PACIFIC HOME BUILDERS

Marvelous Los Angeles

THE story of Los Angeles as told today is a most wonderful one, one that has caused the entire world to marvel, and hundreds of thousands to select the Wonder City as the one place in which to labor, enjoy life, and make money.

The story of today will fade into insignificance with the lapse of another decade.

The marvelous achievement of the past with its 211 per cent increase in population and millions of dollars in homes and business blocks, the development of manufacturing industries and latent resources of this wonderland, will be but a reminiscence in the view point of ten years from now.

At the present time one can safely say there are 350,000 people in Los Angeles, and of that number almost every one is progressive and optimistic as to the future greatness of the city.

That simply means continued advertising, in the way of letters to friends back East, who annually have to do battle with seven months of disagreeable weather. Every live agency in Los Angeles today is a booming one, every resident a patriotic booster for Southern California.

With the deepening of the harbor and the completion of the Panama Canal will come increased trade that today cannot be calculated, with this will come new industries, which will provide labor for thousands of skilled artisans who will help to build Los Angeles from the mountains to the sea.

Thousands and thousands of homes will be built to house the increased population, and Pacific Home Builders will be a material agency along this line.

The plan adopted by this corporation embraces many not in force with other companies and every effort will be made by the experienced, practical men comprising the board of directors to make Pacific Home Builders a success, not only as a money making institution but one whose work will be accepted without protest on account of poor workmanship.

This plan is one that interests you, or should do so, and the officers of the company will gladly explain every detail of their progressive plan of campaign for business and the building of homes.

You owe it to yourself to investigate Pacific Home Builders.

Pacific Home Builders

Now offer a limited block of stock at
60 Cents Per Share

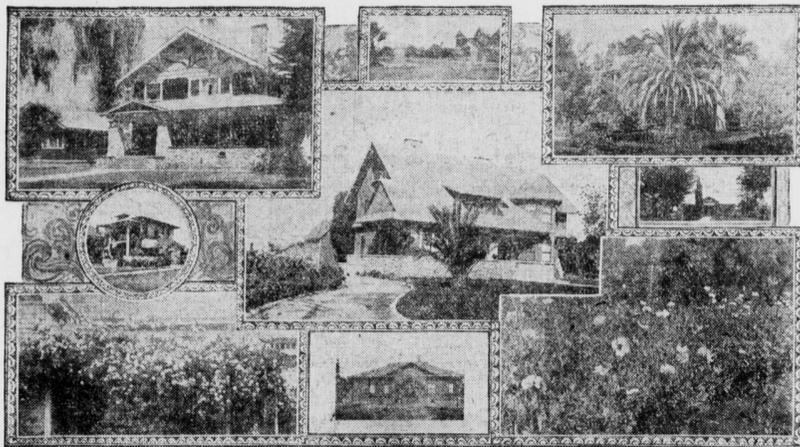

The par value of which is \$1.00 per share.

If you are looking for an investment, look no further.

This offer holds good for a short time only and the company reserves the right to withdraw the stock from the market at any time.

Buy Pacific Home Builders stock now at the low price, as the price will advance in a very short time.

If It's Worth Doing, It's Worth Doing Now

UNTIL very recently it was the custom when plans had been prepared for a house to hunt up a contracting carpenter, who after days of figuring gave his price and the contract was let without a thought as to how cheaply the contractor could buy his lumber, shingles, hardware, glass, etc., whether his credit would be such as to enable him to finish the work or not, and often without any time limitation.

Now all is changed. When figuring on the erection of a house the wise builder goes to a building company, one that can buy in the open market at lowest cash prices and is thus enabled to quote a much lower figure for a finished job. What the carpenter of other days could dream of in days gone by, not only can the successful building company name a lower price but can deliver to the buyer a home that is finished.

If you contemplate building the Pacific Home Builders will be glad to figure on your work and guarantee satisfaction in every detail.

The Development of Only One Corporation

MANY corporations after attaining success along well beaten paths, seek still further profit, through the organization of subsidiary companies which may or may not prove as successful as the parent company. Pacific Home Builders have one end in view, the development and full success of Pacific Home Builders with no secondary thought as to side issues.

The stock of Pacific Home Builders is now selling at a little more than one-half its par value, because the directors wish to give the stockholders an opportunity to share in the appreciation of the stock as time goes on. The company has under construction a number of buildings, to say nothing of those completed, and today is as optimistic about its future as the most enthusiastic could demand.

The company now has under consideration a project that will be a great factor in its future growth and prosperity, but nothing will be said touching this matter until all plans are matured, when a material advance in the price of stock will be announced.

Years ago with the lax laws and the failure to bond the officers of corporations, the investing public often hesitated in going into new ventures but today it is only by investing in new organizations based on actual value with its officers bonded that the small investor has any reasonable chance to make profitable investments.

Pacific Home Builders have something of worth to offer the small investor as well as the man of capital. The working plan of the company protects the small investor with the man holding a large block of stock and this equitable plan meets with ready favor on the part of those who have carefully investigated Pacific Home Builders plan.

Whether you contemplate building a home or wish to make an investment, we invite you to call at our offices where every feature will be explained in detail and you will be given every opportunity to prove that Pacific Home Builders have something a little better than the ordinary to offer you as an investment or can save you money if you are going to build a home.
