

PLENTY OF WATER HELD IN RESERVE

Mulholland Has More Up His Sleeve Than Is Carried in Owens River

CITY OWNS MINERAL SPRING

Profits from Sale of the Product Would Pay Bonded Indebtedness of City

"Look up Bill Mulholland's sleeve and you will always find water," has come to be an axiom in Los Angeles. And Mulholland's sleeve is pretty wet, for he is carrying creeks, rivers and mighty reservoirs up there that the public generally does not know about.

Mulholland says he can deliver 20,000 miners' inches of water through the aqueduct into the distributing system of Los Angeles from the Owens river, and that appears easily possible, for there are now 23,000 miners' inches in the Owens river at the intake and this is the driest time of the year in the valley.

But the aqueduct can be filled from the water up Mulholland's sleeve alone without taking a drop from the river, if it is found necessary to do so. The public in general knows something about Division creek, which is almost opposite the intake twelve miles north of Independence, and it knows something about Cottonwood creek, which runs into Owens lake directly without the agency of the river, for these two creeks are now being used for the development of power and are assisting to build the aqueduct. But the public does not know that down every canyon and crevice of the high Sierras divisions as large as Cottonwood and Division, and some of them larger, go plunging into the gravel beds at the base of the mountains. Shut your eyes and drive a pipe down anywhere in this gravel bed that extends for more than 150 miles and you will get a flowing artesian well of the purest snow water. Mulholland and his men have done this in a number of places just to prove that it can be done and not because the water is needed.

CITY OWNS THE RIGHTS

And the city owns the water rights of all these creeks. But little of this water now finds its way into the Owens river. It percolates down the slope, under the soil and makes Owens valley a fertile spot. It has no well defined channels and does not show on the surface of the ground. It is sucked up by the roots of the grass and much of it evaporates without doing any real good. This water can all be retained in canals and sent into the Owens river to swell the supply for Los Angeles. This water is melted snow of the mountains and its flow is not regular. In the summer these streams that bound down the mountain side in cascades carry such volumes of water that they cannot seep under the ground as they are doing now, but flow in torrents over the surface, so deep and turbulent that they can hardly be rivulets, but now there is need of evidence of them except some sluggish little rivulets in the summer channels and the brilliant green of the grass through Owens valley.

But there is one spring of water up Mulholland's sleeve that he intends to keep there if it drops him. If the city ever cares to build a municipal sanitarium or bottle the water and sell it, this spring alone would soon pay the interest on the bonded indebtedness of the city. It is unusually heavy in citrate of magnesia and expert chemists have pronounced its medicinal value great. The same kind of water, flavored with a little lemon juice, is sold at the soda fountains in Los Angeles from a half pint bottle. This spring is south of the intake, but so far away from the river that practically none of it flows into the water that will be consumed in Los Angeles.

ONLY ONE MINERAL SPRING

The flow of the spring at its source is about in the same place as the Owens river as a meadow brook would be to the mighty Mississippi, but it is large enough for medicinal purposes if the city ever cares to employ such a project. This spring was discovered while boring one of the artesian wells that have been sunk in the floor of the valley in the vicinity of Independence. It is the only one of the kind that has been found, for the rest are the purest of artesian water.

There is a geological reason for this spring, and Mulholland knows what it is. Those who look upon Mulholland as an unlettered because in his youth he had not the advantages of education that the ordinary American boy has today will have to look again. By dint of most persistent study he has acquired a good practical education that makes him one of the best water engineers in the country, and because geology is an essential feature of water supply, Mulholland has learned geology thoroughly.

For the study of geology Owens valley, with its faults that have produced the high Sierra and the folded Inyo range, the prehistoric torrents of black lava that has given a name to Black Rock spring and the extinct volcano craters that start from the sides of the mountains, is one of the most easily read and interesting of geological subjects.

