Roof Economy

It is cheaper to put on a new Vulcanite roof than to repair the one you now have. Cheaper in the first place and cheaper in the long run, for a Vulcanite roof requires no painting and once up it is there to stay. Sixty years of making Vulcanite roofing have taught us how to make it so durable and so satisfactory that users have renamed it "The Lifetime Roof." What does it mean to you to have your buildings roofed with a material that costs less to buy and less to lay than the cheapest kind of a shingle roof and will outlast the best kind of a shingle covering ten to one. Isn't it well worth while to have a roof that is not only absolutely weather proof at all times but requires absolutely no attention—never needs painting—never demands repairing.

Special Notice. With all of the latest and finest equipment, I am prepared to take care of all patients wishing a scientific examination of their eyes. Testing days, Monday, Tuesday, Friday and Saturday. No free examinations. Consultation free. Newell Optical Parlors.

The troublesome lock—absolutely unnecessary with a "Twin." The unfinished surfaces on inside halves of pedestal when extended, with locks, bolts, nuts, etc., exposed—entirely eliminated with the "Twins." "Twins" are therefore demanded by the particular buyers of today. Made in numerous designs and finishes. Call and see them.
