

END OF A RED NOSE

New Flesh-Colored Product That Heals and Hides Skin Imperfections.

A peculiar feature of posium, a new skin discovery, is that it is naturally flesh-colored and contains no grease, so that when used on the face for the complexion, or for pimples, red noses, or any other inflammations, blemishes, or discolorations, its presence cannot be detected. It can thus be applied in the daytime, the natural color of the skin being immediately restored and the actual healing and curing process accomplished in a few days. It can be had of any pharmacist who sells pure drugs. The McBride & Will Drug Company make a specialty of it. Fifty cents' worth will answer either for the troubles mentioned or in curing ordinary cases of eczema. Itching stops at once.

The Emergency Laboratories, No. 22 West Twenty-fifth street, New York, are the sole dispensing agents for posium in the United States, and will send an experimental quantity free by mail in plain wrapper to all who write for it. This will show results after an overnight application.

PROFITS MEET EXPENSES.
Short Course Treasurer Reports That Short Course Made Good Financially
P. L. Collins, of Taylor township, treasurer of the Central Iowa Short Course Association, says that the association will break even or a little better on receipts and expenditures of the recent short course. The receipts from all sources aggregated \$1,366. Just what the expenses will total up can not be definitely stated as yet, for the reason that but comparatively few of the bills incurred have been presented for payment, due chiefly to the bad condition of the roads, but the treasurer is known to warrant the statement that the receipts are more than ample to cover all claims.
Had the short course been held at a time when country roads were in better condition, the attendance and corresponding "gate receipts" would naturally have been much larger.