RIVER WATER IS PURE

The intake of the aqueduct, the point where the Owens river is diverted from its natural, crooked channel into the canal of the aqueduct, is twelve miles north of Independence, at the base of a mountain called Charley's Butte. Charley's Butte is a solitary spur of the Inyo range on the east side of the valley. From this point to the Division Creek power house across the Owens valley is a pleasant ride of about fifteen minutes in desert-going automobiles.

At the intake the Owens river is pure, soft water. The mineral content is less than half that in the water now used in Los Angeles and it will be even purer when turned into the city's distributing system than it is at the intake, for it settles in the Halverson reservoir. The river carries some silt, especially in the summer months, when it is being fed by freshets from the mountains, but before it reaches the mouth of Angelenos the water must go through a series of reservoirs, the first of which is the monster at Halverson, sixty-seven miles south of the intake. The water will settle itself in this reservoir in wonderfully quick time, as is shown by its action in Owens lake. Though the Owens river be ever so muddy in the spring it becomes clear and limpid as a mountain stream before it has passed into the lake half a mile.

The water flows through uncemented

Scenes Along Aqueduct, Showing Progress That Is Being Made in Bringing Owens River to Los Angeles

ABOVE (AT LEFT)—OWENS RIVER AT INTAKE. RIGHT—STEAM SHOVEL ON MOJAVE DIVISION. BELOW (AT LEFT)—DIVISION CREEK POWER PLANT. RIGHT—CONCRETE PLANT AT SOUTH PORTAL OF ELIZABETH TUNNEL

ditch, cemented ditch and tunnels before it reaches the Halverson reservoir. This reservoir is a natural depression in the earth that looks as if it were capable of holding all the water in the world. The water can be poured into this hole in any quantity and from this point will be regulated the expected 20,000 miners' inches which will flow into Los Angeles daily.

RESERVOIR IS LARGE

When this reservoir is full the Owens river can stop running for three months and the daily 20,000 miners' inches can still be sent through the Los Angeles distributing system. The lay mind can get an adequate idea how vast is such a quantity of water when it is explained that one miner's inch is equal to a flow of nine gallons per second.

Halverson is one of the busiest points on the line of the aqueduct. To complete the natural reservoir a dam is being constructed that is one of the largest of its kind in the west. This dam is to have a clay core wall and an excavation to bed rock, ninety feet below the bottom of the reservoir, is being made for this wall. Bed rock has been struck on both ends of the dam and it is now being worked towards the center.

The tufa mill is also located at Halverson, for part of the hills that form the sides of the natural reservoir are formed of tufa. Tufa is a soft white rock, much like clay, and is used to mix with cement. In using this tufa the aqueduct department has gone back to the days of the Romans who built famous aqueducts that still exist. The aqueduct cement is made at the municipal cement mills at Monolith, west of Mojave, and the quantity to be used on the northern end of the aqueduct is sent to Halverson, where it is mixed with the tufa. Besides getting a superior grade of cement, mixing with the tufa saves many thousands of dollars in freight haul. It costs an even dollar a barrel to haul cement from Monolith to Halverson.

CUTS COST IN HALF

So when 1000 barrels of cement are sent to Halverson they are mixed with 1000 barrels of tufa, resulting in 2000 barrels of cement at a cost of only 50 cents a barrel for freight. Mulholland estimates that nearly \$200,000 will be saved in freight alone by using tufa in place of neat cement.

Tufa cement has been used largely in Germany and other foreign countries, but it had entered little into construction work on this continent because it was supposed that only in Germany could be found deposits of tufa. But when the line was laid for the aqueduct it was found there was plenty of tufa on land owned by the city.

Results of more than 10,000 tests conducted by aqueduct experts have shown that up to ten days neat cement sets better than tufa cement, but after that time the tufa product is much harder than the pure Portland article.

The reports that have reached Los Angeles that the cement work was inferior have been due to the fact that those who made the reports were not familiar with the character of the cement, and compared the neat and tufa cements soon after they are laid instead of testing both when a month old. Mulholland has heard these reports of inferior cement and he has tried to find where it is.

