FIELD WORK TWO WEEKS ADVANCED

SEASON FAVORABLE FOR PREPARING SOIL AND PLANTING SMALL GRAIN CROPS.

LACK OF MOISTURE

Wheat, Oats and Pastures in Need of Rain—Plowing for Corn Well Advanced—Live Stock in Good Condition Except in Scattered Localities Where Roughage is Short.

Special to Times-Republican.

Des Moines, April 11.—The first crop bulletin of the season of 1918 is hopeful. At the close of March the season was about two weeks earlier than normal; farm work was well advanced; soil in fine condition; seeding of spring wheat and oats completed in the south and progressing rapidly in the north.

Children Cry for Fletcher's CASTORIA

The Kind You Have Always Bought has borne the signature of Chas. H. Fletcher, and has been made under his personal supervision for over 30 years.

What is CASTORIA? Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups.

spring wheat. In Adams and Jasper counties the water supply is falling.

A remarkably large acreage of spring wheat has been seeded. In many counties nearly every farm has a small piece of wheat seeded thru patriotic motives and regarded as experimental in those sections where it has not been hitherto raised.

Meadows and pastures generally wintered well, but are badly needing rain.

Dry soil has retarded or prevented germination of small grain in all but the southeast portion. Good rains occurred in nearly all sections Friday night and Saturday.

Northwest District. Dickinson (Lake Park)—Rain, 30; wind, prevailing southeast; wheat seeding finished—average very much larger than ever before.

Central District. Hardin (Adrian)—Oats practically all in large acreage; corn seeding will not be as large as the average; some rain, but moisture is deficient.

South Central District. Mitchell (Osage)—Wheat seeding practically finished; oats seeding progressing rapidly and many have finished.

germination; soil dry and getting hard; roads excellent; good rain Saturday.

Winnebago (Forest City)—Rain, 20; favorable for farm work; seeding of spring wheat about finished; acreage increased 25 per cent; soil in splendid condition; garden planting begun; no apparent damage to fruit by winterkilling; season two weeks earlier than last year.

Hancock (Britt)—Nick rain Saturday; wheat and oats all sown; nights cold but not enough to injure.

Floyd (Nora Springs)—Rain, 47; seeding began March 20; early wheat up; lots of onion seed sown; seeding of small grain more than half done.

North District. Dickinson (Lake Park)—Rain, 30; wind, prevailing southeast; wheat seeding finished—average very much larger than ever before.

Central District. Hardin (Adrian)—Oats practically all in large acreage; corn seeding will not be as large as the average; some rain, but moisture is deficient.

South Central District. Mitchell (Osage)—Wheat seeding practically finished; oats seeding progressing rapidly and many have finished.

MAKING WAR ON GERMAN NAMES

AMERICAN DEFENSE SOCIETY ASKING CHANGE IN TOWNS AND STREETS.

BERLINS, HAMBURGS AND BISMARCKS TOO NUMEROUS

Investigation Shows Two Villages Are Named Kaiser—German Settlers Carried Pleasant Associations Which No Longer Exist—Defense Society Argues For Changes.

Special to Times-Republican.

Des Moines, April 11.—Letters are being sent out by the American Defense Society of New York City to the governors of states and to mayors of cities requesting that those towns or cities which have German names be renamed.

This letter points out that there are no less than twenty-seven towns in the United States named Berlin and gives among the list of states which have a Berlin.

There are two villages, one in Missouri and one in Wisconsin, named "Kaiser."

The statement concludes with the following: "We name our children after those whom we love and admire."

There are two villages, one in Missouri and one in Wisconsin, named "Kaiser."

Special to Times-Republican. Eldora, April 11.—Mr. and Mrs. H. W. Emery left Wednesday for Miami, Fla.

Fla. for a visit with Mrs. Emery's son, Gilman H. Wisner, who is with the United States army.

Mr. and Mrs. J. H. Wintermute have returned to Eldora from their winter's sojourn in Florida.

Grinnell and Vicinity. Special to Times-Republican. Grinnell, April 11.—Senior chapel in college, which was postponed from last week Friday morning because of the non-arrival of caps and gowns, was held with all its usual joy and pride this morning.

