SEATS FOR VISITORS
ARRANGEMENTS COMPLETE FOR
BIG PROGRESSIVE RALLY
TUESDAY NIGHT.

DELEGATIONS FROM OUTSIDE
TOWNS GIVEN PREFERENCE

Seating Capacity of 10,000 in Coliseum
Will Be Taxed by Audience to Hear
Dolliver and Cummins—Prouty Pulls
Some Questions Up to Captain Hull

Des Moines, May 9.—The progressive republican state committee met last night in its headquarters in the Fleming building and made the final arrangements for the big Cummins-Dolliver meeting at the Coliseum Tuesday night.

Ushers and vice presidents were appointed and the minor details of the affair arranged.

Because of the short time before the meeting the progressives have found it impossible to make arrangements whereby seats can be numbered and reserved.

A large section of seats in the cholesterium of the Coliseum has been roped off, however, and will be reserved for out of town people, upon application of Chairman Robert J. Fleming of the committee.

With no admission charges and no tickets, everything absolutely free, the progress of the campaign in filling the vast building to the roof. The band concert will begin early and the speeches will begin promptly at 7:30 o'clock.

Great enthusiasm and interest has been stirred up over the state by the coming of the senators. Fresh from the firing line of the senate and with the advance promise that the issues of the day will be discussed plainly, local progressive leaders anticipate that the senators will start the ball rolling and send the Iowa progressives rushing on with their campaign in the primaries, sweeping all before them.

At this time nothing but extreme confidence prevails in the headquarters of Governor Garst and Judge Prouty. Each sees nothing in the primary but victory for the progressive cause.

Will Hull Answer?
Judge S. F. Prouty, progressive candidate for congress, injected a little ginger into the congressional campaign when he fired a list of questions at his opponent, Captain J. A. T. Hull. The interrogations were a part of his speech delivered at Maxwell.

Judge Prouty wants Captain Hull to come out openly and say what course he will pursue should he be sent back to congress. Prouty wants the congressman to say whether he will support Cannon for speaker again, or any candidate for speaker put up by the Cannon organization. He wants to know also how the congressman will vote on the postal savings and the railroad bill, and how he stands regarding the position of the Iowa insurgent senators in their rail bill fight.

Byers is Confident.
Attorney General Byers, progressive candidate for congress in the Ninth district, has returned from a tour over his district. He reports everything in excellent condition as regards the progressive cause and expressed himself as confident of nomination and election.

He will continue his speaking campaign next week. He has dates in Harlan Monday night, Stanton Wednesday night, Malvern Thursday night, Elliott Friday night, and Casey Saturday night.

TRAVELERS TO MASON CITY.
T. P. A. Elects Officers and Transacts Annual Business.
Des Moines, May 9.—Mason City was chosen as the city for the 1911 state convention of the Iowa Travelers' Protective Association at the state convention of the association at the Savery, I. W. Keel, of Mason City, extended the invitation in behalf of that city, after which officers for the coming year were re-elected.

H. C. Stearns and A. F. Shotts, of Mason City, respectively president and secretary-treasurer of the state association, were re-elected. M. F. Derby, of Burlington, was re-elected first vice president. M. M. Anson, of Muscatine, was elected second vice president to succeed A. M. Kerr, of Waterloo, and Jacob Frank, of Keokuk, was named as third vice president to succeed F. N. Puskly of the same city.

All of the old members of the board of directors were re-elected. They are G. H. Feldman, C. J. Winter, Jacob E. Decker and E. M. Burns of Mason City, T. M. Hume, of Burlington, and C. N. Niegles, of Waterloo.

Delegates and alternates to the national convention at Chattanooga during the week of June 13 were chosen. They are: Sam Schilling, Post A; J. S. Clemmons, Post C; Gus Eckhart and C. J. Peterson, Post D; W. W. Wyatt and A. M. Kerr, Post F; D. R. Zeigler and F. W. Weit, Post G; and C. B. Lake, Post H.

