

SO-BOS-SO (KILFLY)

A Liquid Mixture Designed to Protect COWS AND HORSES From Torture by Flies

A Valuable Disinfectant and Germicide.

SO-BOS-SO (Kilfly) is a liquid mixture designed to protect cows and horses from torture of flies. The preparation is positively harmless. It is used with splendid results as a disinfectant and germicide. The Electric Sprayer discharges the So-bos-so (Kilfly) in a fine, broad spray. From 20 to 50 cows can be sprayed in a few moments. The Electric Sprayer is detachable, and thus may be thoroughly cleaned.

If your animals are troubled with lice use So-bos-so (Kilfly). It knocks them out. Spray your poultry house with So-bos-so (Kilfly). It kills lice, or any vermin that may infect the fowls.

FOR HORSES.

So-bos-so (Kilfly) is invaluable as a disinfectant for spraying around the stable; at the same time prevents the irksome torture of flies.

Used with splendid effect on horses while at work, especially draft horses, traveling at a slow pace and oftentimes obliged to stand for long intervals, harnessed to the truck, exposed to the torture of the beastly flies, while the teamster is loading, unloading, or otherwise engaged. Blacksmiths will greatly appreciate the preparation. A moment's work with the Electric Sprayer and a little So-bos-so (Kilfly) will rid the shop of flies, and the horses stand perfectly quiet.

Your use of So-bos-so (Kilfly) will result in more and better milk, more money, more comfort for cows, for horses, and for you.

Kilfly has proved a perfect success in this Territory and until the arrival of large invoices recently, we have been unable to fill all orders. We have now a supply on hand and more on the way.

Sufferers from the HORN FLY should give Kilfly a trial.

We are the sole agents for the Territory of Hawaii.

LANAI IN NEW HANDS

Will Be Made the Largest Cattle Range.

THOUSANDS MORE SHEEP AND CATTLE

Ranges Will Support Vast Herds of Live Stock and Will Be Filled Soon.

Sixty thousand sheep and ten thousand cattle are expected to find food upon the ranges of the island of Lanai. The absorption of the entire island by the Gay & Robinson interest is so nearly complete that already figures have been made by those who will have the control of the land and the immense grazing to be carried on reaches the totals given.

There are on the island of Lanai close to 100,000 acres of grazing land, well watered and capable of maintaining the herds. This estimate has been prepared by such cattle men as Paul Jarrett and others, and the syndicate which will control the estate expects that there will be, within a short time, a herd of these dimensions upon the great slopes of the little island. With the passing of this great area under its new control, the last of the possibly purchasable grazing land has been absorbed, and the cattle industry must soon reach a basis from which computation may be made as to the capacity of the territory to furnish its own food supply.

The lands on the island of Lanai are held in three ownerships. The transfer of the interests of the Hayselden-Neumann-Pain combination to Gay & Robinson, gives to that syndicate control of 70,000 acres, in fee and under government lease. In addition to these holdings which comprise the Walter M. Gibson estate purchases, there is a block of 30,000 acres owned by Claus Spreckels and William G. Irwin. While there is no information obtainable as to the ultimate disposition of these lands, it is said to be a fact that they will at the least, be operated in sympathy with the majority holding of the island.

There has been some question as to the stocking of this new area, for the capacity of the island is not at all taxed to support the present amount of animal life which is found upon the meadows. The sheep number some 16,000 and the cattle are considerable. There will have to be large importations of live stock to give a good start to the new grazing proposition, without robbing the markets at the present time of the food supply. It is understood that there will be new strains introduced and that the breeding of high class animals will be carried on by the new owners of the island.

The fact that the grazing lands of the islands have been gradually taken under strong control and the raising of good supplies given a decided impetus, is due to the fact that the people in the business realize the necessity, with the growing population of the islands, that there should be a greater proportion of the beef raised here. This brought about the combination of the estates which comprise the present Kahikinau ranch, which is now sending, under the management of Dr. Raymond, beef cattle to this city to be sold in opposition markets. The situation is still further complicated by the reports that there are many cattle, thousands it is reported, dying in the Kohala district from lack of water.

The consummation of the sale of the combined interests in Lanai were accomplished during the past week after long negotiation. Mr. Charles Gay, after making two trips here on the business, went home Tuesday and upon his ultimate statement of affairs there was little to be done in the matter. Later it was learned that an agreement was reached. Mr. Henry Waterhouse would not discuss the matter in detail, or mention figures involved. It became gossip yesterday however that the price at which the transfer will be recorded will be in the neighborhood of a quarter million dollars.

