

Give Your Stomach A Vacation

By Using Stuart's Dyspepsia Tablets Which Digest Food Without Any Aid.

A Trial Package Sent Free.

The stomach should have a rest when it is tired out and irritated from dyspepsia and indigestion. One should not call upon the stomach in this condition to do its full and complete duty.

When you feel as tho your stomach were a piece of lead, when gases or foul odor issue from your throat, when your tongue is coated and your appetite gone, it is high time to send your stomach on a vacation.

The stomach is constantly coming in contact with foreign substances, which it must reduce in form to give strength and health to the other organs of the body.

If the stomach becomes deranged and can not furnish all that is necessary, it weakens the entire machinery of the body.

Stuart's Dyspepsia Tablets impart all the power, vigor and strength necessary to the stomach. They do the stomach's work and without calling on this organ for assistance.

If you would put your meal in a glass jar and with it place the correct amount of Stuart's Dyspepsia Tablets you could sit down and watch these little tablets digest the meal as perfectly as the most healthy stomach.

Stuart's Dyspepsia Tablets are made in almost every state in the union by these tablets, one grain of a single ingredient being capable of digesting 3,000 grains of food.

If you have the slightest doubt about your stomach, go to the nearest drug store and buy a box of Stuart's Dyspepsia Tablets, price 50 cents, or send your name and address and we will immediately send you by mail a trial package free.

FERRET CASE SOON

SUPREME COURT TO REVIEW TAX CONTEST FROM WOODBURY COUNTY.

JUDGE M'COY TAKES WHACK AT MEMBERS OF THE COURT

Charges Judges With Ignoring All the Questions at Issue and Asks a Rehearing—Bell-Brown Civil Rights Case Up Again on Application for Rehearing—Other Suits.

Special to Times-Republican. Des Moines, Feb. 7.—The supreme court meets again tomorrow for the second period of the January term.

Oral arguments are set for tomorrow and every day up to and including the 10th. At this period there will be brought to the city attorneys from the Seventh district—Scott, Muscatine, Jackson and Clinton; from the Eighth district—Johnson and Iowa; from the Tenth—Blackhawk, Buchanan, Grundy and Delaware; from the Eleventh—Boone, Webster, Hamilton, Story, Wright and Harding; from the Twelfth—Butler, Bremer, Floyd, Winnebago and Cerro Gordo; and from the Ninth—Polk. The docket does not disclose any cases of much public interest.

The Mayor Henderson case was submitted for rehearing. The case of the Leroy Ware case; also the Dr. Sells murder case. The John Junkin appeal to save him from a hanging does not appear to be ready yet for argument. The application for a rehearing in the Bell-Brown civil rights suit may be heard by the court, the new points are raised and their little room for arguing.

A somewhat notable application for rehearing has just been made to the supreme court by Judge McCoy, of Oskaola, in the case from Woodbury county involving the refusal of the county treasurer to assess property disclosed by a tax ferry. The property was the stock in the Stock Yards company. The assessor had decided that as the yards were assessed the stock was not assessable. The ferrets tried to get the county treasurer to assess but he pleaded that the assessor had decided everything and refused to act. The supreme court also decided that the treasurer having decided the matter it was already disposed of. Now comes Judge McCoy, for the tax ferrets, and in a sharp whack at the court, calls attention to the fact that the county treasurer did not adjudicate anything but asks a rehearing on the ground that the supreme court did not decide the matter on the points argued but upon a misapprehension of the status of the case and ignored all the questions at issue. It is contended that the matter is of vast importance because it asks a rehearing on the coming up in almost every county and as the court has never decided what is the duty of a county treasurer in the matter of making assessment of disclosed property of this kind a decision ought to be had.

It seems certain that some action is due to compel the railroads to make better reports on their issuance of free passes to residents of Iowa. The Union Pacific, for instance, simply refuses to make a report on the ground that all passes are of interstate character and are not subject to taxation. It is contended that the Iowa law contemplates a report on passes issued to Iowans, regardless of the character of the passes. Nearly all the roads reporting simply give a few of the pass holders and evidently omit the great body of those who give permits.

Secretary Simpson has received word of quite a number of county road meetings called since he sent out the first of the year his memorandum to county officers in regard thereto. These are the county meetings contemplated in the law, the basis for which is a conference between the county officials and the township trustees to confer in regard to highways and the road law. It seems that many of the county officials did not know of this law.