Alternates elected are: J. M. Taylor, Post A; E. J. Gerbohn, Post C; M. S. Like, Post D; H. E. Weatherwax, Post F; F. W. Weit, Post G; and C. B. Lake, Post H.

EVANGELICAL LUTHERAN SYNOD.
Annual Conference in Webster City This Week.
Webster City, May 9.—The western conference of the Evangelical Lutheran synod of Iowa will be held in Webster City Wednesday and Thursday. Prominent speakers and delegates from all over the state will be in attendance.

Arrangements have been made for an evening large meeting by the members of the local English Lutheran church, where the sessions will be held. The program is as follows:
Wednesday morning—8:30, devotional service.
"The Human Jesus; Did He Live?"—Rev. F. Schmidt, Des Moines. Discussion.
"The Church and the Public School"—Rev. G. W. Snyder, Council Bluffs. Discussion.

A. B. Leamer, Des Moines.
Wednesday evening—8, devotional service.
"The Church's Worth and Work; an Appreciation"—Rev. N. J. Lentz, Nevada.
Thursday morning—9, devotional service.
"The Proper Keeping of Church Records and Their Value"—Rev. G. W. Snyder, Council Bluffs. Discussion.
Rev. L. W. Bright, Newton.
"Confirmation"—Rev. Ravid Huber, Sioux City. Discussion.
Rev. H. F. Schmidt, Des Moines.
"Dead Timber"—Rev. A. E. Isham, Fernald. Discussion.
Rev. David Huber, Sioux City.
Thursday afternoon—2:00—Devotional service.
"The Threefold Aim of the Sunday School; Winning, Holding, Training"—Rev. A. B. Leamer, Des Moines.
"The International Graded Lessons"—Rev. J. N. Lentz, Nevada.

Symposium on five minute addresses:
"Co-operation Between Superintendent and Pastor"—Rev. A. E. Isham, Fernald.
"The Teacher's Part in Building Up the Sunday School and Church"—Rev. W. L. Bright, Newton.
"The Sunday School at the Church"—Rev. G. W. Snyder, Council Bluffs.
"The Church Members in the Sunday School"—Rev. David Huber, Sioux City.
"The Real Object of the Sunday School"—Rev. H. F. Schmidt, Des Moines.

Thursday evening—8:00—Devotional service.
"The Secular Spirit"—Rev. A. E. Isham, Fernald.

K. C. CONVENTION.
State Meeting Tuesday at Carroll — Large Class Initiated Sunday.
Special to Times-Republican.
Carroll, May 9.—The state convention of Knights of Columbus will convene in Carroll tomorrow, May 10. A large class was initiated into the order Sunday. The candidates and members marched in a body to St. Joseph's hall on the south side at 9:30 a. m., where solemn high mass was said. At the conclusion of the initiatory services a banquet was served at St. Joseph's hall in the evening.

DAIRYMEN WHIP OSKALOOSA.
Council Recedes From Its Position on Tuberculin Tests.
Oskaloosa, May 9.—Under pressure brought to bear by dairymen and farmers the city council Saturday night weakened on the tuberculin test ordinance and repealed it. Consequently there is plenty of milk and cream on sale today after a partial famine that has existed since last Monday night. A new ordinance will be drawn to provide for milk inspection. City Health Physician Fred Jarvis, became so incensed over the action of the council that he resigned his office.

Southern Iowa Items
In recent years made Kansas City his headquarters in the lumber and real estate business.

Muscataine.
H. York and his juvenile companion, Glenn Windel, who were arrested at Blue Island, Ind., charged with the theft of a team belonging to the Russell livery at Wilton, and have been confined in the county jail here for several days, were taken before Judge Carl to answer to the charge of larceny. York waived preliminary hearing and was bound over to the grand jury, while Windel, who appears to be under 20 years of age, asked for a hearing, and petitioned also for counsel, for his defense.

What Cheer.
Clement Boomershrine and two brothers got mixed up in a runaway recently when returning to their home in the Springfield locality from What Cheer. Clement was driving when the horse became unruly and started to bolt. The animal whirled out of the road, striking a telephone pole, dragging Clement over the dash. In the fall the horse either kicked him, or he struck some object which cut a big gash and poked a hole in his forehead over the right eye. It was a close call to instant death.