WANTS TO BE SHOWN FAULTS

"I'm a good deal more anxious than anyone else to find out if any of this cement work is bad," said Mulholland. "And I would be very grateful if those who say they know would point it out. But I've taken picks and dug at it all along the line and I can't find it."

Although lack of funds has made it necessary to shut down several of the steam shovels, some of these monster devices are at work on the Olancha division near Halverson and at other points on the aqueduct. The rapidity with which the aqueduct has been built can be understood when one sees these monster guilts gnawing great chunks of Owens valley and Mojave desert in their yawning jaws. The efficiency of the steam shovels in this work is due largely to improvements in the Olancha division near Halverson and now the Marlon company is turning out shovels for the Panama canal that are built on Mulholland's ideas.

PASTORS CONDUCT FUNERAL

OF THE REV. J. W. SHOAF

Impressive funeral services were held yesterday morning in Trinity church, South of the body of the Rev. James Watts Shoaf, former presiding elder of the Los Angeles district Methodist church. The Rev. R. P. Howell, pastor of the church, officiated at the service, assisted by twenty ministers of the district, who spoke at the various phases of the life of Dr. Shoaf.

The pallbearers included: Nathan Newby, B. A. Holmes, J. O. Leland, J. A. Campbell, D. P. Boyce, Dr. C. C. Stephens, E. J. Moore, G. A. Oiler and J. P. Martin.

STRANGERS IN THE CITY

Strangers are invited to visit the exhibits of California products at the Chamber of Commerce building on Broadway, between First and Second streets, where free information will be given on all subjects pertaining to this section.

HARDER TO RUN AUTO THAN FLEET, SAYS FIGHTING BOB

Admiral Confesses He Has a Lot to Learn About Car

"I find it a blamed sight harder to run that machine than to run a whole fleet of warship," said Admiral Robley D. Evans, pointing proudly to his new automobile in front of the Alexandria hotel yesterday. "I am learning how, but it's rather a complicated affair, and right now I'm on the way to get the man who sold it to me to get a few more pointers."

"I am my own chauffeur, and that helps. In fact, it has taught me a lot about the thing, but I realize there is a lot more to learn."

A month ago, Evans bought the auto some months ago, and ever since has been trying to learn it thoroughly. He came to Los Angeles to attend the banquet of the Loyal Legion at the Alexandria last evening. He has been visiting in Coronado.

CITY BRIEFS

By chance the other day I overheard two young men talking. Conversation was on Christmas. Both seemed undecided as to what would be a nice gift for their best girls. A chum of the girls happened along. "You know," he said, "why, boys, what are you looking so serious about?"

One of them spoke and said, "We are debating what to buy Marjorie and Lucile for Christmas." "That's easy," said the young man, "buy them a pair of opera glasses." "Where will we find the opera glasses?" "That's easy," said the young man, "buy them a pair of opera glasses." "Where will we find the opera glasses?" "That's easy," said the young man, "buy them a pair of opera glasses."

Let me tell you just what they are looking for. Beautiful pair of opera glasses. "Where will we find the opera glasses?" "That's easy," said the young man, "buy them a pair of opera glasses." "Where will we find the opera glasses?" "That's easy," said the young man, "buy them a pair of opera glasses."

Finally a newspaper man with his faithful camera assistant at his heels went up to the room to unearth him. There the mystery was explained. An old friend of William P. McKenzie of Boston, who is here on a lecture tour, decided to see him, had written on the card the well-known name and sent it to Mr. McKenzie as a joke.

The reporter and photographer were satisfied with the card as a souvenir.

Does Your Roof Leak?

