

Thursday, November 27, 1902

will be a day of thanksgiving observed in every state and territory of the Union.

You no doubt intend to celebrate the occasion, and will have a larger number than usual at your dinner table, requiring a number of additions to the many articles necessary for your table and kitchen.

As usual, you can get them all at DIMOND'S.

We have the assortment and our prices are right. Courteous attention, prompt delivery and guaranteed satisfaction you know you will receive.

W. W. Dimond & Co.

LIMITED.

Headquarters for Crockery, Glass and Housefurnishing goods. Sole agents for the celebrated Jewel stoves and the Gurney refrigerators.

EVENTS OF THE WEEK ON MAUI

MAUI, Nov. 22.—Tuesday the 18th, Rev. J. Kamakele of Kula, a well-known, and prominent citizen of Maui, died of blood poisoning at his residence at Keokea.

Mr. Kamakele was a leader in the religious, social and political life of the Hawaiian residents of Kula and vicinity.

For many years past he had been the pastor of the large adobe church at Keokea. Several times he has represented Maui in the legislature and once was tax-assessor of Makawao.

STRAY NOTES.

A heavy general storm is taking place on Maui today. The rainfall records of the past year are the highest in the history of the island.

The steamer Maui departs from Kahului with a full passenger list. In truth, though the Maui is a good staunch steamer, she has too limited cabin accommodations for the Hana, Kahului, Honolulu route.

Some of the reported departures to Honolulu are those of Mrs. J. P. Cooke and four children, Mrs. C. H. Dickey, Miss Belle Dickey, W. O. Aiken and Dr. G. S. Aiken.

By the steamer Mauna Loa Tuesday Senator H. P. Baldwin and Senator-elect C. H. Dickey departed for the capital and legislative duties.

By the Claudine of Friday Mr. and Mrs. L. von Tempsky and Mr. and Mrs. H. A. Baldwin sailed for Oahu, going aboard the steamer at Lahaina.

Football is not so popular in Wailuku as it was several weeks ago. It is stated that the Morning Stars do not care to play again since their defeat by the Wailuku, 10 to 0, several weeks ago.

Capt. L. von Tempsky of the Maui polo team has promised to send a wireless telegraph message to Supt. E. B. Carley of the Telephone Co., announcing the result of the next Tuesday's polo contests in Honolulu.

The annual convention of the Maui Teachers' Association will take place in Wailuku school hall, Monday, Dec. 1st. An interesting program has been arranged.

Normal Instructor Chas. King has been visiting Makawao schools during the past week.

LIFE BROUGHT OUT BY CHEMICAL STIMULUS

Ptychodera, three-fourths the natural size, found in Waikiki coral.

An Interesting Experiment, Following Professor Loeb's Discovery, Made at Oahu College.

Interesting biological experiments have just been completed at Oahu College under the direction of Prof. Loye Holmes Miller, which are valuable to persons interested in solving problems presented by the tiny forms of life which pass before the microscope.

Deep down in the sandy pools of the coral reef near Waikiki, from which the water at lowest tides never entirely recedes, there lives a most interesting worm-like animal which in its development from egg to adult growth shows curious affinities to worms on one hand and on the other to backboned animals, to which group man belongs.

None of the male element was discovered, however, and the precious capture made by Prof. Miller seemed likely to spoil for lack of that stimulus needed to start each microscopic sphere growing and which would touch the spring to loosen all the wondrous possibilities held there dormant.

Two hours showed no result, but at the end of an additional half hour there drifted into the field of the microscope a tiny egg through the transparent covering of which could be seen the distinct division into two equal hemispheres, the first step in the development of a typical egg cell.

Experiments of this nature are the most important carried on in biological chemistry, that which amplifies the vital activities of living substance, and draws them nearer to the non-living or chemical actions.

The close of the last century brought forth this one startling discovery that stands out prominent among the array of achievements that mark the last five decades of scientific thought, a discovery that makes modern thinkers wonder if this mysterious vital force is to be made comprehensible to us.

stimulus which is the prime object in the union of male and female cells to produce the young of plant or animal. The pollen of the flower scattered upon the wind or clinging to the legs of the visiting bee, finds its way to the pistil of another of its kind and fuses part of itself with the tiny germ of this second flower, thus giving it a vital stimulus needed to make it grow to seed, and later to plant. The eggs of the oyster, as of so many other marine animals, are set free by millions into the water, where they come into contact with the male element from another individual, receive the necessary stimulus, and develop into the likeness of the parent. Without this same stimulus both eggs and flowers die.

HAWAIIAN SINGERS ARE STRANDED

WASHINGTON, Nov. 2.—Pending the examination at the port of New York into the status of the eleven Cuban children detained at Ellis Island, other steps are to be taken from here. These children will probably be deported on the ground that they are now private objects of charity and liable to become a public charge, unless the Treasury Department on appeal reverses the adverse decision of the Board of Special Inquiry at New York.

A case which has excited much local interest recently, and which, though not exactly parallel, is suggestive, is that of a group of young Hawaiians who came to the United States mainland with a notion that they could gain something by singing their native songs in concert. They found themselves stranded here, just as the cold season was coming on, without suitable clothing, and with no money to get their passage back.

Chamberlain's Cough Remedy

is intended especially for coughs, colds, croup, whooping cough and influenza. It has become famous for its cures of these diseases over a large part of the civilized world.

CABLE FOR LAND LINE NOW HERE

Wound upon sixteen great spools, which are stored in the warehouses of Irwin & Co., is the underground cable which will connect the landing station of the Pacific Commercial Cable Company with the city office.

The laying of this cable will be in charge of Lewis G. Martin, the representative of the manufacturers, the Okonite Company of New York, the contract for the line carrying with it the putting of the cable into the pipes laid by the Cable Company.

The hauling is done from the manholes, which are placed from 200 to 500 feet apart, and at each of these the cable is cut and spliced to the end of that which has previously been put down. The great spool, with its diminishing load of cable, is then moved forward to the manhole where the pulling winch was last working and, that apparatus having been carried to its next station at the succeeding manhole, the operation is gone through with once more, and so on until the entire length of the cable has been put in.

On the straight stretches there is no difficulty in hauling 500 feet of the cable, but on the curves the lengths are made much less. In the local contract there is a harder task, too, as there are two cables to be laid in the pipes, whereas the cables are nearly that size when laid together.

The splicing of the conductors of the cable is a work of no mean proportions, as it must be surrounded with the utmost care. The men who handle the wires are compelled to cleanse their hands very thoroughly during the operation, so that when the final process, that of recovering the copper wires with rubber, is reached, there is no foreign substance at all left on the shining copper. The wires, being thus spliced, are again covered with insulating material, and the leaden sheath of the cable is soldered so as to make it absolutely tight.

The weight of the cable which will be placed here is 104,000 pounds, and according to the estimates of Superintendent Gaines it should not take more than ten days to put it under ground.

MINCE, CRANBERRY AND PUMPKIN PIES

For Thanksgiving Day Delivered to any part of the city.

For nearly a quarter of a century our THANKSGIVING HOME-MADE PIES have stood for all that is good in pies. They are a little better than you can make at your own home, and cost you less.

Call up Main No. 182 and send your order in early.

The Elite Ice Cream Parlors Candy Factory and Bakery. HART & CO., LTD. 170 Hotel Street.

Theosophical Society

Will not hold a meeting next Thursday, Nov. 27th as this day is a Holiday.