Keokuk.
Charged with total disregard of his duties as a husband and that he had beat, struck and choked his wife, George H. Hennemann, founder and for several months editor of the Keokuk Truth, a weekly publication, has been made defendant in a divorce suit brought in the district court by his wife, Virginia E. Floyd, who before her first marriage was Virginia E. Thompson. To the above charges are added that of adultery and being a loafer. Five thousand dollars permanent alimony is asked.

Davenport.
The home of G. H. Ficke, at 906 Perry street, was burglarized Thursday afternoon between the hours of 12 and 6 o'clock and the intruder made good his escape with a gold watch, several rings among which was one diamond ring with twenty-eight small diamonds, and a large quantity of silverware, the total loss of the goods being several hundred dollars. The burglar effected entrance into the house thru the kitchen door by using a skeleton key after had ascertained that no one was at home.

Atlantic.
After having assured its moral and financial support of the project of the river-to-river dragged road the residents of the vicinity of Atlantic have followed their promises with a concrete surety, in the shape of a fund of \$10,000 for the purpose. This has come soon after the selection of the Atlantic way by the backers of the river-to-river road in the face of much competition. Along with this comes the report that another cross-state movement has been launched, the new idea favoring Cedar Rapids, Clifton and other towns to the north.

Keosauqua.
E. F. Banta, of Washington township, and several other ex-soldiers of that section, are actively engaged in the laudable effort of trying to get a soldiers' monument erected in the Concord cemetery. It is proposed to erect a memorial shaft at a cost of from \$500 to \$700, and inscribe upon it the names of all the Concord men who went into the war for their life and were killed or died while in line of duty. It is a fact known to but few Marion county people that twenty-six brave men enlisted from the Concord neighborhood between 1861 and 1865, and that of that number only six returned. All the others lost their lives from shot, shell and disease.

IOWAN LOST ON PLAINS
SAM MANSON, BOONE COUNTY
FARMER, MISSING FROM TRAIN
IN WYOMING.
Disappears in Darkness
AND NO CLUE OBTAINED
Manson Stepped From Train While Standing at Lonely Station, Leaving Coat and Grip in Car—Railway Detectives and Sheriff Seeking Missing Man—Mind May Be Affected.

Boone, May 9.—A telegram received Friday and a letter Saturday from E. E. Gilton, of Des Moines, who is accompanying a party of Iowa land accusers into Wyoming for the purpose of interesting them in that country, says that Sam Manson, a farmer residing north of Boone, is lost.

Mr. Monson, who is a single man of perhaps 35 years, was with Mr. Gilton and others Friday evening when the freight train on which they were riding toward Cheyenne was sidetracked for a passenger which was due. They stood on the track at Durham, a small town or rather a station for about five minutes, during which time Mr. Monson stepped off into the darkness. He left his coat and grip in the car, so no thought was given to his absence until he had been gone between five and ten minutes and the train was ready to go.

Two of the best detectives of the railroad company have been put on the trail to have all the tracks along the way searched.

It seems impossible that he could be so completely swallowed up in the darkness, but not a trace of his body can be found to indicate that he had been killed. It is thought by some of the old settlers there that the altitude has affected his mind and that he may be found wandering alone in the Wyoming plains. If this is the case his condition will be indeed pitiful. Every effort is being made both by Mr. Gilton and the railroad company to find him, so it is believed that he can not remain missing very long.

Davenport Infested With Thieves.
Davenport, May 9.—The entrance into two more Davenport homes in broad daylight, which makes three homes

that have been entered in precisely the same manner in the last three days, lends strength to the fact that a gang of petty thieves is at work in the city. The last two homes which have been entered in exactly the same manner in which the G. H. Ficke residence on Perry street was entered Thursday, are the Rauch residence at 1510 Galena street, and the Fuller residence at 716 West Fourteenth street. In the Fuller home the thieves secured a gold watch and several valuable rings, while in the

Home Course
In Domestic
Science
XII.—Hints on Home
Laundering.
By EDITH G. CHARLTON.
In Charge of Domestic Economy, Iowa State College.
Copyright, 1910, by American Press Association.

