Summer Suggestions For Baby's Mother

Seasonable Advice on the Health of Children in Hot Weather

No one requires as much food in summer as in winter. Do not overfeed children during the hot weather. Serve only the lighter and more easily digested foods, and make sure the bowels keep normally active.

Most of the troubles to which children seem particularly susceptible in summer have their origin in a constipated condition. The first care of the mother should be to see that the children are regular. At the first sign of a disposition to neglect this important function a mild laxative should be administered promptly. Cathartics and purgatives should never be given to children as they are harsh and violent in their action and tend to upset the entire system. The combination of simple laxative herbs with pepsin, sold in drug stores under the name of Dr. Caldwell's Syrup Pepsin, is now very generally used to correct stomach and bowel trouble and is especially adapted for children, being pleasant to the taste, mild and gentle in action and free from opiate or narcotic drugs of any description. A dose at bedtime brings relief next morning in an easy, natural manner, without griping or other discomfort.

Dr. Caldwell's Syrup Pepsin is sold in drug stores for fifty cents a bottle. It has been on the market for a quarter of a century and is today the standard household remedy in countless homes throughout the country. A free trial bottle can be obtained by writing to Dr. W. B. Caldwell, 453 Washington St., Monticello, Ill.
