

THE TIMELY USE OF THE BITTERS

will save you much suffering and probably a long sick spell. Therefore keep a bottle handy and take a few doses at the first symptoms of any Stomach, Liver, Kidney or Bowel disorder.

Hostetter's Stomach Bitters

during its 54 years' experience has established such a record of cures that it is now the recognized leader among Stomach remedies. It always cures

Sick Headache, Poor Appetite, Heartburn, Indigestion, Costiveness, Female Ills or Malaria, Fever and Ague.

We guarantee it absolutely pure.

VARIED OUTPUT OF HAWAII'S FOREST

Lumber Co. Branching Out in Plans for Ohia and Mahogany Output.

HILO, June 11.—With manufactures of its lumber in sight, other than ties, the Santa Fe contract is not looming up in quite as large proportions as it did before the Hawaiian Mahogany Lumber company had begun to plan for turning out flooring, paving blocks, telephone pins, telephone poles, piles, fence posts, tannic acid and firewood from its ohia trees, says the Hawaii Herald. All of these are possible as by-products, all have been discussed, some have been planned and orders already received. For the koa tree product after the band mill has been installed, there will be a veneering plant, then the extraction of tannic acid from the bark and sawdust. This is as far as the company has gone at present, but one line of manufacturing will suggest another till the forests of the island of Hawaii will be one great hive of industry, each branch of which will require its distinct machinery.

It was the scarcity of hardwood lumber in the United States that first suggested expansion to the Hawaii people. Samples of ohia have been sent here and there on the mainland, tests have been made and assurances received that ohia possesses all the qualities of the best hardwoods for the purposes indicated, and that it will take readily in the mainland markets. One such opinion was backed up by an order for a million feet of ohia to be used as a substitute for oak and ash. Flooring made from it has been pronounced equal to maple in texture and grain. And the flooring will be made in the forests of Hawaii, not shipped from here in the rough.

Even the sawdust has its marketable value as Jared G. Smith, officer in charge of the United States Experiment Station of the Department of Agriculture, has testified for he has reported that enough tannic acid can be extracted from the sawdust of the ohia to guarantee its manufacture, at a profit, as a business commodity. His analysis shows that the ohia sawdust contains a larger percentage of acid than either oak or hemlock, the products of which are now those mainly in use on the mainland. Paving blocks can be made from the cut-off of the timber used for ties; firewood and telephone pins will come from wood that would otherwise be wasted, in fact the company is planning to turn to merchantable account every particle of wood taken from the 100,000 acres of forest under its control, in the manufacture of which special machinery will be needed for each different product. Operations at the koa mill were suspended only temporarily to enable the installation of a band mill with a daily capacity of 20,000 feet. This was found necessary owing to the size of the logs in the forest, as it is not unusual to have logs that are six feet in diameter, and eighteen to twenty feet in length.

YOU WILL NOT

be deceived. That there are cheats and frauds in plenty everybody knows; but it is seldom or never that any large business house is guilty of them, no matter what line of trade it follows. There can be no permanent success of any kind based on dishonesty or deception. There never was, and never will be. The men who try that are simply fools and soon come to grief, as they deserve. Now many persons are, nevertheless, afraid to buy certain advertised articles lest they be humbugged and deluded; especially are they slow to place confidence in published statements of the merits of medicines. The effective modern remedy known as **WAMPOLE'S PREPARATION** is as safe and genuine an article to purchase as flour, silk or cotton goods from the mills of manufacturers with a world-wide reputation. We could not afford to exaggerate its qualities or misrepresent it in the least; and it is not necessary. It is palatable as honey and contains the nutritive and curative properties of Pure Cod Liver Oil, extracted by us from fresh cod livers, combined with the Compound Syrup of Hypophosphites and the Extracts of Malt and Wild Cherry; and how valuable such a blending of these important medicinal agents must be is plain to everybody. It is beyond price in Insomnia, Anemia, Weakness and lack of Nervous Tone, Poor Digestion, Lung Troubles and Blood Impurities. Science can furnish nothing better—perhaps nothing so good. Dr. W. H. Daff, of Canada, says: "I have used it in my practice and take pleasure in recommending it as a valuable tonic and reconstructive." It is a remedy that can afford to appeal to its record and represents the science and knowledge of bright and aggressive medical investigation. "One bottle convinces" At chemists.

The use of a band mill is preferred owing to the large saving it effect, in saw kerf which, owing to the high grade of the lumber, should be as fine as possible, not exceeding one-eighth of an inch. The market calls for high grade manufactures from this lumber, and this decided the company to erect a band mill.