To many women the laundry is the least interesting part of the home, and often the weekly washing and ironing are the work most dreaded by the entire family. In fact, in many homes these are the one unaccountable task, and because no other solution is found for the laundry or is done in any way and by any one so long as it is taken out of the house. Why the washing and ironing should prove such unpleasant work as to cause both mistress and maid to rebel against it has always been a mystery to me. I can explain it only by the natural supposition that neither knows how to do it well and that the possibilities for doing the work quickly, easily and thoroughly are few in most houses. We generally find that a properly equipped laundry is among the last things to be added to the house and that in the majority of cases a tub or two, perhaps a washing machine of possible merit and occasionally a wringer comprise the average washing outfit in private homes of moderate means. And, small as that equipment is, it can be made to give very satisfactory results if a little knowledge and intelligence are brought to the task. The trouble is most women do not like to wash because they have not been taught to do it properly and because they make extremely hard work of it. They appreciate to some degree fine fabrics and dainty clothing, but they do not, as a rule, appreciate those to the extent that makes them desirous of preserving materials and colors.

While it is difficult at any time and in almost any locality to obtain well trained helpers for housework, it is often an easier task to get a good cook or housemaid than it is to find a first

class laundress. Because of this it is all the more necessary that the mistress of the house should be familiar with fabrics and how to cleanse them.

The Modern Laundry Equipment.
Whenever possible the laundry should be a separate apartment in even small houses. It may be located in the basement or adjoining the kitchen; but, wherever it is, the room should be well lighted and well ventilated and should have a good floor and hard finished walls. There should be no soft or porous material used in the laundry to absorb moisture. For a small home laundry the following list of furnishings will be found sufficient:

Three or four tubs, stationary if possible, made of soapstone, enamel or porcelain; a good washing machine, clothes wringer, clothes stick, clothes holer, tin or copper; zinc or glass soapstone, except in box or basket; water pail, clothes basket, scrubbing brush, large granite spoon, galvanized iron clothesline, skirt, sleeve and bosom boards for ironing, ironing blanket, mangle and several good irons of different weights. An electric or even a good gasoline iron is such a valuable labor saving device that its first cost should seldom be considered, because it very soon more than repays it. Besides this amount of furnishing a number of common substances for removing stains of various kinds should always be on hand. Among those most frequently needed may be mentioned borax, ammonia, salt, vinegar, alum, naphtha, muriatic and oxalic acid. These should be kept in a closed box and out of the reach of children, as some of them are poisonous. Wax, bluing, starch, French chalk and javelle water are also often needed in the laundry, and if a supply of them is kept on hand time and effort may be saved on washing day. A valuable addition to this equipment would be an electric or water motor with which to run the washing machine, wringer and mangle. With such an addition it is possible for one woman to finish a large washing with comparatively little outlay of strength.

Removing Ordinary Stains.
Washing is the mechanical cleansing of clothes to remove all impurities and dirt. To do this four simple, short rules should be kept in mind—viz: Get out all the dirt. Keep all articles a good color. Use nothing to injure the material either mechanically or chemically. Have some definite knowledge of different fabrics in order to treat each in the way most likely to injure or change its character.

Unsatisfactory results in laundry work can often be traced to carelessness in preparing the various articles to be washed. Too often articles coarse and fine, white and colored, are put into the tubs together without the slightest attention to such preliminary steps in the process as sorting, removing stains, temperature and softness of the water. After such indiscriminate preparation what wonder if the muslins are soon torn or made yellow, if stains are made permanent and the entire washing takes on a dingy hue!

