A MURDERER THEIR TEACHER. Strangest School in the World is in Maryland State Penitentiary. The strangest school in the world is at the bottom of a long flight of steps in the Maryland state penitentiary. Not the fact that it is in a penitentiary makes it strange, nor the long row of whitewashed cells that almost touch the desks, nor the blue coated guard who occupies the extreme back seat. There are schools in other penitentiaries, some of them with long, honorable histories. But the strangest school is different in its teachers, its pupils, its methods and its results. There are 112 pupils, sixteen teachers and the average age of pupils and teachers together is 33 1/2 years. One of the teachers is a murderer doing life; one is a highway robber doing twenty years; one is a bigamist, one a forger, and only the warden knows what the others were or did to bring them there. In one class of eight scholars are two bigamists, a murderer, a burglar, and one who had burned down a store. The baby of the school is barely turned 21, hardly more than a boy; the eldest is 72. Altogether the school constitutes nearly a third of the whole population of the prison, and not a man of the whole 112 scholars now enrolled could read a daily paper or write his own name.—Exchange.

A municipal ice-manufacturing plant is to be built in Kansas City. The local dealers charge 40 to 45 cents per 100 pounds of ice. L. H. Chapman, commissioner of water and lights, finds the city can manufacture ice for 7 1/2 cents per 100 pounds, and that a municipal plant could cut the price of ice squarely in two and still make money.
