

1—Anzac artillery moving to the front in Palestine in General Allenby's victorious drive against the Turks. 2—Bags of fruit pits at a government plant where charcoal is made for gas masks. 3—Gen. Hugh Scott, commander at Camp Dix, testing some of the apples grown in that camp's great war garden.

D'ANNUNZIO'S LEAFLETS FLUTTER DOWN ON VIENNA

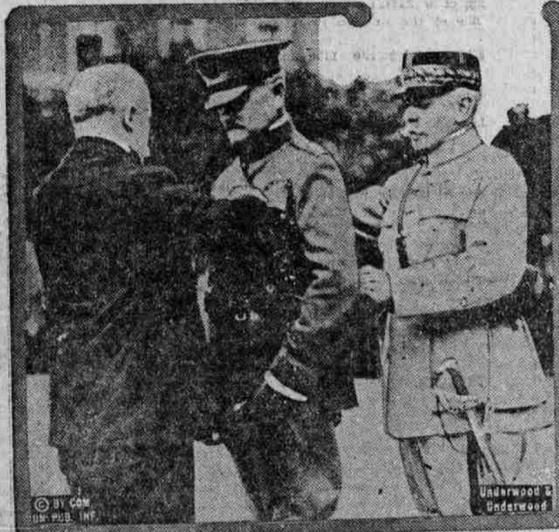

A remarkable photograph taken from the airplane of Gabriel d'Annunzio, the Italian poet, who, flying over Vienna, dropped leaflets upon the city containing information as to the true state of affairs which is being kept from the people of Austria.

HOME OF CHRIST TAKEN BY BRITISH

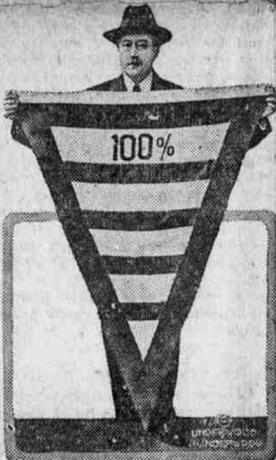

View of Nazareth, the boyhood home of Christ, which was taken by the British expedition under General Allenby that has routed the Turks.

LEGION OF HONOR STAR FOR PERSHING

General Pershing being decorated with the star and the ribbon of the Legion d'Honneur by President Poincaré. General de Terge is standing at the right.

INDUSTRIAL HONOR PENNANT

This is a reproduction of the Industrial Honor pennant, red border, four blue stripes and the percentage in red. This will be used throughout the United States in the fourth Liberty Loan campaign.

All business firms or organizations will have an honor roll and when 75 per cent or more of their employees or members subscribe to the loan they will be furnished a card-board emblem for display in their windows, this emblem to indicate the percentage of employees of the firm or organizations that have purchased Liberty bonds. Each institution winning this emblem will be permitted to purchase, through the local Liberty Loan committee, the Liberty Loan Honor pennant with the percentage mark on it. This Industrial Honor pennant was originated by J. H. Burton of New York, who is connected with the Liberty Loan committee of the treasury department in Washington. He has trade-marked the pennant at the patent office and assigned all rights there to the secretary of the treasury, so that it may not be reproduced or used without specific permission from the Liberty Loan executive committee of the federal reserve districts.

Sailor's Vocabulary.

The sailor lad has a vocabulary quite his own, by the way. Recruits are "regrets;" later as common seaman they are "gobs." Food is "chow" and ketchup is "red lead." "Binnacle list" means the sick list. The guard-house is called a "brig." Instead of reveille he says "rise and shine," and when he tires of noise he calls out "pipe down." "Leave" for the army is "liberty" for the navy. Two cats they have named "Pay Day" and "Extra Duty." It is not hard to guess which of the two is more popular.

FEWER ACCIDENTS AMONG WORKERS

Number of Fatalities Has Been Reduced One-Third in the Last Five Years.

MINOR MISHAPS AT MINIMUM

Result of Educational Campaign Has Been Most Gratifying—Safe Practices and Safety Thinking Spreading Among Employees.

The number of fatal accidents in the United States has been reduced one-third in the last five years and the number of less serious mishaps has shown a still greater reduction. W. H. Cameron, general manager of the national safety council, told delegates to the seventh annual Safety congress, held at St. Louis.

"Five years ago the most accurate statistics available showed that 35,000 men and women lost their lives every year through industrial accidents," he said. "Hundreds of thousands suffered accidents of a more or less serious nature. Industrial accidents reached the enormous total of 2,000,000 every year.

"Beginning with a handful of young engineers the safety council has grown until nearly 4,000 of the largest business institutions are grouped in a co-operative, nonprofit-making organization devoted solely to conservation of man power.