The grain dealers who attended the state convention last week attracted a great deal of attention, and the convention was a surprise to the Des Moines residents both as to size and personnel. In fact, the organization that usually make a great deal of fuss over the coming of any body of men, did little advertising of this convention. Ben Parker, who sat around the Savery lobby and talked with the delegates, said of them, "there was a golly spunking in the college farmers among them, too. This is a bunch of men that will have to be reckoned with in the future. They are prosperous and they know how to do business."

PRIZE WINNING SPELLERS.

Cerro Gordo County Awarded District Honors in Charles City Contest. Mason City, Feb. 7.—Cerro Gordo county won the second, third, twelfth and fourteenth prizes at Charles City at the spelling match given by the short course and carried off in prize money a total of \$28. Merle Ransom, daughter of Mr. and Mrs. Tod Ransom, this city, and a pupil of the Washington school, won second prize and a total of \$14 in prize money. The third prize was won by Edna Stanfield, of Portland No. 2, who got \$7 in prizes.

KG 25 Saves Money and Worry

while twelfth prize went to Julia Bryant, Lincoln No. 2, and the fourteenth to Hazel Nye, Lincoln No. 9, receiving \$5 and \$2 respectively. Superintendent Mahannah, who accompanied the class to Charles City, was considerably elated. The \$10 which was raised locally as prizes was divided among the winners, which helped their prize budget.

The first prize was won by Wesley Ralsty of Floyd county. There were 105 contestants, of which Cerro Gordo entered six, all of whom got prizes. Chickasaw county got the ninth prize and Floyd county got all the rest. The first Cerro Gordo contestant to go down was the seventy-ninth of the entire number.

FOR PRACTICAL ORATIONS.

Dr. Kepford Would Have Graduates Discuss Tuberculosis Topics. Des Moines, Feb. 7.—Dr. A. E. Kepford, state tuberculosis expert, will soon send circular letters to all city and county school superintendents requesting them to assign some member of the graduating class to give a commencement oration treating on the tuberculosis problem. Dr. Kepford's idea is to have these commencement orators take up the question of the social life and tuberculosis. He believes that if one member of each graduating class will give a commencement oration on the tuberculosis problem, it will give to an article along this line that is given to other subjects, a statewide interest in the campaign against the white plague can be stimulated.

Dr. Kepford returned Saturday night from Kirksville, Mo., where he delivered several addresses explaining the Iowa law pertaining to the treatment of this subject, and also outlining a plan of campaign for securing for Missouri laws similar to those of Iowa. He will direct the campaign in Missouri.

EXTENSION WORK BEGUN.

Active Operations on C. & N. W. Line South From Belle Plaine.

Belle Plaine, Feb. 7.—The Chicago & Northwestern railway is now beginning active construction work in extending the southern terminal at Belle Plaine. The new extensions will open up more coal fields in the vicinity of Albia. It is believed that the new extensions will be from thirty to sixty miles. In the course of time this south branch from Belle Plaine will without doubt be extended on to Kansas City, Mo. The Northwestern is the only one of the "Granger Roads" which does not have a Kansas City connection at the present time. Such a change will, of course, mean increased business on the south branch, in addition to the present very heavy coal business which it means more railway business at Belle Plaine.

EIGHTH TOWN IN CIRCUIT.

Cedar Rapids and LaSalle Candidates For Northern Assn. on Gap.

Special to Times-Republican. Clinton, Feb. 7.—LaSalle and Cedar Rapids are prospective cities to complete the circuit of the new Northern Baseball Association, and a committee consisting of W. T. Oakes of this city and Con Straubers of Jacksonville has been appointed to take action in the matter of awarding a franchise to the eighth team. The probabilities are that Tom Sullivan will manage the Clinton team, although this matter has not been definitely decided, and no action has been taken on the application of other baseball associations which wish to secure the job. Clinton fans are enthusiastic over the new circuit and believe Clinton will have a first division aggregation.

A WATER POWER PROJECT.

Survey Made for Dam Above Eldon on Des Moines River.

Ottumwa, Feb. 7.—A big water power dam across the Des Moines river above Eldon, built on the same plan as the Keokuk water power dam across the Mississippi, which would furnish electric power for Ottumwa, Eldon and other cities in the southeastern part of the state, is a likely project. Engineer Dobson, with the Iowa electric commission in company with Major C. L. Shane of Eldon, was making a survey of the river Saturday between Eldon and Ottumwa. The site of the dam is above Eldon and those interested in the project declare the advantages would be great to the people of Eldon and Ottumwa as the big Mississippi dam to the people of Keokuk and adjoining towns.

IMPORTANT COURT RULING.

Students Must Cast Ballots at Place They Live at Home.

