

Some other man sang the Doxology in the Fifth yesterday.

The Bar Association's thirty-seven are having their innings now with the Department of Justice. We thought they would.

If the Japanese cabin boy keeps on talking, the necessity for more than mere formalities on the part of the prosecution in the Jacobson murder case will be over.

This is the date set for the coronation of King Edward, and if nothing has happened to prevent, the ceremony should have been over by the time this paper reaches Honolulu's breakfast tables.

Bishop Restarick received a hearty welcome yesterday and will find that it was of the kind that lasts. Honolulu is genuinely glad to see him and irrespective of its church affiliations will be pleased to see his work prosper.

Cholera is threatening the entire Oriental world and Egypt as well. In the delta of the Nile the disease is becoming epidemic and Astrakan and European Russia, Manila and Manchuria are in sore straits. The need of vigilance here at the cross-roads of the Pacific increases every day.

California has awakened to the idea that it doesn't pay to scare tourists and horsebackers with earthquake facts, hence the attempt to minimize the Los Alamos affair. After giving columns to a description of the convulsion the papers suddenly turn about and say that the earthquake was no great shakes. The tourist business is too good a thing to be trifled with.

TRACY GETS OUT OF OREGON.

(Continued from Page 1)

his head and said that he was shot by a member of a posse on the west side. He asked the best route to the Columbia river and rode off, but first warned Evans not to give him away.

TRACY ON HORSEBACK.

SPOKANE (Wash.), Aug. 2.—Riding all night, hiding and resting by day, Harry Tracy, the Oregon desperado, is traveling across eastern Washington at the rate of thirty miles a day. At 2 o'clock this morning he was close to Ephrata, seventy-five miles due west of Spokane. It is supposed to be his purpose to swing through the thickly wooded country north of this city into Idaho and Montana on his way to the "Hole in the Wall." Telephone messages received by the Chronicle state that Tracy was seen near Baird not far from the head of the Moses creek, Friday at 9 a. m. In this lonely region he is believed to have spent the day resting and grazing his horses.

About 11 o'clock last night a man whom the officers are convinced was Tracy rode through the main street of Coulee City. He was riding one horse and leading another and seemed anxious to keep away from the light. About 2 o'clock this morning some campers beside the road about five miles west of Almira had an altercation with a passing traveler, who is believed to have been the fleeing murderer. They grumbled because he had frightened their horses, and were told if the animals got loose they could catch them. To the remark that he was traveling late, the traveler answered: "This is the time of day to travel," and rode on. Since then he has not been heard from. The country about Almira is filling up with pursuing officers. Sheriff Gardner of Lincoln county and Sheriff Debold of Douglas county are leading the chase. Efforts are being made to head off any attempts to cross the Columbia river into the Colville Indian reservation. One posse is headed toward the Wilson Creek district, southeast of Almira, and another toward Govan.

Paper From Sugar Refuse.

SAN FRANCISCO, August 1.—Twenty-three sacks of chaff, or refuse of cane after the sugar has been extracted, was brought from Hilo by the bark Santiago, and will be shipped east to be used in an experiment for paper manufacture. Thousands of tons of the chaff are burned and otherwise destroyed on the sugar plantations, but observing men believe it can be successfully utilized in making paper. If this belief is confirmed, a new and very important industry will have been discovered, promising rich returns for the planters. The profits will not, however, be all on the side of the producers, for any paper-making firm that found the chaff practicable for use could not doubt procure whole cargoes by contract at reasonable prices, and the product would be available almost constantly.

Commenting on the above, the Chronicle says: "The Hawaiian sugar-makers are under the impression that the remains of the cane after it has the saccharine matter extracted from it will make excellent paper stock. In Nebraska experiments are being made with fiber of cornstalks, and it is also believed that the cactus which grows so abundantly on the Arizona deserts will be utilized one day for paper-making. With such supplies of raw material in sight we need not feel apprehensive that the art of printing will ever become obsolete for the want of paper."

No Regrets at Washington.

WASHINGTON, July 28.—The resignation of Judge A. S. Humphreys of Honolulu, Judge of the First Circuit Court, has been received and accepted by the President. At the Department of Justice today it was said that no action had been taken in the matter of the appointment of Humphreys' successor. It was with relief that Humphreys' resignation was accepted, as he had been regarded as the chief tempter-maker in the Hawaiian teapot. It is likely the President will consider recommendations made by the Honolulu Bar Association in appointing the new judge. The salary of the position is \$3000.

Perils of the Rail.

CALCUTTA, August 2.—A mixed railway train was derailed near Merut yesterday. Sixteen natives were killed and thirty natives and Europeans were injured.

WORLD'S NEWS CONDENSED

Texas suffered heavy losses from floods.

Two French admirals, de Beaumont and Sevaran, were relieved of their commands by President Loubet for conduct unbecoming officers.

The murderers of the Marquis de Mores at Tunis have been finally brought to justice. Seven are to be executed and eleven are sentenced to hard labor.

KING EDWARD'S CORONATION.

