Mercury on Vessel Bottoms.

MARINE Germicide Paint

THE MARINE GERMICIDE PAINT IS AN ANTI-FOULING compound for IRON, COPPER, or WOOD, an absolute protection against Barnacles, Coral, Sea Grass, Teredos, and all Marine Parasites, and an unfailing preventive of rust on iron or steel.

The success of the Germicide Paint, in San Francisco, New York and the West Indies, has been phenomenal. The U. S. Navy Yard at Mare Island is using Germicide exclusively, after testing it against the best paint. Of 450 tests in 1886, they find that Germicide came out sixteen to one better. It is stated that the Naval authorities at Washington are about adopting it altogether for the U. S. Navy. We have numerous testimonials to prove its efficiency.
