**THE FISHER GOVERNOR CO.**

Manufacturers of Steam Pump Governors, and Steam Specialties, and Jobbers of Mill Supplies and Machinery--Established 1882

This company was started about thirty-three years ago by Wm. Fisher and Geo. H. Beebe, for the manufacture of steam pump governors. Since that time, their business has steadily grown and they have added to their line of steam specialties, other devices, their goods being sold to the large buyers of such apparatus in this and foreign countries.

In addition to their manufacturing business, they are now doing a general jobbing business in mill supplies and machinery, carrying a complete stock of pipe, fittings, belting, pulleys, packing, etc.

The offices and factory are located at 201-203 South First avenue. The officers of the concern are Geo. H. Beebe, president; M. A. Fisher, vice president; J. H. Fisher, secretary and treasurer, and Jacob Eige, superintendent.

They are prepared at all times to give prompt attention to orders in their line and the success of their business in the past has been due to the prompt service and careful attention given to their customers. Only the highest class of goods are carried and their thirty-three years' record of making good stands back of all material sold by them.

ATTENTION  
**Cucumber Growers**

The return of normal weather conditions affords an opportune time for planting the crop. Land that has overflowed and too wet for other crops, may be planted to cucumbers as late as the 20th of this month. Every indication points to an abundant yield this season, which means more gold dollars for the grower than he can realize from any other crop. The seed is now ready for distribution.