(Continued from Page 1)

Inferences from the fact that the invitations to Westminster Abbey were not dated have had their fears dissipated by a proclamation published in the Gazette to-night, fixing August 9th as the date for the coronation, which postdates all is altogether more important than anything which might or might not have appeared upon the cards of invitation.

According to the present arrangements, King Edward and Queen Alexandra will leave Cowes either on the 7th or 8th of August for Buckingham Palace, and will return to the royal yacht August 15th, when the entire fleet will pass before King Edward and salute him, thus making a second naval review. After his return to the yacht the King is expected to take an extended cruise to the northward, and subsequently to spend some weeks at Balmoral, where preparations for the arrival of their majesties have already been commenced.

Sir Joseph C. Dimsdale, Lord Mayor of London, expects King Edward to visit the City of London the week ending October 11th, when a great luncheon will be held in the Guildhall, which is to be followed by a royal procession through the south of London. All these plans may not be carried out to the letter, but their arrangement combined with the emphatic optimism of the King's physicians, is generally taken as assuring, so far as human foresight can be relied upon, for the King's coronation for August 9th.

It is perhaps significant that Queen Alexandra, the Prince of Wales and other members of the royal family were all ashore today playing lawn tennis.

COWES (Isle of Wight), July 31.—Today's bulletin on the condition of King Edward follows: "His majesty has made rapid progress since Monday last. His general condition continues all that could be desired. The wound is closing satisfactorily. The King is now able to walk the entire length of the pavilion deck easily without assistance."

NEW YORK, Aug. 2.—Rehearsals for the coronation ceremony at the Abbey have been resumed, and the officials also

respondent, that the procession to and through the Abbey will be conducted without deviation from the original lines. The stalls and seats assigned to the Prince and special emissaries will be occupied by members of the Government and high officials of the civil service who were previously crowded out.

COWES, Aug. 2.—King Edward spent most of the day on the deck of the Victoria and Albert. Several distinguished visitors were received in audience this afternoon. His Majesty appeared to be in good health and spirits.

The Cable Soundings.

WASHINGTON, July 29.—It was stated at the Department of Justice today that Assistant Attorney General Russell, now in Paris investigating Panama canal titles, had charge of the correspondence relating to the laying of the Pacific cable, and that nothing would be done in the matter of soundings until his return from Paris. The United States asks the Pacific Commercial Cable Company to give a special rate to the Government, with a guaranty that the cable may be exclusively used by the Government during war and that it shall be laid only in American territory. With these conditions met the Government will give the soundings to the cable company.

IT IS DIFFERENT NOW.

Once upon a time students of medicine held the notion that there were as many different diseases as the body has organs and parts; every one of these ailments requiring a different treatment. So stupid a mistake could lead only to miserable failures. For the fact is, the body is a single machine; and what concerns one part of it concerns, more or less closely, all the rest. Thus we see how it happens that one remedy, or mode of treatment, may relieve and cure a variety of complaints,—or what may appear like a variety, but are really various forms or outcroppings of the same cause. Take, for example, Anemia, Scrofula, Poverty of Blood, General Debility, Influenza, Throat and Lung Diseases, etc.—a formidable array indeed they look to be; yet WAMPOLE'S PREPARATION quickly abates the worst of such cases, and absolutely cures many which have been abandoned as hopeless. The reasons are: its power over the digestive and assimilating process, its action in expelling impurities from the blood, and its consequent ability to vitalize and rebuild the whole structure. It is palatable as honey and contains the nutritive and curative properties of Pure Cod Liver Oil, combined with the Compound Syrup of Hypophosphites and the Extracts of Malt and Wild Cherry. It was not dreamed out, or discovered by accident; it was studied out, on the solid principles of applied medical science. It is precisely what it is said to be, and has won the confidence of the public on that basis. Dr. Thos. Hunt Stucky says: "The continued use of it in my practice, convinces me that it is the most palatable, least nauseating, and best preparation now on the market." Every dose effective. "You cannot be disappointed in it." Sold by all chemists the world over.

Cabot's Creosote SHINGLE STAINS

They are better than paints for exterior finishing of a house for many reasons, but principally for the artistic effect produced.

They are the best wood preservatives known, cost about fifty per cent less than paint, are fully as durable as the best paints, and are much simpler in application.

Ask for booklets telling all about them at

An Ancient Foe

To health and happiness is Scrofula—as ugly as ever since time immemorial.

It causes bunches in the neck, disfigures the skin, inflames the mucous membrane, wastes the muscles, weakens the bones, reduces the power of resistance to disease and the capacity for recovery, and develops into consumption.

"A Lurch appeared on the left side of my neck. It caused great pain, was lanced, and became a running sore. I went into a general decline. I was persuaded to try Hood's Sarsaparilla, and when I had taken six bottles my neck was healed and I have never had any trouble of the kind since." Mrs. K. T. STYDER, Troy, Ohio.

Hood's Sarsaparilla and Pills

Will rid you of Scrofula, radically and permanently, as they have rid thousands.