Before any article is sent to the wash it should be examined and all stains carefully removed. This requires care and some knowledge of chemicals and their action on fabrics and stains. All stains cannot be removed by the same substance or in the same way, and yet it is remarkable how many different kinds of stains may be removed by cold water alone. For this reason I recommend that all articles be soaked in cold water for fifteen minutes or longer before being put into the washing suds. The white pieces should, of course, be kept by themselves, and if there is any question about the fastness of any color a little salt and vinegar added to the cold water will help to set it. Alum added to the rinsing water will make the color still more permanent. The following are general directions for removing stains of various kinds:

Tea and Coffee.—Spread the stained part over a bowl and pour boiling water over it from a height. Chocolate and Cocoa.—Wash first in cold water, then rinse and pour boiling water through it.

Fruit.—Many fruit stains may be softened and dissolved by alcohol. If heated the alcohol will be more effective. For peach stain it may be necessary to use diluted muriatic acid or sulphur fumes. Boiling water will remove fresh stains of small fruits.

Grass.—Alcohol will dissolve the green coloring matter. Washing with naphtha soap and warm water or spreading on a paste made of soap and baking soda will also remove grass stains.

Grease or Oil.—Soak first in cold water, then wash with cold water and soap, then dry and if necessary use other agents. Chloroform or ether will remove grease from fabrics which cannot be washed.

Wine.—Put a thick layer of salt over the stain from red wine while fresh, then pour boiling water over it. If a yellow wine wash first with cold water, then with soap and water.

Ink.—If stain is on a white garment put to soak for several days in milk, changing frequently. Red ink poured over the black will remove the black stain. The red may be washed out in cold water and ammonia, then boiled. Equal parts of peroxide of hydrogen and ammonia may remove fresh stains. Oxalic acid will remove old ink stains from white garments. Salt and cold water may be used in fresh stains on delicate colors.

Iron Rust.—If fresh, lemon juice, salt and strong sunlight may remove stain, but generally it is better to use muriatic acid at once. Spread the stain over a bowl containing a fairly strong solution of borax and water or soda and water. Drop muriatic acid on the stain a little at a time until it darkens, then rinse thoroughly in the borax and water.

Mildew.—This is a mold growing on the fiber of the cloth. If fresh it may be removed by wetting in strong soap-suds or covering with a mixture of chalk and salt and bleaching in strong sunlight for several hours. Old mildew stains can rarely be removed without injuring the fabric.

Milk or Cream.—Wash out with cold water and later use soap and cold water.

Paint or Tar.—If fresh and washable use soap and water or rinse in turpentine, then wash. If not washable use gasoline. If dry soften with lard or oil, then treat as for fresh paint.

Perspiration.—Use cold water and soap and put the garment in the sun for several hours. The perspiration under the arms is different from that of the rest of the body and requires diluted muriatic acid to neutralize it.

Sugar or Gum.—Dissolve with warm water if washable, with alcohol if not washable.

Rauch residence they made a getaway with a large quantity of silverware and cutlery. The entrance to the homes was effected by means of a skeleton key.

IDENTIFIED AS RUNAWAY GIRL.
Vera Hammit, in Jail at Fort Dodge, a Gorwie Miss.
Fort Dodge, May 9.—Vera Hammit, as she is known and was sentenced to thirty days confinement in the county

dirt. To do this four simple, short rules should be kept in mind—viz: Get out all the dirt. Keep all articles a good color. Use nothing to injure the material either mechanically or chemically. Have some definite knowledge of different fabrics in order to treat each in the way most likely to injure or change its character.

Unsatisfactory results in laundry work can often be traced to carelessness in preparing the various articles to be washed. Too often articles coarse and fine, white and colored, are put into the tubs together without the slightest attention to such preliminary steps in the process as sorting, removing stains, temperature and softness of the water. After such indiscriminate preparation what wonder if the muslins are soon torn or made yellow, if stains are made permanent and the entire washing takes on a dingy hue!

Before any article is sent to the wash it should be examined and all stains carefully removed. This requires care and some knowledge of chemicals and their action on fabrics and stains. All stains cannot be removed by the same substance or in the same way, and yet it is remarkable how many different kinds of stains may be removed by cold water alone. For this reason I recommend that all articles be soaked in cold water for fifteen minutes or longer before being put into the washing suds. The white pieces should, of course, be kept by themselves, and if there is any question about the fastness of any color a little salt and vinegar added to the cold water will help to set it. Alum added to the rinsing water will make the color still more permanent. The following are general directions for removing stains of various kinds:

Tea and Coffee.—Spread the stained part over a bowl and pour boiling water over it from a height. Chocolate and Cocoa.—Wash first in cold water, then rinse and pour boiling water through it.

