The filing of a suit in the district court Wednesday evening, one hour after the clerk's office closed, resulted in the issuance of a writ of attachment against the personal property of Henry J. Thompson, editor of the Reflector. Sheriff Hutson attached Mr. Thompson's household effects at the Northwestern freight depot at about 8 o'clock. The goods were consigned to Chicago. The attachment was secured by Merritt Greene, representing himself and Charles E. Hatcher, former owners of the newspaper property.

Mr. Greene's suit, in which Mr. Hatcher's interest is endorsed by Mr. Greene, is on a promissory note for \$13,75, made on June 8, 1908, and payable in sixty days, with interest at 6 per cent. The sheriff also attached the office of the Reflector Printing company, in order to further secure the claim of Mr. Greene. S. G. Wells, of Des Moines, a friend of Mr. Hatcher, was placed in charge of the Reflector office Wednesday night, but today the property was turned over to the charge of Joseph Whitacre, who has been connected with the paper for some time.

Mr. Whitacre issued today the paper would be issued as usual today, and for all he knew it would appear as usual indefinitely. Mr. Whitacre said that the company had been doing a good business, and he was very much surprised when he learned of the change. At present the office is filled with job work that will take three weeks or more to complete.

MANY STUDYING TO BECOME ENGINEERS

Iowa Central Firemen are Investigating Engine Making and Science of Air

GOSSETT'S TEST IS THOROUGH

New Master Mechanic of Iowa Central Insists on Examination Such as is Given Engineers on Big Trunk Lines—Ordinary Every Day Experience is Not Enough.

The mere knowledge of how to run an engine, and the road's time card, is not sufficient to become an engineer on the Iowa Central now, according to the ruling made by Master Mechanic C. E. Gossett. The new head of the machinery department of the road is thorough in his examination for engineers, and as a result more than a score of firemen are working nights in posting themselves along educational lines.

Master Mechanic Gossett is demanding of his classes of firemen knowledge of engine and air as is necessary to become engineers on the big trunk lines. In fact the master mechanic thinks that an engineer can not know too much about an engine. Ordinarily, on the Central, the knowledge of running an engine, how to repair breakdowns, and the time card, are the principal factors in the "setting-up" process. In addition to these matters the present master mechanic is insisting on a complete knowledge of air, and the machinery of an engine. In the latter requirement an engineer must be able to tell practically everything about the making of an engine, even to details. In the air test he must know how long it will take to stop a certain length train, with a given amount of air, in cases of emergencies. Many other technicalities are to be mastered.

Several classes of firemen have taken the examination for engineers, and have "fallen down" on the newer requirements. Mr. Gossett has given them three months' time in which to master the intricacies of machinery and air, and at the end of that time they will try the test again. Firemen who have not yet served sufficient time to take the examination for engineers, are improving their time in study, so as to be ready for the thorough test when they can take it.

This Recipe for Home-Made Cough Cure is Worth Saving

Most of the suffering and most of the serious diseases that result from colds and coughs could be entirely prevented if the proper medicine were on hand and could be taken conveniently when the first signs of trouble appeared.

By saving the recipe given below you will always have an excellent prescription for colds and coughs. Or better yet, by making up the remedy you will always have it handy. A teaspoonful dose, taken when the first symptoms arise, will ward off a vast amount of suffering and possible danger. This is the recipe:

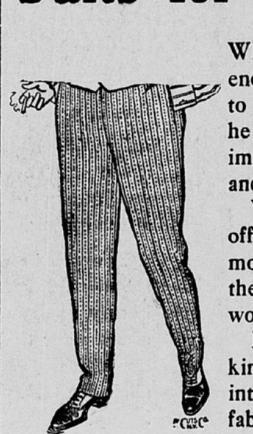

Granulated Sugar Syrup... 1 1/2 oz. Pinex... 2 1/2 oz. Put the Pinex (2 1/2 oz. worth) in a pint bottle and fill up the bottle with the Granulated Sugar Syrup, made as follows: Take a pint of Granulated Sugar, add one-half cup of water, stir and let boil just a moment. If kept well corked it will never spoil, so that this pint of cough medicine will last a family a long time. It can be made in five minutes at a total cost of about 64 cents, and is very pleasant to take. Dose: A teaspoonful every one, two or three hours as required. Simple as it is, it is in every way superior to the read-made syrups that cost five or six times as much. Obstinate deep-seated coughs usually yield to it inside of twenty-four hours. It is also an excellent remedy for whooping cough, pain in the chest, bronchial troubles, hoarseness, etc.

In using this recipe get the real Pinex, which is the most valuable concentrated compound of Norway White Pine Extract and is vastly superior to the weaker pine oil or pine tar preparations. Your druggist has it or will gladly get it for you if you ask him.
