the drilling, undertook to develop the land for half of the property. There were two sets of locators on this quarter section, L. A. McCray and others, and J. M. Smith, S. P. Wible and associates. Later Messrs. Smith and Wible purchased the interests of the other locators, and they are now in possession of a very valuable piece of oil land.

It is one of the fortunes of the oil business that this property was at one time located by the McKittrick Oil company, but that company had taken up a vast deal of land in the McKittrick district and found itself unable to prove up on all of its claims. Eventually it abandoned its quarter section in 6 as being the least promising of the territory held by it.

The San Breeze and the U. S. Oil companies both have wells on section 6 near the break. It has been held heretofore that the croppings across section 6 marked the outside edge of the district, but the new well explodes this theory and proves that the main body of oil lies below the break.

### MARIAN WELL IS NOW ON THE PUMP

**WEST SIDE OF COALINGA FIELD PROVED**  
Homestead No. 3 Is Producer—Consolidated Has a Good Well in Devil's Den, and Pluto Expects a Gusher

COALINGA, Nov. 3.—At 10 o'clock this forenoon the Marian put on the pump and added itself to the list of producers in the great field. While it was not learned officially what the flow is, the report is that about a 300-barrel rate will cover the proposition.

As a result of the determining of the fact that the finding of oil in the Marian establishes beyond the peradventure of a doubt the existence of an immense lake of oil underlying the west side, investors will not be laggard in entering the field and beginning operations in hitherto wildcat sections.

The Marian was put down under contract by Clyde Martin and he made an efficient record—one of which he need not feel ashamed, even though he was a new man to this district.

**Sues for Stock**

W. W. Sweet, president of the Coalinga Great Western Oil company, has been sued by S. R. Bowen for stock in that company which Sweet refused to sign. Mr. Bowen's attorneys, Sutherland & Harbour, sued an alternative writ of mandamus, the same being made returnable November 8. The controversy will be threshed out in the district court.

**Homestead on Pump**

Coalinga Homestead No. 4, 26, 20-14, today sent out the last of its rig iron and timbers. In a few days it will begin spudding in under A. M. Anderson, who has the contract.

The same company has just finished their No. 3 and has pulled the casing, perforated it and put it back. They will be on the pumps this evening. The appearance of the well is good and the people interested are pleased.

The Netherland, in the same section, is finishing its No. 2. It is putting in the casing and tomorrow will have the pump on.

Netherland No. 1 is a promising property and expects to be doing something soon.

**Pinal in Midway**

The Pinal, which is one of the successful San Luis Obispo companies,

### and of which John Barneburg is president, has secured holdings in the northwestern Midway field, and is shortly to begin operations there. The Bear Creek well in that neighborhood is now doing regularly two hundred barrels.

The Brookshire, which is another Santa Maria company, has four rigs at work on its holdings and rapid progress is being made.

**In Devil's Den**

Report comes from the Devil's Den country that everything is moving along rapidly and many bright prospects are developing. It is reported that the Consolidated has a good fifty-barrel well and the Pluto is looking for a gusher every day.

The Greasy Jim is making preparations for great development and is building bunk houses and installing first class machinery.

The Positive has timbers on the ground for a standard derrick and machinery has been ordered. The Marathon is drilling at a rapid rate and has made a good discovery. J. J. Cairns is drilling with his outfit on the old True Blue property with every indication of success. Every day a new outfit is entering the field and good machinery is being installed on every claim.

Dougherty & Johnson have installed a heavy Keystone drilling rig on section 2-16-18 and will bring active operations at once.

The Pluto is said to have the brightest prospects of any company at present and has ordered a large quantity of cement, which was delivered on the ground Thursday for the purpose of shutting the water off.

**MINING QUOTATIONS**

**Nevada Stocks**

Exclusive dispatch to The Herald by L. A. Crisler & Co., members Los Angeles Stock exchange, 200-201 E. W. Heilman building, Los Angeles.

SAN FRANCISCO, Nov. 4.—The bear cattle seemed to have the market for mining shares well in hand today, and the list sagged all along the line. Consolidated sold off 1 1/2 points, Florence 7/8, and Atlanta 1. Fraction and Daisy were weak at yesterday's figures. Training was light and confined chiefly to the Comstock and Goldfields.

Condition in the Rawhide list, made another advance today and closed strong with 2 1/2 bid.

Following are the closing quotations:

**Boston Mining Stocks**

Special service to The Herald by E. F. Taylor, 112 West Third street, Los Angeles.

BOSTON, Nov. 4.—The morning session was active in spots. Almost everything on the list participated in the later trading, some showing substantial improvement. Noteworthy features of strength have been noted in North Butte, which sold at 6 1/4. Old Dominion gained 1 point. Copper Range gained 3/4 of a point. Greene Canaan selling at 12. Nevada Consolidated at 2 1/4—1 1/2 higher for this movement. Strength in Amalgamated has greatly improved sentiment, the general impression being that some plan is on foot for the taking over of several copper properties by the Amalgamated company. The industrial list is also strong under the lead of American Agricultural Chemical, which sold at 90 1/2, a gain of 2 points. Telephone, United Shoe Machine and Woolen, while not active, are all strong.
