"Well," said Moses, "they appear to be sheared on this side, but I'd want to go across the street and see them from the other side before I made up my mind definitely."

Washington, May 9.—Champ Clark has unwittingly punctured the stock in trade of some of his most earnest supporters. Like many other men who aspire to high station in political life Champ Clark's early youth has been the subject of much comment. When Champ was just a plain, every day member of the house it was related that when he was a plow boy in the hills of Kentucky he would desert the plow from time to time to sit under a tree and dream of the days when he would have a seat in the national house of representatives.

When Champ was elected to the speakership the story was somewhat embellished. As related in recent days the dream had to do with Champ's election as speaker of the house, for in the days of his youth he regarded the office of speaker as the second in the land.

As soon as the Clark presidential boom got under way his friends again revised the story of his youth. This time they had Champ under the same old shade tree, but with a different dream. As he gazed into the sky he saw a vision of the White House and he pictured the day when he would be the chief executive of this great country.

It is related that Champ believed each and every one of these yarns. And now, at a time when a rehearsal of the latest revision of the dream would be most effective Champ goes and knoos-ed it into a cocked hat. In an unguarded moment at the National Press Club he delivered himself of this statement: "When I was a boy there were three things I thought would never happen—that I would ever get old enough to marry; to wear a beard, or to vote."

Hang! Just like that, Champ busted the dream into a thousand pieces. Now his friends have got to dig up another vivid story of his youth.

Great is the spirit of camaraderie in the house of representatives during general debate. A friend in need is a friend indeed, and there is need for patient and enthusiastic friends during general debate since Vic Murdock has put doubt into the people's minds as to whether a speech is delivered on the floor of the house or written by a fifteen hundred dollar secretary and shipped along to the government printing office without a singled labored thought on the part of the member.

Murdock's row over the Congressional Record has made it essential that speeches shall show evidence of having been delivered on the floor. They also must show evidence of approval on the part of the house, and an occasional interjection helps a whole lot.

Representative Moss, of Indiana, was delivering a speech on the farmers' free list bill. He was surrounded by a wilderness of desks. Representative Cox, also of Indiana, observed that the few men who were in the house would go on reading their papers and writing their letters without ever giving heed to the efforts of his colleague.

Cox accordingly placed himself near Moss, and at frequent intervals interrupted the speech with solitary but vigorous applause. The official stenographer must of necessity note the applause, without giving note of its volume.

"I'm going to speak in half an hour," said Cox to Moss, when the latter had concluded his speech. "I'll come right back as soon as I can get a bite to eat," replied Moss. He did eat, and applauded Cox at the proper interval.

"Shot-gun" Rucker, of Colorado, had a speech to deliver. He tired off his two colleagues, Taylor and Martin. The two sat patiently through the speech and were there with the applause. Later in the debate the two secured notice on Rucker that they were to speak, and he had to listen to two speeches in return for having real applause interspersed through his own remarks. And so it goes thru delegation after delegation.