A roof that leaks causes no end of trouble beside a lot of damage. You cannot get a good weather and waterproof roofing for your building from a poor roofing. Unless your roof is right, there is no peace of mind for those who live under it. The best way to protect yourself from these unnecessary troubles is to ring up the manufacturers of "MALPHOLD" roofing. The Paraffine Paint company, who will be pleased to make estimates and examinations, free of cost to you, by men who know 213 North Los Angeles street or 516-519 Security bldg. Home 10462, Main 3974.

Smoking jackets and gowns are now ready for Christmas. Early buyers may have garments set aside for them by the payment of a small deposit. Wonderfully handsome and low priced. Show—and hear strong values. Come in and make yourself at home. We are glad to show you. Harris-Frank, 437-443 South Spring street.

Miss Katherine McGowan, hair and skin specialist, announces removal of her business from 915 West Eighth to 233-4 Consolated building, southwest corner Sixth and Hill. Phone F1467.

The day before Thanksgiving was truly a busy one at M. Fredericksen's, a constant stream of people going in and out, all on the same errand—to have a hair dress. Women have settled it in their own minds that there is only one place.

Miss Jefferson wishes to inform her customers of the removal of her toilet parlors to room 600 Parmelee-Dohrmann bldg., 444 S. Broadway. F1080.

Truit Millinery, formerly located on South Spring street, now at 213 West Fifth street, opposite Hotel Alexandria. Inspect our goods, get prices.

Dr. George E. Hathaway, dentist, announces his opening in the Consolidated Realty bldg., corner Sixth and Hill. Phone F1462.

Mrs. Freeman, 752 S. Figueroa street. Real homemade mince pies and fruit cake. Phone F613.

City Steam Carpet Cleaning works. Main 427, F6120. John Bloeser.

Dr. Harwood, Dentist, returned. F6634.

HARRY ST. CLAIR, Nerve Specialist and Chiropractor. If suffering with any sort of nerve trouble, see him. "He removes the cause." 423-4 Bumiller Bldg., 430 S. Broadway.

'QUACK! QUACK!' IS HEARD AT BLUE GOOSE BANQUET

Chicago Gander Quits Nest and Attends Local Lodge

A feature of the regular meeting of the Ancient and Honorable Order of the Blue Goose and the Southern California and Arizona Special Agents' association, composed of insurance men, was a banquet at the Hotel Mount Washington last evening. The meeting was held at the hotel in the afternoon. Two new members were taken into the order and numerous plans were discussed.

T. H. Williams, general adjuster for the George H. Tyson agency at San Francisco and most royal grand gander of the Chicago grand nest, was present. He holds the highest office of the order. He still retains his membership in the Los Angeles order.

A report of the recent grand nest meeting was given by Mr. Williams, and also an outline of the plans to be followed by the association during the coming year. E. O. Flack, a delegate from the California order, also gave a short review of the meeting.

While there is a lodge in every state in the Union, California is the only state which has two. In January it is the intention of the Golden Gate pond of San Francisco to entertain the California state pond and the Washington pond in a joint meeting at San Francisco.

'ROCKEFELLER, JR.' ON CARD EXCITES THROUG IN HOTEL

Friend of Eastern Visitor Plays Joke at Van Nuys

Clerks, bellboys and loungers at the Van Nuys hotel, fact, every one who happened to be in the lobby at the time—were startled yesterday evening by the appearance of a "Rockefeller" card. It was a card of a guest at card bearing the signature "John D. Rockefeller, Jr."

The clerk gave the alarm, although involuntarily. When he first picked up the card and read the name he nearly fainted. The news spread rapidly, and before the man was out of sight in the elevator a crowd had collected. Some waited patiently; others craned their necks up the elevator shaft in an effort to catch a glimpse, while others went outside and looked up at the window where the august personage must be.

Finally a newspaper man with his faithful camera assistant at his heels went up to the room to unearth him. There the mystery was explained. An old friend of William P. McKenzie of Boston, who is here on a lecture tour, decided to see him, had written on the card the well-known name and sent it to Mr. McKenzie as a joke.

The reporter and photographer were satisfied with the card as a souvenir.