"If safety was entirely an engineering problem the task of preventing accidents would be simple. Mechanical safeguards are excellent things, but no piece of mechanism has ever been made 'foolproof'.

"Safety implies education, and the acquisition of safe practices and safety thinking by the workman is as important as sound business judgment.

"When you hear a plant representative say his organization has touched 50 per cent improvement in safety conditions, then you know the educational safety factor is working among his men. When 75 per cent is reached his employees are thinking safety."

GENERAL LABOR NEWS

Normal conditions prevail in the Shamokin anthracite fields of Pennsylvania, according to reports to the fuel administration from James B. Neal, director of production. "The critical labor situation in the anthracite coal mining districts has passed," says an announcement. "The great majority of the 30,000 mine workers who were out have returned to work and will loyally await the decision of Fuel Administration officials in regard to their plea for an increase in wages. Of the 26 collieries that were affected, practically all are operating again. Advances to the fuel administration indicate that normal conditions throughout the anthracite fields will obtain by Friday morning.

Ten thousand five hundred employees of the Calumet & Hecla and subsidiary mining companies will benefit in a wage increase effective October 1. The new minimum wage for miners ranges from \$4.80 to \$5 and trammers \$4.80 per day. Employees of all departments of the mines, mills and smelters get raises from 10 to 30 per cent. The Wolverine and Mohawk companies, with 1,000 employees, announce the same schedule.

According to a ruling made by John Callahan, government draft inspector, men on farms well provided with female workers are not to be exempted on agricultural grounds. The decision was made in the case of a Marshall county (Kan.) farmer who has three sisters. Callahan decided the women were capable of running the farm and the man was placed in class 1.

At a general meeting of the crafts employed at the mines at Butte, Mont., recommendation was made that the strike of miners and others called by the Industrial Workers of the World be abandoned. The Metal Trades council asked the miners after they returned to work to unite in a plea for government control of the mines.

Fifty-six women began work in the mailing department of the Chicago post office, the first time women have been employed in that department, Postmaster Carlie stated. War time necessities, he added, made their employment necessary.

Threatened labor difficulties at the Bethlehem (Pa.) steel works have been averted by a promise from the company to obey an order from the war labor board to put into effect immediately the board's award in the wage controversy.

Substantial wage increases, an eight-hour day and time and a half pay for overtime labor were granted the operators of the Canadian Pacific Telegraph company by the labor committee of the Canadian railway war board.

Nearly a thousand garment workers went on a strike at Rochester, N. Y.

Mine workers who have gone into other industries because of the higher wages offered are to be urged to return to the mines as patriotic duty. This was announced by the employment service of the department of labor.

The British cotton mills strike has ended. Executives of the spinners' union announced that work would be resumed on the understanding that an investigation committee will be appointed as promised by Premier Lloyd George.

MORE IN PRODUCTIVE WORK

Estimate That 100,000 Registrants Were Affected Under the Order to "Work or Fight."

An official estimate that 100,000 registrants had been forced into productive employment through operations of the draft "work or fight" rule was made by Provost Marshal General Crowder. It is expected that a number equally as large will be turned over from nonproductive to essential employment when the rule is applied to the 13,000,000 registrants enrolled in the eighteen to forty-five draft classes.

Since there will be a larger percentage of men in the upper draft ages given deferred classification, it is probable a large number will be required to take up war work jobs to retain this deferred classification.

Of the first draft, General Crowder's figures show that up to August 25, 52,826 registrants in 44 states had been halted before local boards on account of idleness or nonproductive occupations.

MINOR LABOR NOTES

Women butchers are among the innovations brought about at Rhinelander, Wis., because of the war. When Mrs. Frank Durand, whose husband operates a market, learned that the latter could not obtain sufficient help, she donned a cap and apron and proceeded to demonstrate that she knew how to cut meat with the best of them. She is a permanent member of the market force now.

For the first time in the history of the pottery business, women are to be employed to fill the places of men made vacant by the draft. One pottery at East Liverpool, Ohio, advertised for forty girl mold runners. They will be paid \$2.50 a day when they have learned the job. Heretofore women have been employed only in the warehouse and decorating departments.

Increased production of war supplies through training of workers, distribution of more skilled workmen and ascertainment of methods of rendering the present labor supply sufficient are the aims of a new branch of the department of labor. In the training of workers, it will co-operate with the federal board for vocational education and with school authorities.

The number of unemployed in Dublin, Ireland, during the winter months has increased during the period of the war, according to a report of the national relief fund. Instead of ameliorating seasonal labor conditions in urban districts the war has accentuated them, the report says. In rural districts there is virtually no unemployment.

Work on the \$1,000,000 power plant being built at Lorain, Ohio, by the Lorain County Electric Co. was resumed today upon receipt of word from the government that a loan of \$500,000 would be made and material furnished. Work stopped some time ago when the company's finances ran low and the government stopped heavy loans.

