

YACHTS ARE BECALMED

Visiting Lurline Towed Back To Port and Race Spoiled.

The ocean yacht race to Lahaina has ended in a windless fizzle. Last night the Lurline, the visiting yacht of Captain Sinclair, was towed into port by Young Brothers' launch Waterwitch and safely anchored in naval row.

Clarence Macfarlane's yacht La Paloma is somewhere off port, reported as wanting a friendly hawsers to bring her into the harbor.

It is supposed that Thos. W. Hobron's yacht Gladys has reached Lahaina, but probably through the aid of a steamer.

Vice Commodore Picker, who went out on the Lurline as the guest of Captain Sinclair, came ashore in a boat yesterday evening to engage the Waterwitch for towing the Lurline to port. The visitor had been becalmed for twenty-four hours off this port. Young Brothers picked the vessel up two miles off to the southward. A short distance off the harbor the towline broke, but the Lurline was finally brought in all right.

Vice Commodore Picker reports the Lurline as having left Molokai at 4 p. m. yesterday. La Paloma was close inshore then, seemingly having a light breeze. Nothing was seen of the Gladys all day.

ATKINSON PRESENTED WITH THE RESOLUTION

Wm. W. Hall, John Emmeluth and W. J. England were the committee of the Builders and Traders' Exchange to wait on Acting Governor Atkinson and present him with the resolution of that body, expressing appreciation of the stand he had taken for citizen labor on public works. They gracefully performed the duty yesterday afternoon. The resolution appeared in this paper's report of the Exchange's meeting at which it was adopted.

ORIENTAL BUDGET

(Continued from page 1.)

tallow, etc., also 25 packages of machinery, was not examined. The Russians boarded us about 3:45 p. m. and left about 4:45 p. m. The Russian officer stated that they had sunk the Knight Commander at 7:30 that morning, that the crew were given half an hour to leave and that there was no loss of life. It was apparently the intention of the Russians to put the whole of the crew, numbering some 60 persons, on board the Tsinar, but after one boat load consisting of 21 Lascars had been sent from the Russia, the signal to draw off was given from the Admiral's vessel. The No. 1 Lascar, a quartermaster who speaks a little English, says that the Russians gave them nothing to eat and drink but bread and water. The officer stated that the number of small Japanese coasters they had sunk was beyond counting and that the timber with which the sea was littered—we sighted quite 400 pieces between the hours of 10 and 2—was the deck cargo of these vessels. He added that a British steamship, the Cheltenham, and a German vessel had been sent to Vladivostok with prize crews on board. The Japanese vessel which was alongside one of the cruisers when we were being examined had disappeared when we left. We were ordered to wait until the Russians were out of sight, but I subsequently, that is about seven o'clock, observed them going slowly in the direction of Rock Island light. I am of opinion that they had not much coal, although the officer asserted that they had plenty.

The villagers of Nagatsuro, Minamisaki-mura, Kamogori, Izu province, claim that they witnessed the sinking of a steamer, which subsequently proved to be the British vessel Knight Commander.

GEN. HAMILTON'S MISHAP.

A nearly fatal mishap befell General Ian Hamilton on his way to the front with the foreign attaches (writes Mr. Bennett Burleigh in the Telegraph). It happened at Chemulpo, when the transport Suminoe-maru called in at that port with the attaches on board on her way to the front, General Ian Hamilton landed and paid a brief visit to the British Consul. He returned in the steam launch to the vessel. That day there was a fopple upon the bouncing, tawny water, and the launch, lurching as General Hamilton stepped off, he fell between it and the ship. The General would have been swept under the big transport and surely drowned had not Colonel Satow, of the Imperial Artillery, who was in charge of the attaches, sprung and gripped Sir Ian Hamilton's hand in some marvellous way as he was disappearing. To avoid being dragged under the ship with the

SHALL HE BE PERMITTED TO EXIST?

This is a warrior of the Masai tribe, of whom Sir Charles Eliot says, in the official correspondence just published: "I have no desire to protect Masaidom. It is a beastly, bloody system, founded on raiding and immorality." On the other hand Mr. Jackson, Sub-Commissioner, reported on the Masai: "At present they are friendly, and have hitherto given less trouble than any other tribe in East Africa," and again: "The Masai will never give us serious trouble, so long as we treat them fairly, and do not deprive them of their best and favorite grazing-grounds."