For veneering purposes there will be a special plant erected in the koa forest after the band mill, and this will shortly be decided. The veneering plant, if completed as now projected, will turn out annually in the shape of lumber or veneers, or both, about six million feet which, at the present market price, would be worth \$600,000 a year in its rough condition without veneering. From the koa bark and saw dust tannic acid can be extracted, and analyses that have been made show that both contain from twenty to thirty per cent. of tannin. With the completion of the railroad line from Glenwood to Keauhou the company has direct communication from forest to tidewater. Shipments of koa are now being made, in the shape of fitches suitable for veneering, to the principle manufacturing cities in the United States, and the new steamer Lurline, due here on Saturday, will take 25,000 feet of koa on her first trip consigned to different parties in Chicago, San Francisco, New York, Cincinnati, Grand Rapids and Boston.

Reports upon the Hawaiian koa, or mahogany, that have been received to date from parties on the mainland to whom it has been sent, are highly satisfactory and in several instances it has been pronounced by experts as superior to Cuban mahogany. Temporarily the koa is being stored in the Hilo boat landing for shipment, pending negotiations now in progress regarding other wharfage arrangements. The ohia tie mill now being erected at Puna will be completed within forty five days, with shipments ready to be made early in August. It has a daily capacity of 100,000 feet of sawn lumber, or 3000 ties each 8 feet by 3 by 8 inches. The machinery was purchased from the Flier and Stowell Company of Milwaukee, one of the largest manufacturers of sawmill machinery, and the Puna mill will be one of the largest in operation in the United States. The mill building is located right on the line of the Hilo Railroad so that the ties can be placed on the cars from the mill platform. A logging railroad line into the forest, two miles long, has been built by the company. A Shay locomotive has been ordered for this line and, upon its arrival, the twenty logging cars that are being completed at the Hilo railroad shops, will be used to bring the logs to the mill. Arlole Brothers have begun their work of pulling the trees and, in a few days, will be ready to deliver to the mill.

After furnishing the foregoing facts to the Herald, Manager Harris said: "The company was organized two years ago. Its capital is now \$250,000. It has 10,000 acres of ohia timber land in Puna, 19,500 acres of koa land at Keauhou, and timber licenses covering 100 square miles, or 64,000 acres, in Kona. The company has had its difficulties times but I believe its difficulties are now ended. There is work ahead, plenty of it; and if we progress no further in manufacturing than has already been discussed, and partly arranged, there will be an industry established on the island of Hawaii, that will be surprising."

TELLING LIES TO CHILDREN.

A Little Story Which May Be of Interest to Some Mothers.

A father and mother recently spent an afternoon in an amusement park with their child, a dear little boy about four years old. They were plainly persons in very humble circumstances, but, with the determination that their little one should enjoy himself, let him have a number of rides on one of the ponies provided for the amusement of the children. But when it came time to go home there was the sort of trouble so many parents must continually meet. The little boy did not want to leave the pony, and finally lifted up his voice in weeping at the mere thought. He clung to the pony's neck, burying his face in the mane. Then the mother hit upon a happy idea, according to her notion. Said she:

"Say, Johnnie, you get off the pony and go home like a good boy, and tomorrow papa will buy you a pony all for yourself."

Johnnie sat up straight with glistening eyes. "Will you, papa?" Papa replied with alacrity: "Of course. You come on home and I'll get you a nicer pony than that one." Seated in the car bound for home, he talked of nothing but the pony he was to have the following day.

"Will it be a black pony, mamma, like the one I was widdin' on?" "Yes, only ever so much prettier."

"Will it have pitty hair on its neck, like that one?" "Yes."

"Will I have a saddle for it?" "Yes, and a harness, too."

"Will papa get a cart for it?" "Yes, of course papa will get a cart."

"Will I hitch it all myself?" "Indeed you will. Won't that be fun?"

"Oh, mamma, will it be there when I wake up?" "I shouldn't wonder."

"Will it sleep in my play shed?" "Of course."

"May I drive it all myself, wisout papa in the cart?" "Perhaps."

