KAISER MAY CALL BLUFF OF JAPAN

SAID TO BE CONTEMPLATING SHREW MOVE IN CHINA.

MAY CEDE KIAU CHAU BACK TO CELESTIALS

Would Save Needless Fighting and at Same Time Test Sincerity of Japan's Declared Intentions—Japanese Officials Startled by Report of Kaiser's Contemplated Action.

Washington, Aug. 19.—Germany has under consideration a plan to circumvent the intention of Japan to take and hold Kiau-Chau, according to information obtained in official quarters here today. This plan is to cede the German leased territory back to China before the expiration next Sunday of the period named by Japan in the ultimatum presented to the Kaiser.

Such a move, according to the German view, not only would save the needless waste of blood and treasure in defense of this possession but would test the sincerity of Japan's professed desire to return Kiau-Chau to China and otherwise to respect the integrity of the oriental republic.

Jap Officials Startled. Japanese officials here were startled at the report that Germany was starting this step. They strongly intimated that Japan would not permit this plan to be carried out except upon terms satisfactory to the island empire. They also expressed significant doubts that China is strong enough to hold Kiau-Chau at this time even should it be restored to her.

This new complication in the far eastern situation gave further evidence of the extremely delicate nature of the phase of the world war from the viewpoint of American interest which has developed with the entry of Japan into the arena.

Wilson Sees Issue. The remarkable appeal addressed to American citizens by President Wilson urging a strict impartiality of attitude toward the warring nations was generally interpreted as recognition of the danger of involving the United States in trouble with Japan as a result of the latter's forthcoming operations in the orient.

The president's profoundly grave warning to "my fellow countrymen" to guard against espousing the cause of either belligerents, followed closely upon the receipt at the White House of memorials from German Americans urging the executive to protest to Japan against her attack on Germany.

Menace is Nearer. That menace to the interests of the United States in the orient is made less remote by the precipitation of Japan into the war is fully realized by the administration. The president therefore desires the whole country to accept at face value the expressed and implied pledge of Japan to respect American interests and to refrain from any deeds or words which would tend to foment strife between these interests and actually endangered.

The confidence of the administration that nothing in the present situation threatens an embarrassment of the ability of the United States to protect the Philippines is derived largely from the assurances given by Great Britain that Japan will not extend the attack on Germany beyond China and contiguous waters.

Won't Encroach on Us? Taken at its face value, this assurance means that Japan will not seize the German islands in the Pacific and thus encroach upon the naval bases of the United States and interpose a screen between America and the Philippines.

A copy of the official announcement by the British government that the operations of Japan would be confined to the China sea and to the mainland of China was handed to Secretary of State Bryan late today by Colville Barclay, charge d'affaires of the British embassy here.

It is believed that this is the first assurance the United States government has received on the possibilities of the situation in the far east which had caused so much apprehension here.

BRITISH WOMEN WOULD FIGHT. Plan on Foot to Organize Army to Repel Any Invasion.

London, Aug. 19.—England is going to have a regiment of women. They may have as their generals such women as Queen Amelie of Portugal, the Duchess of Marlborough and Mrs. Pankhurst. They will resist any invasion of the German and Austrian forces.

Lady Cook is the originator of the plan. She has launched a stirring campaign to put a woman's army in readiness for battle. She hopes to have 150,000 women in the army, thoroughly organized and well drilled, in three months.

Lady Cook outlined her plan today. She pointed out that the women would be the logical defenders of the country when the men are all away at the front. She said:

"Our women's army must be ready to fight and to die for Britain. I am going to arouse the women of England so they will, if the time should come, resist the invaders in a fight for their homes, their honor, and their children. My plan is to have regiments wearing flaki uniforms just like the men, with the exception of skirts. They probably will be knee length. I started to work today. I called at Buckingham palace and a letter for Queen Mary.

"Women have been brave in the past we aren't all dolls today. There are plenty of women knitting socks and doing Red Cross work, but I want every woman who has health and strength to take up arms so when all the men are away we shall be able to defend our homes and honor. "I believe English women will make good fighters. You know what Kipling says: The female of the species is more deadly than the male. "I'm going to see Queen Amelie of

Portugal tomorrow. She would make a good general. The Duchess of Marlborough would be an excellent fighter, too. I shall also see Lady Jersey, Princess Louise, Lady Granville, Mrs. J. Ward and Mrs. Pankhurst—she would be a very good general. "I've been going around for four or five years trying to arouse England to the danger of an invasion. I have often stood in front of the Bank of England and told crowds that this war was coming.

POLES PEAN LEAGUE WITH KAISER'S EMPIRE

NATIONAL SOCIETY OF AMERICA WANTS WILLIAM'S SECOND SON FOR KING.

WOULD HAVE TEUTON RULE FROM ADRIATIC TO BLACK SEA

Oppressed People of Austria and Russia Would Be Taken Into New Government—Creating New Slavic Nation Dream of Poles in America.

New York, Aug. 19.—The National Polish League of America, with headquarters at 164 East Fifty-third street, has issued a remarkable statement in which it calls upon Germany to create a new Poland extending from the Adriatic to the Black Sea and including the Polish provinces of Prussia, Austria and Russia.

The second son of Emperor William is suggested as a ruler who would be acceptable to the Polish people. The appeal says: "There is a nation of more than 25,000,000 people which has its home between Germany and Russia—a home which is now occupied by Russia, Germany and Austria. This country is Poland and Poland now has the opportunity of all time to throw off the foreign yoke if it only had a leader, or at any rate the full current of its national life. Poland properly advised, would surely realize from which nation it has the best right to expect the renaissance of its national life. Certainly it cannot expect this from either Russia or Austria. These two countries are ruled by the influence of their national churches. Only Germany can and only Germany will help Poland realize her national aspirations.

