

Conklin's Self-Filling Pen

Imperial, Cal., Feb. 19th, 1902. The pen recently ordered came to hand in good condition. The only objection I have found to it is the temptation to waste a great deal of time showing other people how simple a matter it is to fill the holder, and how beautifully and cleanly it works.

Very truly yours, B. F. HOWE, Editor "Imperial Press," Miami, Fla., Feb. 22d, 1902. I consider the "Conklin Self-Filling Pen," the incomparable, ideal pen on the market of the world today.

F. W. E. PESCHAU, D.D. President of the Ohio State Luther League.

The Pen that Fills Itself

For sale by Wall, Nichols Co., LIMITED.

To Let OR Lease

The following described properties upon moderate terms:

Premises on the Pauoa road, at present occupied by A. T. Atkinson. Possession given Nov. 1st. Store in Orpheum block on Fort street.

WATERFRONT NEWS

FOUR SAILERS GOT INTO PORT SUNDAY

All From Australia Carrying Cargoes of Coal—One Goes to Eleele.

Four sailing vessels came into port with the strong north-east trades yesterday. They were all from Australia and had cargoes of coal. The American bark Abbey Palmer made the voyage in fifty-six days. The Norwegian bark Excelsior and the American barkentine Benicia each required fifty-five days for the passage from Newcastle and the American four-masted schooner King Cyrus came along in fifty-four days. The Abby Palmer and the King Cyrus were brought into port where they will commence discharging their cargoes of coal today and the Norwegian bark Excelsior was brought in and anchored in the row. The Benicia remained at the anchorage outside and will proceed to Eleele to discharge her cargo of coal.

The vessels had a sort of go-as-you-please race all the way from Australia and the experience of the Abby Palmer was about the same as the others. The Palmer had rough weather from Newcastle to off the New Zealand coast and there sighted the Excelsior. Light winds were then encountered through the Southern tropics and on nearing Tahiti the barkentine Benicia was sighted. Some distance north of Tahiti the schooner King Cyrus was encountered and the two vessels then sailed together for six days. Medium winds were encountered in the northern tropics and after passing ten degrees north strong northeast trades brought them on to Honolulu at great speed.

The American schooner W. H. Talbot which is forty-eight days out from Newcastle is expected to arrive most any time.

NASTY WEATHER ON WATERFRONT

Customs Officer Got Wetting as the "Lanky Pig" Capsized.

A very heavy gale swept over the mountains all day yesterday and gave small boats and larger craft in the harbor a severe twist. Some accidents were reported in the harbor but there were no casualties. The battleship Oregon was open for inspection during the day but owing to the gale less than a hundred people ventured to make the trip out and back although those who did go out journeyed in safety.

On board the battleship one had a very bad time of it. It was a hard job to get aboard owing to the difficulty in going alongside the rolling monster with launches and when aboard the squalls were so hard and so frequent that people had difficulty in keeping on their feet.

The "lanky pig," a freak of a boat that boarding officers from the U. S. Customs are required to use in boarding incoming vessels, nearly cost Inspector Jacobsen his life. The harbor was very rough and in being rowed about the boat took in a great deal of water. She was capsized alongside a vessel in the stream and Jacobsen got a wetting. He was rescued and the boat righted and one of Young Bros' launches then towed it back to the wharf.

Vessels that had to be berthed caused considerable difficulty to the harbor master's force as the strong wind made it hard to handle them.

Most of the visitors who had intended to board the Oregon went on board the cruiser New York at the navy wharves. The wind was very severe there and sailors were working constantly rescuing visitors' hats as these blew off and started on voyages cut the channel.

Eclipse Found Rough Seas.

The gasoline schooner Eclipse reached port in safety about six o'clock last night after experiencing some very rough weather. Near Lanai the seas were very heavy and a gale of wind was blowing. While coming through the Molokai channel very heavy seas were also encountered. A part of the vessel's cargo consisted of 250 head of sheep.

Pearl Harbor Very Rough.

The gale yesterday caused the water in Pearl Harbor to be rougher than has been the case for a long time. Squalls kept a white foam over most of its surface all day and at times the gale became so heavy that sheets of water were lifted and hurled along. The water was swept over the walls of the fish ponds about the harbor.

ROUGH WEATHER ABOUT THE ISLANDS

Heavy Trade Winds Blowing and Vessels Had Bad Time in Coming Here.

All the Island steamers arriving Saturday and Sunday and the sailing vessels which came in yesterday report rough weather about the Islands for the past two days. The coal fleet from Australia found very nasty weather off the Islands on Saturday night.

The steamer W. G. Hall arrived from Kaula ports at 4:45 o'clock Sunday morning and reported northeast trades with high seas and frequent rain squalls in crossing the channel during the night. Water was continually washing over her decks and the deck passengers had to put up with considerable discomfort.

The steamer Noeau on her outward trip to Kaula in passing Maalaea Bay on Wednesday afternoon encountered a whirlwind which tore her foresail. The steamer was hove to and after the sail had been taken in resumed her course. She found rough weather along the Hamakua coast with strong northeast winds. On her return trip to Honolulu she had strong trades and heavy squalls.

The steamer Waialeale had a rough trip in returning from Kaula on Saturday night and during Sunday morning.

SAW ICEBERGS IN DOUBLING THE HORN

British Ship Norma in Port After 142 Days' Passage From Hamburg.

The large four-masted British ship Norma, Captain McLaughlin, arrived in port Saturday afternoon after a voyage of one hundred and forty-two days around Cape Horn from Hamburg. Captain McLaughlin has the usual story to tell of the rough weather off the Horn but adds a chapter of floating ice, snowstorms, and icebergs that gave the vessel a hard time in making the passage.

Captain McLaughlin took his vessel to fifty-nine degrees south latitude in doubling the Horn. Gales and head winds accompanied by heavy snow storms gave the crew a big job in working the ship. It was bitterly cold and for a week the vessel lay in sight of a field of floating ice and icebergs. The mate of the vessel declares that he counted thirteen bergs all told but the captain said they did not get dangerously close to any of these. They suffered no damage from any of the storms.

This is Captain McLaughlin's first trip to Honolulu and he is disappointed in not making the trip in twenty days' less time. He brings 2,431 tons of general cargo for Honolulu, and has about a thousand tons of general cargo for Portland. At the latter port he expects to load wheat for Europe.

Hard on Dredging Contractors.

For the past month no real work has been accomplished by the dredging contractors on the Pearl Harbor bar and the gale of the last two days has wrought considerable havoc there. The smaller dredge is now inside the harbor but the large one, which was moored on the bar, was reported yesterday as pounding very hard in the tremendous swells that were sweeping over the bar.

FALLING HAIR STOPPED.

Baldness Cured by Destroying the Parasitic Germ That Causes It. Baldness follows falling hair, falling hair follows dandruff, and dandruff is the result of a germ digging its way into the scalp to the root of the hair, where it saps the vitality of the hair. To destroy that germ is to prevent as well as cure dandruff, falling hair, and, lastly, baldness. There is only one preparation known to do that, Newbro's Herpicide, an entirely new, scientific discovery. Wherever it has been tried it has proven wonderfully successful. It can't be otherwise, because it utterly destroys the dandruff germ. "You destroy the cause, you remove the effect."
