

TO IDENTIFY BY VEINS IN HAND

Padua Professor Works Out New System Which He Claims Is Infallible

SIMPLIFIES BERTILLON PLAN

New York Police Department Will Give the New Method a Thorough Test

(Associated Press) NEW YORK, Sept. 5.—A new method of identification of persons, criminal or otherwise, more simple than the Bertillon system, but equally infallible, is to be tested by the New York police department. The method, developed by Prof. Tamassia of the University of Padua, is based on the peculiarity of the pattern of veins on the back of the hand.

The arrangement of the veins on the back of the hand, Prof. Tamassia claims, is so characteristic of the individual that it is not the same in any two persons and therefore constitutes the best known means of identification. The general appearance of the veins undergoes no change with increasing age and they cannot be altered purposely without inflicting serious mutilation.

To obtain such a report, photographs are taken of the arm, slightly bent, and the lines are marked with a dark pigment. The veins then show very conspicuously in the photograph.

Chief Inspector Russell of the New York police department says of the Tamassia method:

"Its simplicity, infallibility, and, most of all the fact that it cannot be destroyed or altered and is not affected by age, makes it especially valuable to the police for the identification of criminals. Many measurements of the Bertillon system are affected by age, and the thumb and finger lines may be altered by manual labor. If the system of Prof. Tamassia is all that he asserts, the police department will do well to adopt it."

BURBANK'S WORK MOST APPRECIATED IN EUROPE

Russian Agriculturist Pays High Tribute to Wizard

SAN FRANCISCO, Sept. 5.—The work of Luther Burbank, the famous breeder of plants, is more appreciated in Europe than in America, if the observation of Edmund Seateski, the Russian agriculturist, is correct. In an interview published here Seateski says:

"It was not long ago that Europeans thought they were the only farmers that could produce new species of vegetables and grains, but in recent years our eyes have been opened to the fact that America has taken the lead as an agricultural country. California's products are widely known in Europe, and your seeds are in general use there. We have a profound respect for Luther Burbank; in fact, I believe we of Europe appreciate him more than you do. Some of his plants are now undergoing tests at the great nurseries at Nizhnezorok."

Seateski, who is known to American agriculturists as the originator of one of the most successful varieties of oats for dry farming, is on his way to Burbank's estate at Santa Rosa.

FROHMAN TO URGE SUNDAY PLAYS WITH MORAL LESSON

Theatrical Man to Ask Modification of New York State Law

NEW YORK, Sept. 5.—Charles Frohman, who has hitherto been notable among theatrical men as a stout opponent of Sunday theaters, has announced that he is planning a campaign to obtain a modification of the New York state law prohibiting dramatic productions on Sundays. He explains that his scheme is no way out of harmony with his previous policy, but that in common with a number of prominent social workers, particularly Jane Addams of Hull House, he feels that the church is not successfully coping with moral and ethical problems.

He asserts that people are, however, perfectly willing to be preached to, provided that they can at the same time be amused.

Mr. Frohman proposes, therefore, to ask for the passage of a law allowing the presentation of plays on Sunday that have a sound moral lesson and suggests that these plays be chosen in each community by an appointed committee of citizens who have been identified with humanitarian projects and that the strictest civic supervision be exercised over the productions.

PLANS' STANDARDIZATION SAVES \$150,000 IN FEES

NEW YORK, Sept. 5.—New York City will save nearly \$150,000 in architect fees and other expenses by building twenty new fire houses from the new design, instead of buying different sets of plans for each structure. The standardizing of architecture and construction will also cheapen repairs and alterations whenever these are necessary.

The new houses, which will cost from \$50,000 to \$80,000 each, will be three stories high, of stone with plaster treatment, surmounted by a simple cornice. The only ornamental feature consists of the coat of arms of the city at the second story level.

MAYOR GAYNOR TAKES SIX-MILE WALK IN HOT SUN

ST. JAMES, L. I., Sept. 5.—Mayor Gaynor walked six miles today in a broiling sun, with the thermometer at 79 and the humidity at the same mark. He returned home dusty and heated, but seemingly fresh.

