

Remington Standard Typewriter!

WHAT IS IT?

A simple, compact, and durable machine, which successfully performs the work of the pen, with a tremendous saving of time and exertion.

WHAT WILL IT DO?

It produces, with speed and certainty, in clearly legible printed characters, one or many copies of any kind of writing, excepting such as must be done in books.

TO WHOM IS IT USEFUL?

To every one who has writing to do. In business circles its desirability is assured. Lawyers and journalists cannot do without it. Professional and scientific men realize its worth to them. The author and thinker find it invaluable. It conserves the most potent kind of energy—that of the brain—by reducing to a minimum the mechanical labor of writing, and distributing it among all the fingers of both hands. Writer's cramp disappears where it is used. It presents the printed appearance of the work to the mind at once.

WHO CAN OPERATE IT?

Any one of ordinary intelligence. A very few trials enable any one to write upon it readily. Thereafter it is only a matter of practice.

HORSE RAN ON.

How Nap and Dan Logan Did the Volcano.

Nap, the Examiner artist, has visited the volcano, but found the volcano out. Nap had the escort of Dan Logan, the newspaper man, who has for so many years been elve consul here for Nova Scotia. Dan was interpreter—philosopher, friend and guide, if you like. Nap, who is so German that he always leads for the San Francisco \$400 and always with a different belle, tells the story of the trip. Nap has no impediment in the growth of his hair and no doubt thinks he speaks English perfectly, but he calls a "plug hat" a "pluck hat."
Nap tells with fine gusto how he and Logan made the trip from Hilo up the road through Olaa. They hired a horse from a Portuguese and borrowed a surrey from Stacker, the millionaire newspaper publisher. The horse stopped a mile from town. They did everything, but the horse would only study the landscape and give the artist and the pressman a natural laugh. Nap was about to build a fire under the cayuse when Logan came grandly to the rescue by singing the "Star Spangled Banner." The horse ran on till it dropped dead.

A Model Plant is not complete without Electric Power, thus dispensing with small engines.

Why not generate your power from one CENTRAL Station? One generator can furnish power to your Pump, Centrifugals, Elevators, Pumps, Railways and Hoists; also, furnish light and power for a radius of from 15 to 30 miles.

Electric Power being used, saves the labor of hauling coal in your field, also water, and does away with high-priced engineers, and only have one engine to look after in your mill.

Where water power is available it costs nothing to generate Electric Power.

THE HAWAIIAN ELECTRIC COMPANY is now ready to furnish Electric Plants and Generators of all descriptions at short notice, and also has on hand a large stock of Wire, Chandeliers and Electrical Goods.

All orders will be given prompt attention, and estimates furnished for Lighting and Power Plants; also, attention is given to House and Marine Wiring.