RAISING THE VARYAG.

It is reported from Chemulpo that the work of refloating the Russian cruiser Varyag is progressing satisfactorily. All the guns and coal on board have been already removed, while the mud and sand lying at the bottom of the vessel are now being dredged. All the shell holes have been stopped and preparations are being made to pump the water out of the vessel. The entire work will be finished within the course of this year. The refloating of the Russian transport Sungeni, which was also sunk at Chemulpo, will probably be accomplished within two months' time from now.

MISCELLANEOUS.

It is estimated that the loss directly inflicted on our maritime business by the Vladivostok squadron since the latter's appearance in the Pacific on the 20th inst. will be no less than 15 million yen for the chartered foreign vessels alone, which represent 200,000 tons. It is stated that the daily loss arising from keeping these vessels idle will amount to at least five yen per ton.

The Foreign Office has received the following telegram. At the request from General Kuropatkin, the Swiss military attaché to the headquarters of the Russian army has been recalled. He was accused by General Kuropatkin of having used insulting language towards the Russian army. The military attaché, who arrived at Berne on July 15, affirms that no insulting words were used by him with regard to the Russians, whereupon the Swiss Government asked an explanation from the Russian Government. According to the papers, the Swiss press is extremely indignant at the arbitrary conduct of the Russians.

Despatches from Shizuoka-ken state that on the 24th inst. at about 5 p. m., at a point some 18 miles to the southwest of Mikomoto lighthouse, Izu province, three boats, belonging to the ill-fated British steamer Knight Commander sunk by the Russians on that day, were picked up by bonito fishermen from Izu province. These boats, which bore the ship's name, contained among them several suits of foreign clothes, books, Straits Settlements silver currency, and a gold watch of American make. It would seem that the crew of the unfortunate vessel at first attempted to make for the shore in these craft, but were afterwards

RUSSIAN WIRELESS STATION.
Chefoo and Shanghai despatches concur in stating that Russia is erecting a wireless telegraph station near Chefoo. The place selected is an elevation 300 feet above the sea level, and 500 feet distant from the shore five miles east of the Japanese Consulate at Chefoo. The pole measures 20 inches in diameter at the bottom, and will be 130 feet high. The work is superintended by two Europeans, one of whom is a German telegraph expert who had been in the Russian service at Dalny, and 50 Chinese coolies are working day and night. It is expected that the work will be finished in a fortnight. The Russians are also building a house at the foot of the hill. One report states that the house is being erected as a villa for the Russian Consul at Chefoo, while another report states that it is a power-house.

IGNORANT RUSSIAN PEASANTS.
Father Ignatius Diatchkoff sends to the Kazan newspapers an amusing account of a fair held in his village. He saw a great crowd of the peasants standing about an itinerant rifle saloon proprietor, who was holding a telescope to his eye. After several mujiks had taken shots, he inquired what they were aiming at, and was much surprised to hear in chorus the reply: "The Japanese, Father." "Our brother," said a bearded giant, pointing to the showman, "says that the man in the moon is a Makak (Japanese), and that every time we hit him 10 Japanese on earth join the devil. We have killed," he added, naively, "eighty of them already."

GRASPED PRINCE'S HAND.
Here is a good story that well illustrates the stuff of which Japanese manhood is made and the loyalty of his nature. At the battle of Nanshan again, Private Takabatake was shot in one of his eyes and he was put in the field hospital. He was lying in his bed with the upper half of his face wrapped in bandages, when in came some one and taking hold of one of his hands, said: "Takabatake! Takabatake! this is an honorable wound: keep up thy spirit!" The soldier knew that to be privileged to visit and give comforting words the man must be an officer. But now he thought that the words spoken, as in Japanese, lacked something in courteous terminology, even as those of an officer toward a private, and his sense of pride as a brave son of his country, especially as he lay so painfully wounded, could not help feeling injured. So he ventured to ask who might the officer be. "I am the commander of thy division," was the answer he received in stately but kind voice! "The commander of the division! Why, that is His Highness the Prince himself." The moment the knowledge dawned on him, the private, forgetting himself in his delirium of gratitude, tightly grasped the Prince's hand in his own and forthwith wept loudly in the fulness of his joy. From this it may be perceived what Japanese manhood stands for and where it is most easily touched.

