Sound Sleep After a Night of Much Distress. Mr. B. A. Philadelphia gentleman, first hesitated about applying poslam after he had obtained it. "But," he says, "afterward the itching became unbearable at night, so I arose and told Mrs. B. I would risk the poslam. I slept soundly all night. I used it three nights and three mornings, then discontinued, and I have never had any return of the eczema; never had any itching after the first application."

CLAIM YOUNG PEOPLE SUBDUED. Nolita and Pfantzes From State Center Meet Here to See Lawyer. Following the arrest Monday of Harvey Pfantz, of State Center, on a charge of kidnapping Miss Nolita, who alleged that young Pfantz had threatened his life because he objected to his daughter Amanda marrying Pfantz, young Pfantz and his mother, Mrs. George Pfantz, and Mr. Nolita and his daughter Amanda, visited this city today to consult an attorney and determine if possible on some amicable agreement in the premises. It seems that young Pfantz had secured legal advice to the effect that the Iowa statutes did not forbid the marriage of first cousins, but upon being shown the law, as passed by the last general assembly, which makes the marriage a penitentiary offense, the ardor of the young people was cooled appreciably. The attorney made it plain to Pfantz and Miss Nolita that even though they should go to some state where first cousins might marry legally, they could not come back to Iowa to live, for then they would be amenable to the Iowa laws which declare the participation of such a marriage guilty of a statutory crime, even though they were not married in Iowa. FINE VIEW OF COMET. Thousands of People Out to See Terrestrial Comet. Chicago, May 25.—Thousands last night viewed Halley's comet riding high in the western heavens. With a clear sky and the moon not far enough from the horizon to dim with its radiance the gleam of the terrestrial wanderer the opportunity for scrutiny of the sky tramp was excellent. The comet at 9 o'clock—the hour when its brilliancy seemed greatest—occupied a position among the western constellations about forty degrees high. It was directly in the west. Gazing at it from the top of the LaSalle Hotel it hung in the firmament directly above Madison street. About 8 o'clock in the evening Halley's wanderer showed a small portion of tail as a thin haze of light. It reached from the head in a southerly direction and dipping toward the horizon. Measuring in the terms of the astronomers, it was said to be about ten degrees long. An hour later the nebulous effect had disappeared and the head itself took on a hazy appearance. This was explained by the fact that gazers were again forced to look at the head along the length of the tail, now pointing almost directly toward the earth. The comet assumed what is said to be the second magnitude in size. It is easily distinguishable from the stars because it has a soft glow. ANNOUNCEMENTS. Representative.