Investigation of working conditions and wages paid by the telephone industry, now under government control, was ordered by Postmaster General Burleson. This special committee was named to conduct the inquiry and report upon the feasibility of standardizing wages and making improvements.

The charter of the Kansas City local union of the International Brewery Workers of America, which was on strike for a week, for an increase in wage scale, has been revoked, according to Carl Mueller, secretary of the Liberal association, the organization of brewery owners.

President Wilson called upon the Remington Arms company, the Union Metallic Cartridge company, the Liberty Ordnance company and other manufacturers at Bridgeport, Conn., to reinstate all striking employees who seek to return to work in response to the president's demands.

Journeymen plumbers of Salem, Mass., who had been working for 62½ cents an hour, recently demanded 75 cents and were given 72½ cents as a compromise. Master plumbers boosted the price of work to \$1 an hour. It formerly had been 90 cents.

The military commander at Stuttgart, capital of Wuerttemberg, has ordered all female domestics to enroll in the compulsory military service before September 30, according to German dispatches. Only those found medically unfit will be exempted.

The new shop hours, called for under the McAdoo award, became effective in the Grand Trunk car shops at London, Ont., and as a result several hundred workers discontinued the old ten-hour shift and started on an eight and a half hour day.

The Cincinnati police strike was declared off by the policemen September 16. The men went back to work at 3 p. m. when the second shift reported for duty. They went back without obtaining guarantees relative to their demands.

Swansea, Eng., harbor trustees have given all their dock employees seven days' notice after which employment will be from day to day.

Claims for deferred draft classification for all employees, skilled and unskilled, in essential branches of the Lake Superior mining industry have been filed with the draft boards, it was announced.

At a meeting at Springfield, Ill., the executive board of the Illinois district, U. M. W. A., authorized the purchase of \$500,000 of fourth Liberty loan bonds. President Farrington announced.

WOMAN WORKS 15 HOURS A DAY

Marvelous Story of Woman's Change from Weakness to Strength by Taking Druggist's Advice.

Peru, Ind.—"I suffered from a displacement with backache and dragging down pains so badly that at times I could not be on my feet and it did not seem as though I could stand it. I tried different medicines without any benefit and several doctors told me nothing but an operation would do me any good. My druggist told me of Lydia E. Pinkham's Vegetable Compound. I took it with the result that I am now well and strong. I get up in the morning at four o'clock, do my housework, then go to a factory and work all day, come home and get supper and feel good. I don't know how many of my friends I have told what Lydia E. Pinkham's Vegetable Compound has done for me."—Mrs. ANNA METERIANO, 36 West 10th St., Peru, Ind.

Women who suffer from any such ailments should not fail to try this famous root and herb remedy, Lydia E. Pinkham's Vegetable Compound.

Cuticura Soap
IS IDEAL
For the Hands

Soap 2c., Ointment 25¢ & 50c., Talcum 25c. Sample each mail order from "Cuticura, Dept. E, Boston."

Another Discovery.
Among the visitors at Atlantic City yesterday were 1,500 husky soldiers from the Southwestern states, training at Camp Dix. Two big Arizonians in the group, wandering along the board walk, were getting their first near glimpse of the ocean.

They walked down the steps to the beach, watched the waves for a moment and approached the water's edge. There they leaned over, dipped their fingers in the water and put the fingers in their mouth.

"By cracker!" said one, "it is salty, isn't it?"

Indigestion produces disagreeable and sometimes alarming symptoms. Wright's Indian Vegetable Pills stimulate the digestive processes to function naturally. Adv.

Ask the Waves.
The following is part of the diary of a U. S. A. soldier who had promised to give daily accounts of his experiences on board ship:

"Tuesday, 17th, 8 o'clock a. m. Feet-ting fine. Fall of good cheer and porridge."

"Tuesday, 9 o'clock a. m. Still full of good cheer. Minus the porridge!"

Important to Mothers
Examine carefully every bottle of CASTORIA, that famous old remedy for infants and children, and see that it bears the Signature of *Dr. J. C. Fletchere* In Use for Over 30 Years. Children Cry for Fletcher's Castoria

His Last Name.
The teacher was questioning the class in history. "Who is the king of England, Mildred?" she asked.

"George is his first name," came the answer. "His last name isn't in the book, but it begins with a V."—Passing Show.

Didn't Understand.
"Mr. Smith's boy got the croix de guerre." "I always knew that had would come to grief."

Flavor and Energy
BAKER'S COCOA
is a delicious and wholesome drink of great food value and absolute purity.

"Chocolate and cocoa add flavor and energy giving material to a diet and their use will help in many ways in the preparation of palatable, nourishing dishes from those foods of which there is an abundance."