Cedar Rapids, Feb. 7.—In the district court Saturday Judge Smith decided adversely to non-resident students' claim to a right to vote where attending school. The case came from Mr. Vernon, where a Carnell E. Ent, defendant, sued the section judges for \$500 damages. The case may be appealed to the supreme court.

Reinbeck Out of Race.

Special to Times-Republican. Reinbeck, Feb. 7.—Grundy Center defeated Reinbeck 23 to 20 in a game of basketball here. This puts Reinbeck, which was champion last year out of the Van Patten trophy race and leaves Waterloo and Grundy to pull off the rub.

Fourth Priest's Death.

Sloux City, Feb. 7.—Rev. L. P. Dagnault, late pastor of St. Jean Baptiste French Catholic church, was the fourth priest in the diocese of Sloux City to die in as many months. The others were Rev. Mgr. B. C. Lenehan, Ft. Dodge Rev. F. X. Roeseiler, Mallard; Rev. Joseph Friedman, Carroll.

Engineer to Lose Eye.

Mason City, Feb. 7.—The bursting of a water glass in his engine drove a fragment of the glass into the eye of Engineer Charles McEldoon, burying himself in the flesh, cutting the eye out and the muscles and will destroy the sight, it is thought. The fragment was over a quarter of an inch in length and over an eighth of an inch thick. The impact knocked Mr. McEldoon from the seat box.

TO FIGHT LIQUOR LAW

INJUNCTIONS ISSUED AGAINST ANTI-SALOON LEAGUE AT SIOUX CITY.

CONSTITUTIONALITY OF MLCCT LAW ASSAILED BY ATTORNEYS

New Move in Defense Against Activity of Law Enforcement Organization—Law Attacked as Destroying a Legal Business Making Appeal Useless—Other News of the State.

Sloux City, Feb. 7.—Injunction writs restraining the Woodbury County Anti-Saloon League, H. H. Sawyer, N. R. Hathaway, S. J. Johnson, George H. Cummings, members; John F. Joseph, attorney, and E. G. Dilley, sheriff, from going on with contempt proceedings instituted against Frank J. Donohoe, proprietor of the Hotel West, in the district court in January, have been issued by Judge Henry T. Reed, of the United States circuit court for the northern district of Iowa, and were served by Deputy United States Marshal J. A. Tracy.

The writs were drawn up on instructions from Judge Reed by the clerk of courts at Dubuque. The hearing on the application for a permanent injunction against the anti-saloon people will be held May 24. The league, however, on giving ten days' notice, can move the vacation of the restraining order.

The case marks a new move in the defense against the Anti-Saloon League, it being the first liquor case from Woodbury county and the second in the state which has been taken to the federal courts. The hearing on the case will result in an attack on the constitutionality of the entire liquor law by Mr. Fribourg who has prepared the briefs. He will contend that the liquor statutes in violation of the federal constitution.

The points which are made against the liquor laws are as follows: 1. The statutes violate the constitution of the United States. They permit legal business to be destroyed without remedy, tho it might be proved later that the business was legal.

2. They permit ruinous penalties and imprisonment for violating injunctions without remedy or recourse even tho there might be final adjudication showing that injunction should not have been granted.

3. They make appeal useless and can only be taken on condition that appellant should first abandon the business which the appeal might decide should not have been interfered with.

4. They deny equal protection of the laws. They permit trial of one charged with liquor offense on terms not exacted from those charged with other crimes.

5. Litigants are not given same immunities as other litigants of like class. Rev. H. H. Sawyer, superintendent of the Anti-Saloon League, said the league would take the case to the United States supreme court if necessary.

NEEDLE FROM CHILD'S BODY.

Singular Case is Discovered in Audubon County.

Audubon, Feb. 7.—Charles Rippley was taken to the Owen Davis sanitarium here last night about a year and a half old to Dr. Fulton a few days ago for examination. She was not particularly sick but not well. The doctor upon examination, discovered some quite hard about the object and a full sized needle came thru the skin and he removed it. How it got there or when no one knows, but it had been there for some time as it had turned black. The child is getting along nicely now. The doctor discovered a small hole where it had evidently entered, but could not tell just how long it had been in the child's body.

SESSION OF LATTER DAY SAINTS.

Well Attended Meeting at Logan—District Delegates and Officers Chosen.

Logan, Feb. 7.—The Latter Day Saints meetings in Logan have been exceptionally well attended by delegates from the different parts of the Little Sioux district. The reports of the different Sunday schools showed a marked increase and very satisfactory work along the line of Sunday school work in the district.

Thirty-five delegates were elected to attend the general conference to be held at Lamoni in April, to represent the district, and sixty-eight to represent the Sunday school interest of the district.