Grass.—Alcohol will dissolve the green coloring matter. Washing with naphtha soap and warm water or spreading on a paste made of soap and baking soda will also remove grass stains.

Grease or Oil.—Soak first in cold water, then wash with cold water and soap, then dry and if necessary use other agents. Chloroform or ether will remove grease from fabrics which cannot be washed.

Wine.—Put a thick layer of salt over the stain from red wine while fresh, then pour boiling water over it. If a yellow wine wash first with cold water, then with soap and water.

Ink.—If stain is on a white garment put to soak for several days in milk, changing frequently. Red ink poured over the black will remove the black stain. The red may be washed out in cold water and ammonia, then boiled. Equal parts of peroxide of hydrogen and ammonia may remove fresh stains. Oxalic acid will remove old ink stains from white garments. Salt and cold water may be used in fresh stains on delicate colors.

Iron Rust.—If fresh, lemon juice, salt and strong sunlight may remove stain, but generally it is better to use muriatic acid at once. Spread the stain over a bowl containing a fairly strong solution of borax and water or soda and water. Drop muriatic acid on the stain a little at a time until it darkens, then rinse thoroughly in the borax and water.

Mildew.—This is a mold growing on the fiber of the cloth. If fresh it may be removed by wetting in strong soap-suds or covering with a mixture of chalk and salt and bleaching in strong sunlight for several hours. Old mildew stains can rarely be removed without injuring the fabric.

Milk or Cream.—Wash out with cold water and later use soap and cold water.

Paint or Tar.—If fresh and washable use soap and water or rinse in turpentine, then wash. If not washable use gasoline. If dry soften with lard or oil, then treat as for fresh paint.

Perspiration.—Use cold water and soap and put the garment in the sun for several hours. The perspiration under the arms is different from that of the rest of the body and requires diluted muriatic acid to neutralize it.

Sugar or Gum.—Dissolve with warm water if washable, with alcohol if not washable.

Blood.—Soak in cold water, then rub out in fresh tepid water. If very dry soak and wash out or use peroxide of hydrogen or javelle water.

A word of caution is necessary when using acids to remove stains. These should not be used on colored fabrics, and after using on any white article always rinse thoroughly in borax and water or ammonia and water and afterward in clear water. Javelle water is an excellent bleaching agent which will often remove old stains. It is easily made and may be kept indefinitely in glass bottles in a cool, dark place.

Javelle Water.—Dissolve one pound of sal soda in two quarts of boiling water, then add one-fourth of a pound of chloride of lime. Stir with wooden stick until lumps are broken, then let stand several hours to settle. Pour off clear liquid and bottle for use. For bleaching purposes use one-half to one cupful to one pail of water. Always rinse thoroughly in ammonia water. To remove stains brush over with javelle water full strength, then rinse quickly in ammonia water, and finally in clear water.

Some practical suggestions for washing silk, woollen and lace, starching, etc., will be given in a later article.

fall in the court of Judge Mackwan. Thursday he turned out to be Vera Knotts of Gorwie, the daughter of Contractor Knotts, who disappeared last November, leaving an unfulfilled contract with the county and many debts behind. The girl was arrested in Des Moines earlier in the week in company with Evelyn Dewey, and brought here to face a charge of defrauding Proprietor Alexander of the Crawford Hotel.

Notwithstanding the effort made by the young women to secure the \$190, with which to pay their fines, they are still inmates of the county jail and bid fair to remain so until the conclusion of their sentence.

Little Local From Harlan.
Special to Times-Republican.
Harlan, May 9.—Seventy-five members of the First Baptist church, bent on becoming better acquainted with their new pastor, Rev. C. W. Heady and family, surprised them at their home and spent the evening very pleasantly with games, music and conversation.