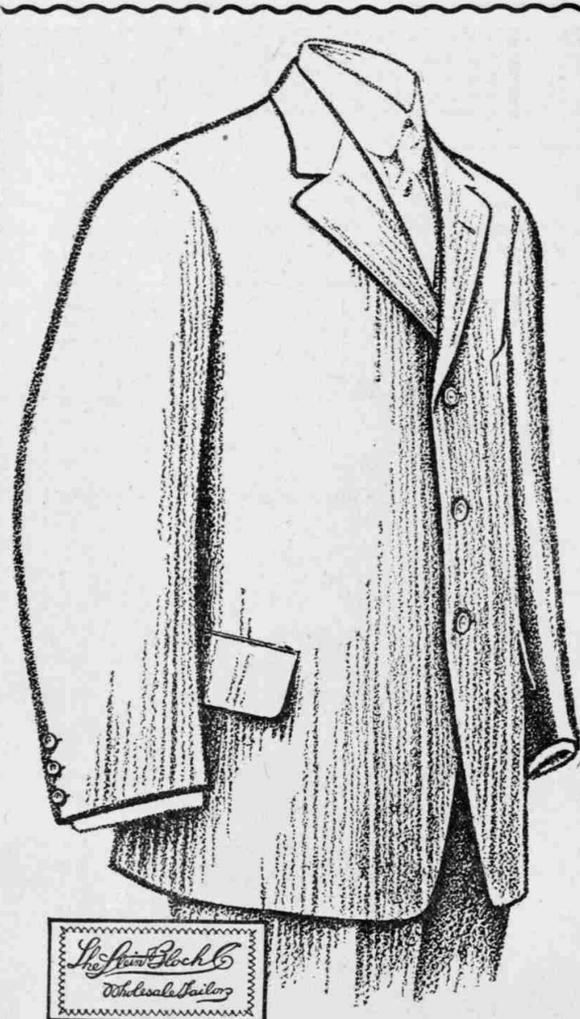

"Will I have a whip in the cart?" "Yes."

"And sugar?" "Yes."

"And will I give it a dwink all by myself?" "Yes, yes, Johnnie. Now don't ask me any more questions. Mamma's tired."

Johnnie laid his head against his mother's arm, and soon was sound asleep, dreaming, no doubt, of the pony he expected to have the next day. The father was sitting across the aisle and he looked over, at the sleeping child, saying: "The kid's shut up, has he?" "Yes," said the mother, "ain't it a joke? He thinks he's going to have a pony to-morrow."

Poor, dear little Johnnie! One listener, who had seen the child persuaded to leave the pony back and had sat back of him in the car, felt a lump in her throat when she thought of Johnnie's to-morrow.

Here's a Thought For You, Sir,

If you are interested in clothes.

Economy truly means getting for the least outlay what will do you the most good. If fit and style and long wear--all superior to others--are good for you when it comes to clothes, you will be interested in our

SEALED TENDERS FOR STEAMSHIP, FREIGHT AND PASSENGER DEPOT ON ALAKEA STREET WHARF.

Sealed Tenders will be received by the Superintendent of Public Works until 12 m. of Monday, July 13, 1908, for the construction of the Steamship, Freight and Passenger Depot on Alakea Street Wharf, Honolulu, T. H.

Plans and specifications are on file in the office of the Superintendent of Public Works, copies of which will be furnished intending bidders on receipt of Twenty-five Dollars (\$25.00), which sum will be refunded on return of said plans and specifications.

All tenders to be on blanks furnished by the Superintendent of Public Works and to be accompanied by certified checks made payable to the Superintendent of Public Works.

Separate tenders will be accepted for painting, plumbing, electrical work, sheet metal work and staff work. The Superintendent of Public Works reserves the right to reject any or all bids.

All intending bidders are requested to be present at the office of the Superintendent of Public Works at 11 a. m. of July 13, the day of opening tenders. MARSTON CAMPBELL, Superintendent of Public Works. Honolulu, June 13, 1908. 8065—June 15, 16, 17, 18; July 1, 2, 3.

READ THE ADVERTISER WORLD'S NEWS DAILY

IN THE CIRCUIT COURT OF THE THIRD CIRCUIT, TERRITORY OF HAWAII.—AT CHAMBERS. IN PROBATE.

In the Matter of the Estate of Antone Gonsalves, Deceased.

Order of Notice of Hearing Petition for Allowance of Final Accounts, Distribution and Discharge.

On reading and filing the petition and accounts of L. S. Augst, administrator of the above estate, of Honolulu, North Kona, Hawaii, T. H., wherein he asks to be allowed \$133.70, and he charges himself with \$462.20, and asks that the same may be examined and approved, and that a final order may be made of distribution of the property remaining in his hands to the persons thereto entitled, and discharging him and his sureties from all further responsibility as such administrator;

It is Ordered, That Thursday, the 25th day of June, A. D. 1908, at ten o'clock a. m., before the Judge of said Court at the courtroom of the said Court at Kailua, Island of Hawaii, be and the same hereby is appointed as the time and place for hearing said petition and accounts, and that all persons interested may then and there appear and show cause, if any they have, why the same should not be granted, and may present evidence as to who are entitled to the said property. And that notice of this order, in the English language, be published in the Pacific Commercial Advertiser, a newspaper printed and published in Honolulu, T. H., for three successive weeks, the last publication to be not less than two weeks previous to the time therein appointed for said hearing.

Dated at Kailua, this 18th day of May, 1908. (Sgd.) JOHN ALBERT MATTHEWMAN, Judge.

Attest: JOHN GREIG, Clerk. (Seal)
