TRUST BARS BATH TUBS; USED AS COAL BINS

CHICAGO, Nov. 24.—No more bathtubs will be installed in houses to be built for foreign workmen employed by the various subsidiary companies of the United States Steel corporation at Gary, Ind.

This is the edict that came from the big corporation yesterday. When an architect made a plan for a building permit in behalf of the company that intends to erect a score of concrete houses in the western part of the city it was noticed that the plans called for all modern conveniences, with the exception of bathtubs.

"Three years ago," said a Steel corporation official, "we erected sixty well-appointed houses for foreign workmen and their families and placed bathtubs in each one. A year later a report was wanted from New York as to how they were talking to the tubs. An investigation revealed the fact that in no instance was the bathtub ever used, but was being utilized as a coal bin, etc., and we decided it best to omit the tubs."

CITY RESCUE CONVERT WEDS MISSION WORKER

When Charles Sloat knelt at the mourners' bench in the meeting place of the City Rescue mission he did not dream that the loom of fate would weave into the warp and woof of the new life he was seeking a romance which would give him one of the mission workers as a bride.

Announcement had been made that a wedding would be a feature of the Thanksgiving service, but only a few of the attaches of the mission knew who the principals would be. Sloat, since his conversion, has been an enthusiastic attendant at the exercises. He is 46 years of age and his bride is 47.

When the Rev. H. D. Kamp announced the names of the couple about to be united in matrimony surprise shone in the faces of the spectators. Miss Belle Blakesley, assistant superintendent of the mission, and Roscoe White officiated as maid of honor and best man, respectively, and immediately after the ceremony was over the children of the mission, all of whom are devoted to Mr. Sloat, appeared in a body and offered their felicitations, followed by the older members.

INDIAN KILLS HEIR TO MILLION—MAN HUNT IS ON

MURDER-MAD PIUTE SLAYS PHYSICIAN WITHOUT WARNING

SMITHMAN, Ariz., Nov. 24.—Coroner King and Sheriff Gideon have returned from Gold Bug mill, where Dr. L. W. Gilbert was killed by a Piute Indian named Queho, six days ago. The Indian became estranged from other members of the tribe and started out to kill all the whites he could reach. Gilbert was the first one in his path and was shot down without warning. A reward is offered for the apprehension of the Indian and trailers are now on his track. Piutes are joining in the man hunt.

NO MORE GUNS OFFER TO YIELD

Brazilian Sailors Who Killed Officers Will Surrender if Given Amnesty

CONGRESS DELAYS ACTION

Senate Accepts the Peace Terms Offered by Revolters, and Deputies May Agree

(Associated Press) RIO DE JANEIRO, Nov. 24.—The mutineers on the two Brazilian battleships and scout ships, after defying the government all day, have sent a message offering to surrender. The senate has unanimously approved a proposition for amnesty for the rebels. The mutineers are to be released until tomorrow with the question of amnesty for the mutineers under discussion. It is thought that amnesty will be granted by a small majority. It is said that President Fonseca is disposed to counteract the amnesty as soon as it is granted.

The battleship Santa Paula and the scout ship Bahia have gone outside the bay, but the battleship Minas Geraes has taken a position in the bay off the government palace. The mutineers turned their guns on the loyal ships and also threw a few shells into the city soon after the uprising. Several officers were killed. The bodies of the slain officers were thrown on shore. Fighting continued through the night, but the revolters remained in possession of the two vessels.

Congress was summoned in session at 1 o'clock this afternoon to deal with the situation. The censorship is strict and details of the trouble cannot be cabled at this time. It is officially stated that the trouble is not of a political character and should be described as a mutiny among the sailors to enforce certain concessions from their officers rather than a revolt against the administration of President Fonseca. The sailors demand more pay and less work.

SAILORS OF BRAZILIAN WARSHIPS START MUTINY

Captain and Two Officers Killed During Insurrection

(Associated Press) RIO DE JANEIRO, Nov. 24.—About 10 o'clock at night Nov. 22, as Captain Minas Geraes, commanding the Minas Geraes, came below from dinner on board the French training ship Daguay Trouin, he heard a violent uproar and a fusillade of shots. It was the crew of his vessel, who had revolted.

The insurrectionary movement then broke out on the other night. The mutineers were taken to the Sao Paulo and on the scout ship Bahia. All the officers having been landed, a sailor of the first class named Joao Candido took command of the squadron.

Ammunition was provided, provisions were requisitioned and a coal depot on the Isle of Vianna was taken. Vessels were prevented from transporting coal destined for the French steamer Atlantique and the English steamer Oronosa.

The government refrained from replying to the ultimatum of the mutineers, who moderately severe fire was soon opened upon the city. This continued at intervals all night. The inhabitants of Rio Janeiro were thrown into confusion by the suddenness of the event.

On the morning of the 23d there was further firing upon the city by the mutineers, the shots coming at intervals. Little damage resulted. It has been learned that besides Captain Neves and the two officers, several sailors also were killed. When the mutineers took control of the warships the vessels steamed around the bay, all of them flying the red flag of revolt from the masts. The torpedoes were destroyed and the loyal and anchored in the farthest corner of the bay.

At 7 o'clock on the morning of the 23d the Minas Geraes, the Sao Paulo, the Bahia and the battleship Marshal Floriana crossed the bar and fired on the fortress, which refrained from responding. Surprise was expressed at the precision with which the giant fighting ships were handled by their sailor crews. It was difficult to imagine the absence of all the officers from the vessels. Once outside the bar the squadron put about and again entered the bay, took position opposite the city and fired the big guns from all quarters of the ships. A shot from a small caliber gun entered a house on Cascatello Hill in the center of the city, killing two children and a woman.

Navy Endorses and Uses Distilled Water

On Practically All United States Battleships the Drinking Water Is Distilled Water. Authorities State It Has a Beneficial Effect on the Health of the Men.

Did you know that distilled water is used throughout the Navy? Such is the case. J. F. Urie, of the Bureau of Medicine and Surgery, U. S. Navy, writes:

"The use of distilled water in the Navy is considered one of the principal factors in the high standard of health maintained in the Navy of today."

That distilled water is best for drinking purposes has long been recognized by those in a position to know. Here in Los Angeles hundreds of physicians use and endorse Puritas Distilled Water. Thousands of patrons all over the world are familiar with Puritas.

Most natural waters hereabouts contain considerable amounts of minerals. These are harmful—cannot be assimilated by the body—are a fertile cause of rheumatic and kidney troubles.

There is no successful method of removing minerals dissolved in water, except by distillation. Our process of distillation is perfect. It distills the water twice, producing an absolutely "soft" pure water. To make the distilled water sparkling and pleasant to drink, we aerate it with pure ozone, securing this by passing a current of electricity through filtered air. Puritas is bottled in clean glass demijohns so carefully that it reaches you with all its wholesome purity intact.

If you are not now using Puritas, you can see that it is a matter of common sense to do so. The expense is trifling. Five gallons cost but 40 cents, delivered within the old city boundary lines. At outside points the cost is a trifle more, owing to the long haul. Regular Puritas customers purchase Coupon Books, thus securing the pure water at a discount. When you telephone, ask us in these. Home 1953, Sunset, Main 819.

Puritas is obtainable at most towns in Southern California. If you are unable to find it readily, accept no substitute. Just write us and we will see that you are supplied. Los Angeles Ice & Cold Storage Co.