MORE OF BLOM'S REAL BARGAINS

Such bargains as these are not to be found elsewhere and even here they are for one week only.

About 250 pieces of Lawn, Dimity, and Organdy. Regular prices 15c. and 20c. a yard.

THIS WEEK AT 10c.

A. BLOM. Progress Block Fort Street.

taken on board the Russian vessels.

In connection with the report that General Kuropatkin had been wounded in the recent battle at Tashikiao, the Chefoo correspondent of the Nichi Nichi learns from a certain Chinese who has just arrived there from Nuchwang, that the General is now receiving surgical treatment at the hospital at Liaoyang.

H. M. the Queen of Greece has presented two crosses, six portraits, six magazines, four shirts, three pairs of socks, and four boxes of cigarettes to the Warrant Officer Feodor, who was taken prisoner from the Russian destroyer Streguschl. Feodor is said to be a relative of Grand Duke Constantine, whose family claims the Queen as one of its member.

The Jiji issued an extra yesterday evening containing a telegram from its Tientsin correspondent, who states that in the battle at Tashikiao General Kuropatkin was wounded on the left shoulder, that another Russian general was killed, and that the number of casualties on the Russian side were over ten thousand.

Some fifty Chinese arrived at Chefoo from Dalny on the 23rd inst., who state that on the morning of the 23rd an attack was made on Port Arthur by about forty Japanese warships and torpedo vessels. The Russian forts, especially the Gold Hill fort, opened a galling fire on the attacking party.

A Chefoo despatch states that meat is very scarce at Port Arthur. A bag of flour is quoted at 9 yen.

The Official and Commercial Record fills a long felt want. Published Mondays and Thursdays.

BOTTLED SUNSHINE

Scott's Emulsion brings sunshine to the entire system of the consumptive.

All life is sunshine. The sun pouring its rays into the plant combines earth, water and air into new plant tissue. Sunshine stored up in the plant is its life.

The animal changes plant tissue into animal tissue, changes the stored up sunshine of plant life into animal life.

Fat contains more stored up sunshine than any other form of animal tissue. This is why Scott's Emulsion of pure cod liver oil is literally bottled sunshine, full of rich nourishment and new life for the consumptive.

We'll send you a sample free upon request.
SCOTT & BOWNE, 409 Pearl Street, New York

Beer must be pure

to be good; must be brewed only from the best materials; must be scientifically filtered, thoroughly aged, bottled at the brewery and sterilized after bottling. It must always be shipped in the bottle, for beer shipped in bulk and bottled at supply depots is sure to absorb impurities.

The Famous A.B.C. Beers

are guaranteed absolutely pure and free from all preservatives and chemicals

used in other brands of bottled beers, which are injurious to the health. They are never sold in bulk—are the only beers bottled exclusively at the brewery. Made from the finest Bohemian hops, they are aged for months, then filtered and piped direct from the brewery vaults into bottles by means of hermetically closed filling machines. This prevents the beer from coming in contact with the outside air, and insures absolute freedom from bacteria. It also preserves its natural effervescence and zest.

Six Points of A.B.C. Excellence

- 1—Purity. We absolutely guarantee the purity of all our beers.
- 2—Flavor. This is the distinctive, individual characteristic of any beverage, peculiar to it alone, and is the quality that has made A. B. C. Bohemian Beer famous.
- 3—Brilliance, clearness and polish, proving perfect brewing and fermentation.
- 4—Clean Taste. No disagreeable foreign or aftertaste, proving scrupulous cleanliness during brewing process.
- 5—Keeping Quality. The most trying test for bottled beer. A. B. C. Bohemian will keep and retain all of its qualities under varying conditions.
- 6—Solid, Creamy Foam, denoting body age and excellence of brewing materials.