Under Foreign Influences. "And yet the Poles can not see the thing in this light, for they are controlled by Catholicism and have fallen into decay thru the influence of their aristocrats, who in turn have succumbed to French and German literature. All these millions of Poles have been disorganized thru religious and foreign influences, and they are told day after day that Russia and Germany are responsible for their misery and ignorance. They have never learned the real reason for their decay as a nation. Their religion has never been in accord with the political and economic conditions under which they live. Poland has never given an adequate return for what it received from this poor people. In addition to this the aristocrats for whom they labor, and to provide the money which these employers afterward squander in France, keep them in the darkest ignorance. French influence has never helped the Poles to anything; the little they know they have learned from Germany, but all of Poland's money, Poland's aristocracy carries to France and spends there for its amusement.

"Germany will remain the victor in this war, for it is honest and educates its people by sending them into all the world. The prejudice aroused against Germany is an artificial one, due to the influence of French literature, which is read especially by the better classes of the Slavic people in Russia and Poland.

For a Slavic Empire. "Germany must now take over the task of creating a new empire. She should extend Poland from the Adriatic to the Black Sea and establish a second son of the German emperor as the ruler of the land. Austria appropriate the Balkan states.

TWO MORE IN THE FIGHT. Turkey and Greece Promise to Jump In.

Washington, Aug. 19.—Two more nations are about to plunge into the maelstrom of war. They are Turkey and Greece.

Washington from an American embassy at Constantinople and the American legation in Athens state that mobilization is practically completed in both countries and that war soon will be declared.

Further details also confirm the reports of protest made by the trip's representative against the purchase by Turkey of the German cruisers Goeben and Breslau, which fled to the Dardanelles to escape capture from British men-of-war.

There is confirmation also of the demand made by Turkey upon Greece that her Black Sea fleet be permitted to pass thru the Dardanelles. This demand is not acceptable to the Turks.

The result of the latest development will be that Turkey will throw in her fortunes with Germany and Austria. Turkey is the firm ally the Austro-German combination has obtained since war began.

The participation of Turkey in the war is the direct result of the purchase of the armored cruiser Goeben and the protected cruiser Breslau, which are at Constantinople. At the urgent solicitation of Greece, the United States sold to that country the battle ships Idaho and Mississippi. It was represented that with these vessels, the preponderance of Greece upon the sea would be so great that Turkey would not dare to fight. This proved true, especially as Great Britain took over the two battle ships building in English shipyards. This was a perfectly regular proceeding on the part of England, as a clause in the contract provides that in case of war the contractors should turn the vessels over upon demand to the London government.

The acquisition of the Goeben and the Breslau, after war was declared, in a measure restored the balance between Turkey and Greece.

There is slight hope here that the conflict between Turkey and Russia and Turkey and Greece can be avoided. The Constantinople government can not afford to give passage thru the Dardanelles to the Russian Black Sea fleet, as such action would arouse Germany, and the relations of Germany and Turkey are most cordial, and there have been reports that the two nations were in close alliance. The fact that Turkey received the Goeben and Breslau was interpreted by the entente as an act of friendship to Germany, and brought forth emphatic protests from them.

DR. CLEMENSON WANTS PAROLE. Former Dubuque Boy Offers to Serve in British Army if Freed.

Dubuque, Aug. 19.—If plans which were set on foot in Chicago by Attorney James E. Callahan are successful, Dr. Haldane Clemenson, formerly of Dubuque, will be pardoned out of Joliet penitentiary, where he is serving a life sentence for the murder of his wife, and will sail for Europe to join the medical staff of the British army. Dr. Harry E. Webster, another young surgeon who is serving a sentence for a similar crime to which he has confessed, may also be pardoned.

Governor Dunne, Secretary Bryan and the English authorities are being interested in the case. Mr. Callahan has addressed the following letter to the English surgeon general: "We are applying for the pardon of Dr. Haldane Clemenson and Harry E. Webster, two young surgeons who are under life sentences for murder. Both are expert young surgeons and have made excellent records as prisoners. They have been in prison for about three years.

"In conversation with them recently they expressed a desire to join the surgical staff of one of the armies now engaged in war with Europe, if pardoned, and we are directing this letter to you to inquire whether or not, if the governor of Illinois should grant them pardons, you can give them work on the field of battle.

"We beg to advise you that we believe Dr. Clemenson entirely innocent of the charge of murder that was placed against him. Dr. Webster confessed to having killed his wife.

"We do not hesitate to say that these men would be a credit to your surgical staff and to the British flag. They are only humans who may or may not have been misled. They are willing but anxious to risk their lives if they can by their skill, relieve the sufferings of their fellowmen on the battlefield."

If a favorable reply is received it is probable that the two men may be pardoned, or rather paroled, by Governor Dunne.

BARGE NEEDS A RIVER. Self Propelled Barge Finds Sand Bars in the Way.

Muscataine, Aug. 19.—The steel barge which went north on Aug. 5 is now on its way back down stream and will arrive at the city some time this week. On the trip up stream the Bernhard craft carried an assortment of freight from New Orleans. She was the object of considerable attention at this point, but many were tardy reaching the water front and only saw her disappear up the river.

Just when this barge will arrive can not be stated. It will be remembered that she stuck on a sand bar at Okawka on the way up, and was there for several hours. The return trip may be interrupted in the same manner, but the curiosity will be here some time this week.

He met his wife, Miss Arth, while commencing the trip and was married to her in London, England, last June.