Elder W. W. Baker, of Logan, was

elected general superintendent of the Sunday school of the Little Sioux district; Esta Stewart of Mondamin, secretary, and Will Stewart of Mondamin treasurer.

W. R. Adams, of Logan, was elected president of the religion society; Raymond Smith, of Woodbine, vice president; Mrs. L. Mann, of Moorehead, secretary, and Mrs. T. M. Adams, of Logan, treasurer.

IDA GROVE NEWS ITEMS.

Business Changes—Rux Children to Catholic Home—Corn Fields Ravaged. Special to Times-Republican.

Ida Grove, Feb. 7.—Wilbur Piersol, an attorney who moved from here to Sloux City about a year ago, has returned and has formed a partnership with M. M. White, county attorney. The new firm will be known as White & Piersol.

Wilson Bender, proprietor of the Palace Hotel, has opened a meat market across the street from the hotel. This market is three meat markets in town. The five little daughters of Mr. and Mrs. Charles Rux have been taken to the Joseph's home at Kansas City. Mr. Rux is securing a divorce from his wife and places the children in the home until such time as he can secure a home and provide for them himself.

Farmers report much damage is being done to the corn in the fields by birds and small animals, the snow is so deep the birds can easily reach the ears. Some estimate one-fourth of the crop is destroyed from this cause. Thomas Hayne, who has been dangerously sick from blood poisoning, caused by paring his corns with a razor, is improving and hopes are now entertained for his recovery.

Brief News of Tracer.

Special to Times-Republican.

Tracer, Feb. 7.—The Charles Webster farm of 160 acres, three or four miles south of Tracer, has been rented for this year to W. F. Steuben, of Council Bluffs, Iowa, at a consideration of \$350. Mr. Steuben is a brother of Fritz Steuben of this township and recently sold his farm in western Iowa. He will move here some time this month.

Mrs. R. J. Melchert and daughter, Mrs. White, of Chicago, were in Tracer the past week. They are the owners of the Melchert 400-acre farm one mile north of Tracer and while here rented 150 acres of the unimproved land to F. L. Elliott at a consideration of \$3.50 per acre.

John W. Brown, son of William Brown, of this city, this week bought the Sarah J. Phelps farm near Waterloo at \$20,000. Mr. Brown buys for speculation.

J. G. Kober has rented his farm northeast of Tracer to T. F. Summerhayes and contemplates moving to Waterloo March 1.

George Saul, north of town, has purchased a farm of 640 acres in the neighborhood of Dil and 80 per acre. He has one set of buildings already and Mr. Saul thinks of erecting another set. He also purchased a farm of eighty acres seven miles from Waterloo, known as the Walls place at \$115 per acre and contemplates moving onto the same in the near future.

There is a new man at the home of Mr. and Mrs. Henry Christiansen, south of town, also a son at the home of Mr. and Mrs. A. J. McGovern.

An examination was held Saturday afternoon in the town hall for aspirants for the position of census enumerator to be held here, conducted by Postmaster Thomas All aspirants living in the north half of the county were examined here.

Miss Mabel Reid of this city, has been elected to a position in the schools of Pomeroy, Iowa, at a salary of \$55 per month, and has gone to that place to enter upon her new duties. She has been in college in Cedar Falls and was to have completed the course in March, which she will now do later in the summer.

Dr. J. E. Snowden, of Cedar Falls, occupied the Congregational pulpit on Sunday morning and evening. Paul Ewing accompanied Emil Yelnek to the Pacific coast on a pleasure and prospecting trip the past week. He will spend several weeks out there principally in Oregon and Washington.

Mr. and Mrs. Robert Witwer have returned home from Chicago, where the former has been taking treatment for tuberculosis. Mr. Witwer is quite weak but on the whole his condition does not seem much changed.

Alfred Loder, Sr., ten miles south-west of Tracer, has been ill all winter and confined to his home. He is a little better of late and able to be out of bed.

Grant Thomas was in Howard county the past week arranging to move to the farm he rented up there recently.

Tiny Babe at Iowa City. Iowa City, Feb. 7.—Dr. and Mrs. F. O. Burk of Iowa City are the proud parents of a baby daughter which weighs exactly one pound and six ounces. The babe has been taken to the university hospital where every effort possible is being made to save its life by means of a baby incubator.

FIRE'S HEAVY TOLL

LOSS THRU CONFLAGRATIONS LEVIES ENORMOUS TAX ON PEOPLE.

GOVERNMENT ISSUES FIGURES AND POINTS A MORAL

Millions Might Be Saved to Property Owners by Proper Construction of Buildings—Fires Also Levy Heavy Toll on Human Life—Faulty Construction Blamed.

