Here's What You Can Do With Your Haynes "Light Six"

Drive 1 to 60 miles per hour on high. Get up speed of 30 miles per hour in 7 1/4 seconds from a standing start with full load. Climb on "High" hills that stall most cars. Average 8,000 miles to a set of tires. Average 1 to 22 miles per gallon of gasoline. Average 400 miles per quart of oil.

These figures are not the maximum record, achieved just once—but are based on performance reported by hundreds of Haynes owners.

They indicate exactly what you may expect of your Haynes. New refinements have been added for comfort and convenience in the new series Haynes—but the engine is the same wonderful power plant, with cylinders 3 1/2 x 5, that develop more power than any other motor of any make of equal bore and stroke.