Neighbors with whom he talked think that it will be only a matter of a few weeks before he is fully recovered.

AUTUMN DISPLAY

The New York

337-9 South Broadway The Style Shop of Los Angeles

Clever Designing Charming Colors and Imported Fabrics of Special Interest

Back with the New Styles

NOT satisfied with the best the East has to offer, foreign Fashion centers have been searched to obtain utterly new ideas and materials for our Millinery Department, in shades as well as styles. These are arriving by every west-bound express and constitute a display unrivaled for beauty and exclusiveness.

Satins and Velvets in Vogue

TEXTILES of unusual merit are being shown—two-toned velvets, plain velvet in odd shades, hatters' plush and rich satins. Among the most popular hats for immediate wear are all black, or black velvet with bright colored facing, satin trimmings to correspond being frequently employed.

Recent Plays Provide Us With Many Oddly Rich Effects

IT IS surprising to note the clever adaptations the millinery world has evolved from various characters in Rostand's famous plays. In addition to styles originated by noted stage beauties, charmingly artistic models greet us on every hand.

Women Warmly Welcome Newcomers in Dainty Afternoon and Evening Dresses

THE SOFT, CLINGING MATERIALS are responsible for much of the alluring charm of the new dresses of Crepe de Chine, Crepe Meteor, Grenadine and novelty figured Crepes, and in the more elaborate evening affairs chiffon and grenadine over Persian and floral designs. Modified "hobble" effects are very much in evidence. We are also showing the very newest models in tailored dresses of chiffon broadcloth and French serge.

THE NEWEST SHADES include golden and nut brown, royal blue, steel gray, leather, rose and new tones of green.

Dainty evening dresses priced \$24.50, \$29.50, \$35 and upward. Street dresses of silk and novelty cloths at \$19.50, \$25, \$29.50, \$32.50 and upward.

Exceptionally Clever New Ideas in Elegant Top Coats

VARIETY is the keynote of our Autumn stock of fashionable, full-length coats for all occasions. To provide each fair lady with a classy coat, which has no counterpart in the city, at a very moderate price—this is our aim!

Madame Capelli Offers

(Today Only) 50c Bottle Hand Lotion.....25c Guaranteed Bleach.....65c

Set of \$3.50 Curls Fine French \$12 Switch \$2.50 \$6.00

We Extend an Invitation

TO everyone who possesses a natural feminine curiosity concerning the most desirable new effects, to visit our Millinery Department as frequently as it may please them to do so. Hourly transformations take place, keeping the millinery interest up to concert pitch. Prices are reasonable, styles absolutely exclusive and salespeople courteous.

Exclusive & Original Creations

THE good fortune which has always been accredited "The Style Shop" in the capturing of beautiful millinery creations and importations is still further exemplified in our present showing. Nothing that is ordinary, in style or workmanship can find a place in our department.

Plumes Are Even More Than Before in Fashion's Favor

THE call for fancy plumes amounts almost to a furore, their gracefulness and luxurious softness providing the only adornment of many of the most effective new shapes. See them for yourself on the stunning new importations.

Fall Styles Are Here Now in Full and Complete Assortments of Smart Tailored Suits

THE FIRST CONSIDERATION when weighing the pros and cons of the Autumn wardrobe is the selection of the one unalterable necessity—THE TAILORED SUIT! Its very simplicity calls for an added caution in its purchase. If you bought your suit here last year the chances are you will not even consider making your selection anywhere else. BUT WE CAN DO BETTER THIS YEAR! A whole year's study has revealed a number of points where improvement was possible. THE STYLES ARE NEW, but the beauty of the fabrics, the exquisite tailoring, the superb fitting qualities are only possible through expert knowledge and unremitting effort.

New tan and brown mixtures in English tweeds, imported suitings in diagonal weaves, mohair suitings, the popular English navy serges and other exclusive novelties. Prices range \$19.50, \$24.50, \$29.50, \$35, \$39 and \$45.