Washington, Feb. 7.—Fire, stolen from heaven by Prometheus, according to ancient Greek mythology, and as a blessing brought by him to earth in a hollow reed after Zeus had deprived mankind of it, levies upon Americans each year an enormous tax calculated by United States government officials at almost a million and a half dollars a day and 1,449 lives a year. As a result of an investigation just concluded by officials of the United States geological survey it has been ascertained that cheaper fireproof materials can be used to advantage in construction, that three to six times the necessary amount of material is habitually used in structural work in the United States, that the building codes are laxly enforced, that the fire loss in the United States is eight times as much per capita as in any country in Europe and that the great fire waste in the United States is due principally to the predominance of frame buildings and to defective construction and equipment.

Contrast between these mail losses by fire to government buildings and the immense losses reported from the country as a whole led the geological survey to make an inquiry as to fire losses in the United States and as to their exact cost to the people. Tests to determine their strength and fire resistance of building materials are still being made by the survey, and altho these tests are designed primarily to meet the needs of the government as a larger consumer, their results are available to anyone for general use.

Government Carries Own Insurance. Not one person in a thousand knows that the United States government owns buildings that cost more than \$300,000,000 and is spending \$20,000,000 a year for new buildings. It will be a surprise to everyone, too, to learn that not one cent of insurance against loss by fire is carried on these valuable buildings. Insurance at the ordinary rate would cost more than half a million dollars a year. From these tests it is determined that the strength and fire resistance of building materials it has been determined that American builders can with safety use cheaper fireproof materials than they do. It has been learned that the difference in cost between fireproof and non-fireproof buildings is less than generally supposed and the officials predict that this difference will soon become so small that it will cease to encourage the construction of flimsy buildings. It has been found that three to six times the necessary amount of material is habitually used by American builders in structural work. The necessity also is shown for better building codes in cities and especially of a better enforcement of the codes already enacted if the present enormous fire losses are to be diminished.

Fires a Heavy Tax. After a careful investigation it has been determined that the total cost of fires in the United States in 1907, excluding that of forest fires and the marine losses (in themselves an extensive but including excess cost of fire protection due to bad construction and excess premiums over insurance paid, amounted to the enormous sum of over \$455,485,000, a tax on the American people exceeding the total value of all the gold, silver, copper and petroleum produced in the United States in that year. The cost of building construction in 1907 in forty-nine leading cities of the United States reporting a total population of less than 15,000,000 amounted to \$681,076,286, and the cost of building construction for the entire country is conservatively estimated at \$1,000,000,000. Thus it will be seen that nearly one-half of the value of all the new buildings constructed within one year is destroyed by fire. The annual fire cost is greater than the value of real property and improvements in either Maine, West Virginia, North Carolina, North Dakota, South Dakota, Alabama, Louisiana, or Montana. In addition to this waste of wealth and natural resources, 1,449 persons

were killed and 5,654 were injured in fires in the United States in 1907.

Faulty Construction Blamed. The "geological survey" inquiry which is embodied in a report entitled "The Fire Tax and Waste of Structural Materials in the United States," prepared by H. M. Wilson and J. L. Cochrane, of the survey, covered not only the value of property destroyed but also the cost of maintaining fire departments, the amount of insurance premiums paid less the amount returned, the cost of protective agencies, the additional cost of water supplies, and other elements of the fire loss. The report gives the method of gathering the statistics collected, makes an analysis of the fire loss in city and country and on frame and brick buildings, and contains tables showing the increased cost of fire protection due to faulty construction.

The actual fire loss in the United States due to the destruction of buildings and their contents amounted to \$215,084,709 in 1907. This was \$2.61 less per capita. The per capita loss in the cities of the six leading European countries amounted to but 33 cents. Comparisons of the total cost of fire, which includes the items already stated, show that if buildings in the United States were as nearly fireproof as those in Europe the annual fire cost would be \$90,000,000 instead of \$456,000,000.

Chocolate-coated tablets, combine the most successful remedy for all humors and eruptions, promote kidney ailments, loss of appetite, that tired feeling, which is embodied in a report entitled "The Fire Tax and Waste of Structural Materials in the United States," prepared by H. M. Wilson and J. L. Cochrane, of the survey, covered not only the value of property destroyed but also the cost of maintaining fire departments, the amount of insurance premiums paid less the amount returned, the cost of protective agencies, the additional cost of water supplies, and other elements of the fire loss. The report gives the method of gathering the statistics collected, makes an analysis of the fire loss in city and country and on frame and brick buildings, and contains tables showing the increased cost of fire protection due to faulty construction.
