### IS NO JOKING MATTER

People Liable For Heavy Fine For Not Giving Correct Information to Census Enumerators—Newspapers and Commercial Club Help Local Situation. If there is any one who has failed to grasp the importance of the federal census now being taken, or does not understand that it is no joke on the part of Uncle Sam, he had better get squared around and understand once and for all time that the census is no joking matter. In this city and, in fact, thruout the entire county, enumerators have not as yet had much trouble. Supervisor Morrissey believes that the newspapers have done much to help the enumerators of the city and county, and in the city the Marshalltown Club has also helped to make it much easier for the enumerators to do their work. A meeting of all the enumerators of the city was held with the supervisor Saturday night, matters were talked over at considerable length, and points that were not clear explained. The penalty for refusal to give census information to the enumerators is a fine not to exceed \$500. If a person wilfully falsifies in making a return to the enumerator, he may be fined \$2,000. Enumerators are compelled to hold all information confidential, and any enumerators communicating any information relative to the work of the census to any person other than the enumerator, or to any person who may act as an illustration to other persons of what "not to do" in answering questions. A maiden woman, who did not consider that it was her duty to answer the questions how old she was, replied that she was 15. When pressed for her correct age the woman refused to change her statement. This woman is subject to a fine of \$2,000, and the supervisor is compelled to report the names of such persons by telegraph. The names will be turned over by the director of the census to the United States marshals and arrests will follow. Another instance is reported whereby a farmer who was busy cleaning out his barn called the enumerator off and asked him to come again. This the enumerator did, and again was put off, and again. This is not permissible under the census rules, and the government considers that it is the duty of every one to give the information even at some inconvenience, and that the enumerator's time is just as valuable as the person being questioned.

### TO KEEP "TAB" ON COMET.

Weather Bureau Wants Observers to Note Details of Phenomenon. The federal weather bureau, thru its thousands of observers in all parts of the country, is going to keep a close "tab" on Haley's comet, especially on May 18, when according to astronomical estimates, the earth will pass thru the comet's tail. A circular letter of instruction has been received by R. B. Reasoner, the local weather observer, which indicates the information the government wants on this celestial wanderer. Mr. Reasoner is asked to observe and report on auroral displays, meteoric trails, rings caused by dust or vapor of gases, color of the sun and sky, twilight phenomena, luminous clouds, zodiacal light, and counter glow.