Hundreds of Nobby New Styles in Separate Tailored Skirts

"HOBBLE" effects, of course, but they don't hobble you at all, as a matter of fact, being merely cleverly designed to simulate Fashion's latest fad. Skirts made to FIT small ladies without alteration, also perfectly proportioned skirts for stout ladies as well as regular sizes.

2 WORLD'S AUTO RECORDS BROKEN

New Time Established for the 75 and 20 Mile Distances at Indianapolis

(Associated Press)

INDIANAPOLIS, Sept. 5.—Fighting all the way, first with his teammate, Al Livingston, then for 155 miles with Harroun in his Marmon, until the Marmon broke a coupling in the sixty-eighth lap, Johnny Aitken, in a National, won the 200-mile race and \$1000 in the closing event of the season at the Indianapolis motor speedway this afternoon.

Aitken took the lead from Livingston at the end of the second lap and held it for 20 miles. Harroun then led for 10 miles when Aitken jumped in front, but soon lost the lead again to the Marmon.

Harroun, pushed by Aitken, set a pace that at the end of 75 miles, just after he had stopped for a new tire, gave Aitken, who jumped into the lead, a new world's record for that distance. Aitken's time for the 75 miles was 63:31.9, while the previous record was 69:34.6, also held by the National driver.

In the 50-mile, free-for-all, Ed Hearne, driving a 120-horse power Benz, jumped into the lead at the start and was never headed, although pushed hard by De Palma in his 200-horse power Fiat. Hearne's time for 20 miles, 15:06.5, beat the world's record for that distance, 15:31.8, made by Robertson in a Fiat.

TWELVE CARS IN RACE Twelve cars started in the 200-mile race at 3:30 p. m.

Harroun in a Marmon had a lead at the end of five miles with almost a lap on Livingston in a National, who was second. Basile in a Matheson, was third. Time, 4:00:08.

The track dried off after a hard shower at noon and was in good condition when the three Herreshoffs came to the wire at 1:20 for the first event, which was a five-mile race for cars of 1 60 cubic inches piston displacement. Emmons won the race, coming in holding down his hood over his engine, with McCormick a close second. Smith dropped out at the end of the first lap with engine trouble. Time, 6:12.

In the ten-mile, free-for-all, De Palma in his 200-horse power Fiat, jumped into the lead at the start with Hearne in a 120-horse power Benz closely following. Hearne pulled up but De Palma won by a wheel. Harroun in a Marmon, third. Time, 6:48.3.

Prayer in a Firestone-Columbia, won the five-mile race for cars of 161-200 cubic inches piston displacement. Em-

mons (Cole) was second; Edmunds (Cole), third. Time, 4:47.8.

HARROUN WINS EVENT

Harroun in a Marmon won the five-mile event for cars of 231 to 300 cubic inches displacement. Pierce in a Falcar was second and Barnsdollar in a MacFarlan, third. Time, 4:38.26.

Aitken (National), led all the way and finished first in the five-mile race for cars of 301-450 cubic inches piston displacement. Dawson (Marmon), second; Greiner (National), third. Time, 4:10.2.

Hearne in a Benz, 120-horse power, won the 50-mile free-for-all. Harroun (Marmon), second, and Livingston (National), third. Time, 38:02.85.

A National driven by Wilcox won the five-mile contest for cars of 451-600 cubic inches displacement. Basile (Matheson), second; Merz (National), third. Time, 4:00.99.

Barnsdollar, driving a MacFarlan, captured the five-mile handicap; Frayser (Firestone-Columbia), second, and F. Clemens (MacFarlan), third. Time, 5:00.83.

GIVES DEMONSTRATION OF NEW CANCER TREATMENT

SAN FRANCISCO, Sept. 5.—Dr. P. K. Gillman, surgeon in chief of the Philippine general hospital in Manila, whose newly discovered treatment of cancer is said to have worked remarkably cures, gave a demonstration of his system at the Southern Pacific hospital here Saturday. He operated on two patients in the presence of several local physicians, some of whom afterward expressed their confidence in the efficiency of the treatment.

