MANY SIGN FOR LIGHTS
Movement to illuminate five blocks of Main Street with ornamental lights gets encouraging reception—Committee waits on supervisors.
An encouraging reception was given the five committees which went out this morning to secure signers for ornamental lights for five blocks of Main street. Out of a possible 120 needed signers, between sixty and seventy were secured while the committees worked this morning. In fact so much progress was made that one of the men who has been most actively interested in the plan said this afternoon that the lights were assured.
A committee of four waited on the board of supervisors this afternoon for the purpose of trying to induce them to subscribe enough for the county to install six lights along the Main street side of the court house square.
Some tenants and building owners were not seen, and some refused to take up with the proposition, but a very large majority of those who were solicited were willing to pay their pro rata share of the cost of the posts and for their installation. The larger the number secured the less will be the amount each will have to pay.