DISCUSSING THE CABLE PROPOSAL

NEW YORK, October 3.—A special to the Tribune from Washington says: Attorney General Knox will not have his report ready for submission to the cabinet meeting tomorrow on the proposition of John W. Mackay and associates for the construction of a cable across the Pacific. The attorney general is making the subject that he will be unable to complete it in time for the consideration of the president and cabinet tomorrow. Knox, however, hopes to have his report for the cabinet meeting Tuesday of next week.

The Pacific cable proposition differs from all others in important particulars. It is strictly a domestic enterprise, and is not to touch a foreign shore in its entire length of 7,000 miles from San Francisco to Manila. It is not yet known whether under the most liberal exercise of his general executive authority the president has power to grant the privileges sought by the Mackay people, and if so whether or not power to grant the franchise asked for embraces authority on the part of the president to prescribe the conditions under which the cable is to be operated in order to be entitled to the protection of the government.

In view of these considerations, all of which have been brought to the attention of President Roosevelt and the cabinet, it is considered probable that

the Mackay proposition will not meet with approval when finally passed upon by the president and his advisers. They are, however, all heartily in favor of the early construction of a cable across the Pacific. It is argued that congress, recognizing the great growth of the world's activities in the Pacific and the conspicuous part in them being played by this country at present, will at its coming session this winter, respond more readily to the demands of the changed situation as regards the long mooted question of a trans-Pacific cable. In fact, it may eventuate in congress authorizing the construction of a government cable, in order to secure the cheapest tolls practicable.

WASHINGTON, October 4.—At today's cabinet meeting the matter of granting the application of the Postal Telegraph Company for permission to land at San Francisco, Guam, Honolulu and the Philippines a cable to connect all of the United States' new possessions in the Pacific, was discussed, the attorney general stating that one week from today he would be prepared to place before the president his opinion on the question of the president's right to grant the application should he decide to do so, together with a statement showing what steps congress has taken in the matter and the precedents for executive action.

THE LAW OF LOVE.

Concluding Sermon of the Series on the Manliest Man.

The last of the series of sermons in the consideration of the character of Christ, "The Manliest Man," by the Rev. W. D. Westervelt, was that of last evening at the Kawaiahae Church. The subject was "Obedience to the Law of Love," text coming from Ephesians II, 11 to 19. He said, in part: A true definition of love, as a characteristic of manliness, must guard it against foolish sentimentalism or the instincts of a passionate nature. It is really the will of any person recognizing and working for the highest good possible for some other person.

It is in this willing the good of men that Jesus Christ stands among his fellowmen—the most gigantic character of all the centuries. To come to the knowledge of this element of the character of Christ is to feel an overwhelming adoration for our Lord and Saviour.

No one can ever hope to understand the love of Christ without continued study and thought. I believe it to be unquestionably true that a study of the influence of Jesus and his words upon the course of history will lead to reverential love.

NEWS OF THE VOLCANO ISLE

HILO, Oct. 10.—Citizens of Hawaii met with Superintendent Boyd at the Fishmarket last night. The local board was severely criticised, and Mr. Boyd expressed the general policy of the Public Works Department relative to Hilo improvements.

It is reported that Postmaster William Horner, of Kukuiahae, has tendered his resignation.

Rev. C. W. Hill has been called to preach at the Congregational Church in Honolulu for another year.

The thirty-second quarterly meeting of the Hilo Teachers' Union was well attended and an interesting program given. The officers elected were: C. O. Smith, president; Mrs. L. C. Lyman, vice president, and Mrs. Keisey, secretary and treasurer. The next meeting will be held December 15, for which Miss Pomeroy, Miss Thomas and Mr. Beers will prepare the program.

The Puna Sugar Company will soon begin the construction of sixteen miles of railroad.

It is reported that the Hilo Railroad will be graded to twenty-two miles before the first of the year.

Fire did considerable damage to a thirty-acre cane field at Puhoua, Monday.

Miss Mary Kobbe and Robert L. Scott were married October 4. Rev. J. A. Cruzan officiated.

Steve Avard, a clerk at the Volcano Stables, was poisoned a short time ago, and it was necessary to remove one of his eyes.

The regular quarterly meeting of the library trustees was held Saturday evening. The sum of \$75 was appropriated for newspapers for the reading table, and \$25 was allowed for new books.

Mr. and Mrs. R. H. Reid entertained with a dance Saturday evening, in honor of Mrs. G. F. Maydwell. In the afternoon the tennis court at Riverside Park was dedicated.

A Louison, of Hamakua, was in the city preparing for the shipment of from twenty-five to thirty tons of coffee to San Francisco. The coffee will be picked and cleaned here.

Frank McComb has retired from coursing.
