A FALSE HEART. Coffee Does Not Let It Beat True. "Coffee served me a very bad turn about two years ago. My doctor said I had chronic dyspepsia, with serious heart and nervous trouble, and nothing would cure me unless I gave up coffee," said Miss Mattie Williams, of Birmingham, Ala.

"My stomach got so bad that I could not eat any solid food without its nauseating me, and I was so nervous I could not sleep and my heart was in a dreadful condition. I had heard a great deal about Postum Food Coffee and how much good people had derived from changing from coffee to Postum so one day I sent to the grocer for a package.

"The first cup I drank helped me, for it removed all the gas from my stomach, or perhaps the quitting of coffee produced that result, at any rate, in less than a week there was a wonderful change; no more restless nights; no more pains around my heart that made me think I had heart trouble; no more sick stomach. This was two years ago. I am now entirely well and Postum cured me. I found it was not medicine I needed, but proper food and nourishment and to quit coffee entirely.

"My brother-in-law (a coffee drinker) was very sick with stomach trouble and all he could eat was the white of an egg. I insisted on his trying Postum. He said the first cup he drank soothed his stomach and was nourishing; in a few days he was able to eat solid food again, and now he uses Postum altogether and does not use coffee.

"My next door neighbor, another coffee drinker, had suffered with catarrh of the stomach, and for months could not eat anything—was just living on beef tea. I carried her some Postum and gave her directions for making it, and now she can eat anything she wants and it does not hurt her. She says she feels better than she has for ten years.

"I could tell you of dozens of people who have been benefited by leaving off coffee and drinking Postum. It has done me so much good I tell everybody to use it. I have been using it now for two years and my digestion is fine, my complexion clear and every one says I look ten years younger."
