

HOSTETTER'S CELEBRATED

STOMACH BITTERS A Weak Back

Some people suffer from this ailment nearly all their lives. They are nervous and despondent through loss of sleep. The fact is their kidneys are weak and are unable to perform their functions.

HOSTETTER'S STOMACH BITTERS

Conklin's Self-Filling Pen

Imperial, Cal. Feb. 19th, 1902. The pen recently ordered came to hand in good condition. The only objection I have found to it is the temptation to waste a great deal of time showing other people how simple a matter it is to fill the holder, and how beautifully and cleanly it works.

OAHU ICE & ELECTRIC CO.

Ice Delivered to any part of the City. Island orders promptly filled.

FISHES OF HAWAII'S WATERS

Dr. Evermann's Fine Collection of Them.

LIFE IN OCEAN'S GREATEST DEPTHS

A Thousand Varieties of Fish Taken at a Depth of Two Miles.

(Special to the Advertiser.)

WASHINGTON, October 25.—United States Consul Haynes, at Rouen, France, sends the following information to the State Department regarding beet root culture and sugar yield in France:

The culture of beets is one of the greatest industries of northern France. The law of 1884 permitted it to flourish in spite of keen foreign competition. But at present, the industry is threatened. The International Congress held at Brussels, to the terms of which France has agreed, will destroy all the benefits of the law of 1884. Foreign markets will be closed to French sugar. The only market will be a home one. The consumption of sugar in France at present is annually about 450,000 tons. The production, which is more than 1,000,000 tons, will be cut down more than 50 per cent—that is, the land utilized for raising beet roots must be reduced one-half.

Sugar producers and manufacturers say that the market would be better if the heavy taxes upon this ailment were taken off. If this is done, the buyer, instead of paying from 50 to 80 centimes (9.65 to 11.58 cents) the livre (1.1 pounds), will find it everywhere for 25 to 30 centimes (4.825 to 5.79 cents)—the only condition, which will save the culture of the beet root. This solution is advocated not only by the agricultural associations in the regions directly interested, but in all others. The project presented some time ago by M. Caillaux, which will doubtless be taken up when the Chambers reassemble in October, provides that all bounties, without any distinction, be suppressed; that the manufacture of sugar become the same as that of any other product; that all accessory taxes be abolished; and that the principal taxes be reduced from 60 centimes to 40 centimes (11.58 cents to 7.72 cents). Very few believe, however, that this will be done.