Your Christmas Holidays

Why Not Spend Them In OLD MEXICO

Special train consisting of Pullman vestibled sleepers, observation car, library, parlor, clubroom, etc., and dining cars will leave

Los Angeles, December 15, for Mexico City. Round Trip \$70 from Los Angeles.

Proportionate Low Fares from Principal Stations in California. Tickets will be limited to 60 days, allowing time for excursionists to visit many points of interest outside of Mexico City. The return trip from El Paso, if desired, may be made over the Santa Fe and upon payment of \$6.50 additional a stopover at Williams for the Grand Canyon may be obtained.

Make Reservations Early. Excursion Party Limited. For Further Details See Agents

Automobiles. Sweetest Carriages and Livery Rigs in the City, including Tally-Ho.

FEBRUARY MAY BE AERO CLUB DATE

Organization Receives a Request That Local Contests Be Held After Northern Meet

WOMAN PILOT SENDS TERMS

Aerial Exhibition Under Private

Auspices Is Scheduled for

Month of January

Plans for the announced aviation meet, to be held here some time this winter, under the auspices of the California Aero club, are again in a somewhat chaotic condition as a result of two difficulties, the first and most important being a lack of money with which to finance the project. This obstacle, however, the club hopes to meet through the organization of a business men's committee, which is expected to make arrangements for meeting the expenses. This committee will consist of twenty men selected from the city at large, together with five representing the California Aero club. The club members are H. L. Vining, George B. Harrison, Earl Remington, Charles E. Rillet and Buel H. Green. Mr. Rillet is named as treasurer and Mr. Green as secretary.

The second obstacle in the way of the meet as already planned developed yesterday when a request was received from San Francisco asking that the Los Angeles contests be postponed until after the meet of the city by the Golden Gate, which will be held from January 15 to January 21. This request probably will be granted by the local committee, and the meet here be set for February 7 to 13.

Meantime, it is said, arrangements for another meet, to be conducted under private auspices, are making good headway, and that whether or not the Aero club plans mature, Los Angeles will have at least one big meet which will bring here the foremost of the world's air men. An official of the Pacific Electric road said yesterday that this meet would be a real "hot" one, and that several of the best known American and European aviators already are under contract to come here, and that they will not be seen under any other auspices. The big meet will be held in January, with perhaps a preliminary elimination contest next month for flyers who still have their reputations to make.

The California Aero club has received letters from three English aviators—

U. S. DISTRIBUTES SEEDS

The congressional seed distribution bureau gave out garden seeds yesterday afternoon through the Los Angeles chamber of commerce. Many people availed themselves of the opportunity to secure seeds free of cost.

STARTS FIRE; PENALTY \$50

Charged with setting a fire at Annandale, northeast of this city, Charles Webster was fined \$50 in Justice Baird's court yesterday. Webster was arrested by County Fire and Game Warden W. J. Dunn.

TO HOLD REVIVAL SERVICES

The Rev. John T. Stivers will open a series of evangelistic meetings today at the Boyle Heights Christian church.

RUPTURE

Dr. Joseph Fandrey, European Specialist in Rupture Curing

I cure all kinds of curable rupture, no matter how severe nor how long standing, or the age of the person. No operation or injection, no detention from business or hard labor. My original method, an old heirloom, was left to me by my grandfather, who was a physician. The cures are the best proof, and through them my name is well known both in Europe and America. Alone in Los Angeles and surroundings are hundreds who are today cured by my method. They have no more use for trusses or bandages of any kind. The names and addresses of those cured can be seen at my office. Remember that a rupture can be cured without first being examined, as there are no two ruptures alike. Protection, Relief, Comfort, I give at once, before the patient leaves my office. But further instructions must be followed strictly to finish a permanent cure. Office, 1421 Santee street, Los Angeles, Cal. Phone Broadway 4214. Lay attendant for ladies.

Hours: 9 to 12 a. m., 2 to 5 p. m. No office on Sunday.

