

CALIF. LOAN RATE SHOOT UPWARD STOCK DEALINGS DIMINISH IN CONSEQUENCE

LOOKS AS THOUGH POWERS AIM AT QUIET PERIOD

Purely Trading Operations Discouraged—Rise in Sterling Rate at Paris Relieves London Situation

[By Associated Press.] NEW YORK, Nov. 9.—Dealings in stocks diminished significantly today, the accompaniment of a sustained higher rate for call loans in the money market. It is evident the financial powers are agreed that conditions are not propitious for pushing speculative operations in securities. There was no evidence of the heavily congested operations for the purpose of churning the market into activity, which have been features of the stock market dealings for many weeks.

It is the conviction of the professional operators that a period of quietude is designed by the financial powers which have fostered the prolonged speculative rise in the market. For this purpose repressive measures appear upon signs of any considerable movement in either direction. An advance in price develops selling orders on an upward scale which early discourages attempts to advance prices. Any considerable decline, on the other hand, uncovers speculative buy at each successive downward stage.

The effect is to hold prices even and to discourage the purely trading operations which are based upon the chance of wide and sudden fluctuations in either direction. More attention was given today to money market developments than to stock market. The further rise in the sterling exchange rate at Paris pointed to a movement of capital from Paris to London, which was helpful to relieve the situation at the latter point. The continued demand for foreign exchange here kept alive the supposition that additional gold shipments might be commanded by London, although none was announced.

Yesterday's reports of large buying of copper for export had lost their effect on the copper industrial, and the general market lacked that sustaining influence. The persistent pressure on Pennsylvania since the announcement of stock subscription rights by stockholders makes a bad augury for the reception to be tendered to further efforts to raise capital. New York Central moved in sympathy with Pennsylvania.

It was not until late in the day that the dragging tendency of the market turned into positive weakness, when the money rate fell to 5 1/2 per cent. Bonds were irregular. Total sales, par value, \$3,518,000. United States bonds were unchanged on call.

New York Stocks

MARKET PLEASED WITH BIG RAINS

GREEN PRODUCE WILL DERIVE BENEFIT

Cabbage Weakens and Declines—Tomatoes, Berries, Cucumbers, Beans and Peas Advance—Cauliflower is Shipped East

Yesterday's rain was received with joy by the growers of green produce in market circles. The rain will be especially favorable to green produce, and from now on, large quantities will be expected. Cabbage and cauliflower will derive great benefit from the rain. The stuff now reaching market is damaged to some extent by the previous shower.

There was a tendency to advance prices yesterday. Tomatoes were up to 40¢ per lug box, blackberries to 30¢ per box, cucumbers to 50¢ a lug box, green beans to 60¢ a pound, peas to 45¢ a pound.

Cauliflower was firm, advancing to 1.75 per crate. Lettuce was weak at 70¢ per 12 1/2 lug box. A wider range prevailed in celery, the bulk of the product selling at 20¢ to 25¢ a crate.

There were enough fish to supply a normal demand. Weakness developed in cabbage and it declined to 1.25 a sack. The supply was large, the local growers being compelled to weaken on account of the heavy shipment.

Additional demand has been created for cauliflower by shipments to the east for the winter trade. Several cars are said to be moving from Los Angeles daily.
