**Mutual Telephone Secures its Bonds With Lien on All Property.**

A deed of trust covering all the property of the Mutual Telephone Company was filed in the bureau of conveyances yesterday morning, the deed being in favor of the Hawaiian Trust Company. The conveyance is to secure the \$250,000 bond issue of the Mutual by which the company proposes to raise funds to carry out its plans of improving and extending its system.

The deed recites the action taken at the meeting of the stockholders on August 31, at which the directors were authorized to borrow the sum of \$250,000, issue 6 per cent. coupon bonds of the Mutual Telephone Company, and execute a mortgage or trust deed on all the property of the company to secure the payment of the principal and interest of the bonds.

Twenty-five thousand dollars, par value of the bonds, it is specified, shall be in the denominations of \$100 each, and the remaining \$225,000 in denomination of \$1000 each.

**HOW FAT WOMEN OUGHT TO DRESS**

CHICAGO, Sept. 22.—Carl Wernitz, president of the Academy of Fine Arts, where young people and women of fashion assemble to learn esthetic principles, today gave the dressmakers in convention here a few pointers on how to dress.

"A fat woman," said Wernitz, "should not wear a black skirt and a white shirtwaist." Somebody in the audience appended, "neither should anybody else."

Wernitz then softened his dictum with the modification that "unless she sticks a little black bow at her throat and puts on a black hat and long black mitts."

Nobody refuted the esthetic principles here implied and Wernitz further devoted himself to the beautification of fat women.

"She should pay particular attention to her shoulder seams," he said. "They should be brought up straight and high. By so doing she can add several inches to her apparent height. She should never, on the other hand, go in for broad shouldered effects. She should not wear horizontal yokes, and she should not wear skirts with circular flounces on them, nor anything that tends to give her a three or four storied effect."

Having thus dealt with the fat women, Wernitz addressed himself to the needs of the round shouldered woman, the broad hipped woman and the woman with the fat face.

"The only thing in the world that can save this last unfortunate non-conformer to the canons of art," continued Wernitz, "is for her to be careful of her hat. She should wear one which, while not too wide, is not yet too narrow—one which turns up somewhat on the sides, but not too much."

"The woman with broad hips should distract popular attention from them if possible, and if anything can accomplish this, it is a clever trick of drawing the eye to the shoulders. To do this make your shoulders look broad by widening the shoulder seam. If your shoulders are the ones sinning against the canons of arts, divert attention from them by pinning a bow on your hips—or otherwise enlarging them—preferably otherwise."

"The round shouldered woman, if she objects to the simple corrective of standing straight, can simulate erectness by making her hair into a psychic knot, extending backward to approximately the point in space which it would touch if she stood as she should. By this simple device and another one of hauling her shoulder seams as far back as possible and sticking a fluffy jabot on the front of her round shouldered woman can simulate a fair degree of erectness."

Wernitz concluded his remarks with the observation that the man who designs a successful dress has a much greater influence on American art than the man who paints a picture to be hung in a gallery where nobody ever goes to see it.

**WANTON CRUELTY ON DIAMOND HEAD ROAD**

A case of wanton cruelty to animals was witnessed yesterday morning about 10 o'clock on the Diamond Head road when the Portuguese driver of a contracting firm belabored his mules with a coupling chain. When remonstrated with for his inhuman conduct the driver became abusive and grossly insulting.

It is reported that horses and mules are frequently overtaxed on this road. Two wagon loads of cement are required to be drawn by six mules. The grade there is three or four per cent, and the road is not hard-surfaced enough to making this an easy haul.