Guy Anquith, son of T. G. Esquith of this city, who graduated from the Chicago veterinary college recently, has located at Farmington, Iowa, for the practice of his profession.

Hans Hansen Holm and wife left their first cruise on a voyage to Denmark. They will sail from New York on the Kaiser Wilhelm II May 10, and will be absent the greater part of a year.

Allan Petersen of this city, has been chosen as an instructor of physical science in the East Des Moines high school for next year at a salary of \$1,250.

Rev. Fred H. Hanger, who has been in Indiana for several months conducting religious services, returned to Harlan today and resumed his pastorate in the Church of Christ.

The public schools will give a children's opera May 13 entitled "Red Riding Hood's Rescue." Peter Boyesen, an old resident of this city, died Thursday noon at the home of his daughter, Mrs. Jacob Nelson, in this city. He was 82 years old and was born in Knudsen, Denmark, in 1830. The funeral was held this afternoon at the First Danish Baptist church. He is survived by his daughter, Mrs. Nelson, and by a son, Ni Boyesen, a prominent Jackson township farmer.

Glidden News Briefs.
Special to Times-Republican.
Glidden, May 9.—Helen J. Underdown, 12 years of age, died Monday of last week. She had long been a sufferer with rheumatism. Burial was in Westlawn cemetery.

The drought is broken; we have had two days of gentle rain. Charles Powell is reported as improving nicely, and will soon be home from the Carroll hospital.

John D. Rockefeller would go broke if he should spend his entire income trying to prepare a better medicine than Chamberlain's Colic, Cholera and Diarrhoea Remedy for diarrhoea, dysentery or bowel complaints. It is simply impossible, and so says every one that has used it. Sold by all dealers.

Original Notice.
To O. G. Hunt, Mrs. O. G. Hunt, his wife, W. E. McCartney, Mrs. W. E. McCartney, his wife, and to the unknown heirs of above named persons, either of full age or minors; also to the unknown claimants of lots one (1), two (2), and three (3) block thirty-five (35) town of State Center, Marshall county, Iowa, either sane or insane, and either of full age or minors.

You are hereby notified that there is now filed in the office of the clerk of the district court of the state of Iowa within and for the county of Marshall, the petition of William M. Gilbert claiming of each of you the quieting of the title to lots one (1), two (2), and three (3) in block thirty-five (35) town of State Center, Marshall county, Iowa, and claiming that the plaintiff is the owner of said real property, and that he claims title thru prior grantors for more than thirty years.

You are further notified that the petition herein sets forth that the unknown claimants above referred to, and heirs mentioned, either sane or insane, either of full age or minors, make claim to the above described real property as heirs, devisees, grantees, legatees or assignees, of the defendants above named or independently of other persons, and that the exact nature of the claims made by this plaintiff does not know, but whatsoever the same may be they are junior and inferior to the plaintiff's ownership and title and are forever barred by the statute of limitations. That the residences and names of the unknown claimants, their heirs and heirs are unknown to this plaintiff, and that he has sought diligently to learn their names and residences, and has been unable to do so.

That the plaintiff and his grantors have been in actual, continual, visible, notorious and hostile possession of the said real estate, for more than thirty years last past, under claim and color of title, and has paid the ordinary taxes assessed against said property, for more than that length of time, and there has been no repayment or offer of repayment of the same.

That the said defendant O. G. Hunt and Mrs. O. G. Hunt, his wife, did by proper and valid warranty deed, convey all of said property including lot two above described to the plaintiff's grantors, but that said deed by oversight and inadvertence has not been recorded. That each of said deeds were properly executed and delivered. Reference is hereby made to plaintiff's petition on file.

Now unless you appear and make defense thereto at or before noon of the second day of the next August term of said court to be begun and held at Marshalltown, Iowa, on the 29th day of August, A. D. 1910, your default will be entered, and a judgment and decree rendered therein as prayed for in said petition.

Dated this 29th day of April, A. D. 1910.
J. L. CARNEY,
Plaintiff's Attorney.
