A delivery team belonging to George L. "The Flirting Princess."
Manager Mort H. Singer sends us Harry Bulger in "The Flirting Princess" next Wednesday, Nov. 2. This is a happy combination of clever comedy, funny play, pretty music and the dashing "American Beauties." It is offered this year as it has been for the year in Chicago, with a company of excellence, supporting Mr. Bulger, including such well known people as Eulalie Jansen, Charles Morgan, Maud Emery, Frank Carter, Dale Fuller, Arthur Cranston, Harry Dickerson, John Patton and others. Mr. Bulger is bringing along "The Famous Barefoot Chorus," which created such a commotion last season, also the first presentation of the new famous Vampire and Apache dances, the two most talked of dances in the country today—especially "The Vampire," which was suggested to the producer by Kipling's poem of the same name and Burne-Jones picture, which hangs in the London museum at present. The dance is a very dramatic and intensely interesting subject to the lovers of genuine pantomime work.
CHRISTIAN SCIENCE LECTURE.
Frank H. Leonard, of Mother Church, Addresses Local Audience.
Frank H. Leonard, a member of the board of lectureship of the Christian Science mother church, addressed an audience of 200 people at the Odeon Monday night in the interest of the cult. Mr. Leonard took as his subject, "Christian Science: Demonstrable Religion," and spoke for an hour and a half, touching on the many phases of Christian Science, and answering many of the criticisms that are offered on the part of unbelievers. Mr. Leonard is a good speaker, and held the closest attention of his audience. He was introduced by Mr. C. H. E. Boardman.
"There is nothing in the world today which is so occupying the thought of the people as Christian Science, and there is a vital reason why, regardless of all the misunderstanding and misrepresentation relative to the subject, people should still insist on knowing the truth about it."
"Until within a few years, to the average person religion was something which required no thought, no investigation; it was to be accepted simply because this was believed to be the

right thing to do, without one's having any well-formed idea as to what it meant; but today, as a result of the increased mental activity that is now apparent in all directions, people are no longer content to accept any teaching as true simply because some one has said that it is true; in fact, more and more the demand is being made that proof shall be given of the truth of every statement made."
Touching on salvation, eternal life, and the work of healing, Mr. Leonard referred to his own experience. He said he was born with a supposedly organic disease, and had been given up to die. He learned of Christian Science and, altho an unbeliever, in a few months' time he was converted to the faith and has since been a well man. Mr. Leonard answered the criticism that Christian Scientists do not use the bible, but rather "Science and Health." He declared the statement untrue, and said that "Science and Health" corresponded to the "Bible helps" of other denominations. That Christian Science denies God and the Christ was also denied emphatically, and he showed the number of times God and Christ were referred to in the Christian Science text book.
In closing Mr. Leonard paid his respects to materia medica, and invited an investigation of Christian Science on the part of all.