From here Dr. Gillman intends to go to Baltimore, New York and other eastern cities, where he will give further demonstrations.

WATCHMAN KILLS MINER WHO FATALLY WOUNDS HIM

GILA BEND, Ariz., Sept. 5.—In a gun fight last night with J. R. Dubose, a Southern Pacific watchman, Thad McClaune, a miner, was killed and Dubose, who was wounded by a bullet in the abdomen, died in the hospital at Tucson this morning. The trouble leading to the tragedy started by the watchman trying to prevent some men from boarding a train.

EXPERTS IN PARIS TALK OF TELEPHONE SYSTEMS

PARIS, Sept. 5.—Alexander Millerand, minister of public works, posts and telegraphs, opened today the second international congress of telegraph, telephone and technical experts. Several American companies are represented at the gathering. The chief question before the congress is the preferability of the manual over the automatic or combination, telephone system.

EUROPE OBJECTS TO U.S. CIRCULAR

New American Customs Sample Regulations Cause Storm of Dissatisfaction

(Associated Press)

PARIS, Sept. 5.—Press dispatches received here from Washington attributing the storm of dissatisfaction raised in Europe over the new American customs sample regulations to the belief that the circular requires the delivery of samples at every port of entry in the United States is pronounced based on error by American foreign exporters.

They declare that the objections are due to the inherent nature of the circular itself, the impossibility of compliance by shippers whose shipments continue throughout the season and the hardships of trying to enforce the new regulations in the midst of the summer season. It is pointed out that some invoices contain as high as 400 different articles.

The draft of the original circular which was called to American Consul Griffith at London July 7, which was distributed on the continent for immediate enforcement, caused instant complication, as the circular provided for the use of the English weights and measures. This feature, however, was modified subsequently to permit the use of the metric system.

The American regulations against which the French and English export textile firms are protesting require these exporters to deposit at the nearest American consulate two specimens of all classes of their goods, except laces and embroideries, which are intended for shipment to the United States.

PLUNGES FROM HIGH BUILDING

NEW YORK, Sept. 5.—Pursued by his two sisters, with whom he had quarreled, Charles Young, a silver-smith, raced to the roof of a five-story tenement last night and jumped to the street in sight of five hundred persons. He was instantly killed.

It's so easy to secure a bargain in a used automobile, through want advertising, as it used to be—and still is—to secure a horse and carriage.

Ayer's Sarsaparilla Temperance

UNFROCK JAILED PASTOR AFTER 3 YEARS OF TRIAL

Church Ousts Minister Imprisoned on Woman's Charge

PLATTSBURG, Mo., Sept. 5.—The Rev. Clyde Gow, formerly pastor of a Lincoln county Methodist Episcopal church south, was dismissed from the church today on charges made against him by Miss Elizabeth Gleason, a school teacher, who died two years ago as the result of an operation.

Gow is now under sentence of four years in the penitentiary on the charges made by Miss Gleason. The minister's case has been under consideration by the church for nearly three years. He was found guilty at a former trial and ordered expelled. He appealed to the general council and was given a second trial, which closed today.

VESSEL FIRES ON TOWN IN CONTROL OF ESTRADA

Incident Causes U. S. Gunboat to Await Developments

SAN JUAN DEL SUR, Nicaragua, Sept. 5.—The lake steamer Victoria, which was out of her port when Rivas surrendered, returned yesterday, having on board Gen. Matuty and troops still loyal to the Madrid faction, which are being transferred from Fort San Carlos.

Finding Estrada's men in control here, the vessel refused to come to her wharf, but fired several shots into the town and then withdrew, supposedly with the intention of establishing headquarters on the island of Ometepe. In view of this incident the American gunboat Yorktown has delayed sailing for Panama, where she is to coal.

U. S. APPOINTS COMMISSION

MANAGUA, Nicaragua, Sept. 5.—The Commerce publishes a statement that the United States government has appointed a commission headed by American Consul Moffatt at Bluefields which is expected in a few days to aid the new Nicaraguan government in revising the concessions which were granted annually by former President Zelaya.