At druggists; or by mail, postpaid. If your druggist cannot furnish Electropodes, send us \$1.00 and we will see that you are supplied immediately. State whether for man or woman.

Sold Under This Contract

The purchaser of Electropodes is granted the privilege of returning them within 30 days, and the purchase price (\$1.00) is to be refunded upon the following conditions: They are to be worn according to directions for at least 20 consecutive days, and then returned in original box. DOG SEES PURSE LIKE OWNER'S; TAKES IT HOME. NATURE FAKE? WHAT!

LONG BEACH, Nov. 26.—"Dip" is a water spaniel with a penchant for picking up things. "Dip" will pick up anything from a hot wireawast to a razor-clawed crab. In his daily tour of the beach he came across a handbag, the property of Mrs. Matilda Reynolds of Santa Cruz, which she had placed on the beach beside her as she endeavored to interpret what the wild waves were saying.

The handbag contained \$5. "Dip" is not a financier, but away he started with the bag and coin. The canine's mistress owned a purse similar to the one he had found and merely beat his heart as he trotted homeward, for he could almost taste the reward which he would be sure to receive for the return of lost property.

Meanwhile Mrs. Reynolds discovered her loss and started for the police station. On her way she met "Dip" with the missing bag. A stick of candy proffered to the dog brought him within her reach. There was no need for police action.

Cody, Harding and Gibbs—giving their terms for coming to Los Angeles. The committee also has secured a promise from Miss Martha Niel, one of the three French woman aviators, to come here provided her terms are met. Contracts, however, have not been signed. R. J. H. Hope, manager for Radley, the Englishman, and who also represents Latham, arrived in Los Angeles yesterday to canvass the local situation. Roy Knabenshue, manager yesterday Wright trio of flyers, also is in the city. Neither, however, has signed any contract to bring their flyers here.

FALL INJURES MOTORCYCLIST

While making a sharp turn at Seventeenth and Sixteenth street on his motorcycle yesterday afternoon Jesse Carter, a newspaper subscription collector, was thrown to the street when his machine skidded. He was taken to the receiving hospital in a dazed condition. An examination showed a slight fracture of the left forearm.

CHRISTMAS BAZAAR PLANNED

A Christmas bazaar will be given next Thursday afternoon at the Boyle Heights Christian church. The affair will be held during the day and evening. Lunch and dinner will be served.

The Rev. John T. Stivers will open a series of evangelistic meetings today at the Boyle Heights Christian church.

Electropodes

TRADE MARK—REG. ZINC PLATE NEGATIVE

For Rheumatism and Nervousness—No Cure, No Pay

Rheumatism—Cause and Cure

Too much uric acid in the system is the cause of Rheumatism, Nervousness, Kidney and Liver Troubles, Neuralgia, Backache and many other complaints. This excess uric acid is a poison—which destroys tissue, retards circulation and weakens the vital organs.

The only remedy is to eliminate this excess uric acid. The quickest, surest and best way to do this is by wearing Electropodes. These remarkable galvanic insoles remove all poisons and impurities from the entire system—leaving the blood, nerves and tissues in a strong, healthy condition—and every organ free and able to perform its functions properly.

One man writes from Texas: "I have used two pairs of Electropodes. They cured me of a very severe case of Sciatic Rheumatism." Another in California writes: "I give Electropodes credit for curing my brother, in two weeks, of a case of Rheumatism of long standing." Electropodes are sold under a positive binding contract to return your \$1.00 if they prove unsatisfactory.

At druggists; or by mail, postpaid. If your druggist cannot furnish Electropodes, send us \$1.00 and we will see that you are supplied immediately. State whether for man or woman.

Sold Under This Contract

The purchaser of Electropodes is granted the privilege of returning them within 30 days, and the purchase price (\$1.00) is to be refunded upon the following conditions: They are to be worn according to directions for at least 20 consecutive days, and then returned in original box.