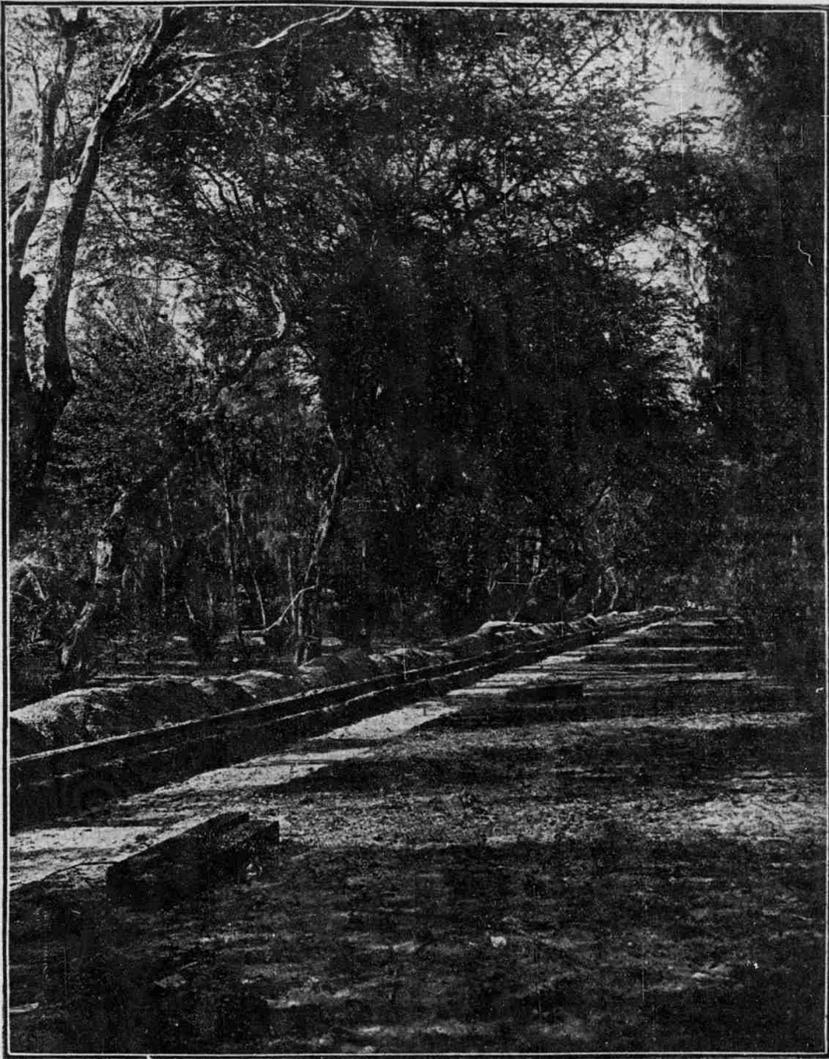

The Journal Officiel publishes the results of the sugar harvest ended September 1, 1902. The number of factories in activity was 332, and they used 9,350,851,795 kilograms (20,614,887,867 pounds) of beet roots, against 8,717,439,216 kilograms (19,218,466,496 pounds) for 334 manufactories in 1900-1901. The average for each factory is thus shown to be 28,165,216 kilograms (62,093,035 pounds), against 26,100,117 (57,540,318 pounds) for 1900-1901. The total output of refined sugar has been 1,111,069,922 kilograms (2,449,564,750 pounds), which is greater by 18,079,054 kilograms (39,857,082 pounds) than that of the immediately preceding harvest. The yield of refined sugar is 11.88 per cent of beet root, against 12.53 per cent in 1900-1901.

Dr. Barton W. Evermann, ichthyologist of the United States Fish Commission, is on his way east from San Francisco with the collection of fishes made by the Albatross expedition in the Hawaiian Islands during the past summer. Dr. Evermann is spending a few days with his relatives in Indiana, and will arrive in this city the last part of October.

The collection he brings with him contains many new and rare specimens, and there are many specimens of the species discovered in the expedition of last year. Many of these are remarkable curiosities, and the coloring of the entire collection is more brilliant and more varied than that of the birds of the world combined. The specimens themselves do not retain their colors in the alcohol in which they are preserved, but drawings have been made which show the beautiful and variegated colorings.

Some of the varieties were found at the bottom of the sea, at a depth at which any land animal or fresh-water fish would be crushed to death by the pressure of the water. At a depth of four miles the pressure of the water is 9,000 pounds to the square inch, and the Albatross made some discoveries at that depth. A fish ten feet long at that depth would support nearly 9,000 tons. The water at that depth is dark and ice-cold. Many of the fishes have porous

RAPID TRANSIT STREET CAR TRACK IN KAPIOLANI PARK

(Advertiser Photo.)

Ballasted roadbed that has been quickly laid down for the street railway extension to the foot of Diamond Head.

"Put us off at Diamond Head" will soon be the direction given by tourists to conductors of Rapid Transit cars and those conductors will be able to carry out those orders, for the Rapid Transit management is rushing the work on the extension from the junction of Waikiki road and McCully street.

Waikiki road is being widened all the way out by about thirty feet and when the widening process has been completed and the big electric and telephone poles which are now in the center of the street are removed to one side the new roadway will be the finest boulevard in the city. Big gangs of men are at work building the street, by filling

bodies, through which the water passes, the weight of the water being thus lessened. Some of them carry phosphorescent lamps, with which they search for food. On account of the expansion of the air these deep sea fishes burst near the surface of the water, and the more delicate speci-

side going out one will have an opportunity to view some of the finest residences in the Hawaiian islands.

Out at the entrance to Kapiolani Park the street car passenger can secure some real scenery. Passing over a bridge that will be built over the water that surrounds Makee Island he can notice on one side the shady leafy places on the island and on the other look out through thick pine trees on the surf beating against the shore retaining wall. A few yards further on he will encounter the fine trees of the park. The car will glide under a banyan tree and then go away at great speed between rows of trees straight to the foot of Diamond Head. On the sea

Straight through the park a wide trench has been dug out and filled with ballast and this is being packed solidly by the heavy steam roller. On each side of the roadway steel rails and railway ties have already been spread along and a gang of tracklayers will be able to put these in a position within a few days.

The work of the road builders has been carried out so carefully that very few trees have had to be cut down and the beauty of the park has not been marred in any way.

MEN, WOMEN, HERE IS HEALTH AND STRENGTH

Sick and Weak People: I can cure you with Electricity, as I have cured thousands of others. I can make the blood circulate in your veins, the nerves tingle with vigorous life and the spirit of energy show itself in every move of your body. I have told you that Electricity is "Life," and now all scientists and doctors are approving my claim. Let me prove it to you; let me show you how my method of applying this great power has revolutionized medical treatment.

Dr. McLaughlin's Electric Belt

IS A MODEL A MODERN HOME TREATMENT. My twenty years of study are shown in this grand appliance. You wear it with comfort at night, and the Electricity infused into your body cures all Nervous and Vital Trouble, Kidney and Bladder Troubles, Rheumatism, Lame Back, Indigestion, Weak Stomach and all forms of pain and weakness. It restores the life while you sleep, and must cure. DO YOU SUFFER? If so, don't hesitate, don't waste your time on drugs, which give no strength. Wear this life-giving appliance as I direct and it will cure you. Come and see me today. See what has been done for others. Test it free, get my free advice and follow it. You will find it the road to health. READ MY BOOK. I have a book which every man should read (one for women also). It tells facts that are of interest to every man who wants to remain young in vitality at any age. Send for this book today, if you can't call. I mail it, sealed, free. If you call I will give you a free test. Remember, my belt does not burn, though you feel the current and can regulate it. I warrant it to give a strong current for years, though no man who uses it right needs it over three months. Cut this out and act today. OFFICE HOURS—DR. M. G. McLAUGHLIN, 905 Market St. 8 a. m. to 8:30 p. m. Sundays 10 to 1. NOTE—When you use Dr. McLaughlin's Electric Belt you are under the care of a physician. Agents or drug stores are never allowed to sell these goods.

light at the great depths of the sea, and as all of the fishes have eyes there is certainly some use for them. Experiments with photographic plates proves that the sunlight penetrates but a short distance, so that it must be upon some other kind of light, or a new kind of X-ray not known to science, that the fishes of great depths depend. A thousand varieties have been taken below two miles, and of these little is known, since the collection is so small that none has been dissected on account of the value and rarity. Half of the bed of the ocean lies below this depth, so that science has a wide field for study. It is not likely that the larger fishes have been caught in any of the dredging, being powerful enough to escape, or wary enough to avoid the net.

The trap invented by the Prince of Monaco for deep-sea fishing is sometimes used, but that, too, would hardly capture a monster of the deep. The fact that science has discovered a thousand varieties of life in all this expanse of sea indicates that it is a fish world of itself of which man knows little or nothing, so that the stories of sea monsters and sea serpents may have some suggestion of truth, even if they are in themselves the result of imagination. The deepest soundings made by the United States was nearly six miles, so that there may be another and a lower world far more mysterious. ERNEST G. WALKER.

Salvationist Training Schools. CHICAGO, Oct. 30.—General Baillington Booth and the Territorial Commanders of the Volunteers of America attending the council here have under consideration plans for establishing training schools at San Francisco, Chicago and New York. The schools will be for the training of young men and women in Evangelistic works. Funds have been raised and within the next year the schools will be fairly under way. The council is also revising certain rules regarding the appointment and promotion of officers in the organization.