Miss Clara Julia Anderson will have charge of the annual exhibition of the physical department in connection with the Grinnell College on Saturday evening at 8 o'clock, at the men's gymnasium.

Suits have been filed in this county by Mrs. Amanda Carpenter, of Kill-duff and her daughter, Miss Flora Carpenter, against the M. & St. L. railway, aggregating \$45,500, for alleged damages received in a wreck near Sully in May, 1917.

Mr. and Mrs. Clint Vandervoer have had the pleasure of a visit from Mrs. Edna Coats and her daughter Katharine, who have gone back to their home in Ottumwa after a week's stay here.

The tuberculosis survey of Grinnell and Potosi counties is to begin this week on the arrival here of Miss Routledge, the special nurse who has been assigned by the state authorities to this county.

Archibald Hastings, Asher Dunning and A. L. Child, Jr. have been called into superior court for alleged violation of the speed ordinance of this city and Judge Robinson assessed a fine of \$15 and costs upon each of the first two and \$10 and costs upon the third.

Poison Everest, former student in Grinnell College, has been commissioned as second lieutenant in the aviation corps.

Mrs. A. J. Holden is preparing to go in a few days to join her husband at Perry, Okla. where they expect to make a permanent home.

The government thru its food conservation department is making inquiries as to the prospects of being able to help out in the canning of other varieties of food.

Mrs. E. J. Plaster made a long visit to her daughter, Mrs. Absenthy, in Chicago and Mrs. Absenthy returned to the home here with her for a short visit.

Mr. and Mrs. John Lee started last evening for their new home in Burlington, Idaho, near which place their oldest son, Harvey, and their daughter, Mrs. Archie McLean, are living.

M. W. Swisher is at home here after some weeks spent in recuperating at Excelsior Springs, Mo., where he left W. T. Moyer, of this city, having the same pleasant experience.

Steamboat Rock Notes.

Special to Times-Republican. Steamboat Rock, April 11.—Mr. and Mrs. William Hartman received a dispatch from Camp Green, Charlotte, N. C., saying that their son Ordo, who is in the military service, was seriously ill with pneumonia.

Brief News of Eldora.

Special to Times-Republican. Eldora, April 11.—Mr. and Mrs. H. W. Emery left Wednesday for Miami, Fla.

and brought up in this town and only recently enlisted. Being not of age he had to get the consent of his parents.

At a meeting of the Red Cross, last night it was resolved that after conferring, they will have a sale and at the same time serve dinner and supper for the benefit of the Red Cross.

Henry Eilers lost a thumb and finger yesterday by coming in contact with a circular saw. This is very serious for Mr. Eilers, for the reason that when a boy a couple fingers and his hand were crippled by the explosion of a shot gun.

Five boys of the members of the German Baptist church are serving in the army and one in the navy. Four enlisted and two were drafted.

Eliert Eckhoff when putting up lightning rods on a barn east from here, had the misfortune to slip from the hay and fall a distance of about twenty feet, landing on a cement floor. He was hurt badly and for several hours was unconscious.

Kellar's Straight Talk. Asked by the Navy League of the United States to contribute 50 cents a month to a fund to be used in securing 250,000 skilled workmen to build ships, Chambers Kellar, of Lead, declined to make the contribution and came back with the following letter which we believe will be read with interest and approval thruout the state:

Permit me to say, as a patriotic American citizen, that I must respectfully decline to contribute one single cent to the undertaking.

On the other hand, I will contribute, \$50 in cash, or \$100 in cash, for the purpose of securing by proper lawful agitation the enactment of a law under the terms of which men may be conscripted and drafted to do this work and courtmartial and shot when they refuse to do it.

The spectacle of the recent infamous strike in eastern shipyards for \$10 per day wages has already in this locality impeded the sale of war savings stamps and no doubt to some extent will operate in a similar manner in the coming liberty bond drive.

I have just read again and carefully noted the patriotic sentiment expressed by the various members of congress whom you have quoted in the

Storm Lashes.

Miss Emma Reichter, who has heretofore managed her own farm without the assistance of a mere man, has been married to James Bullock, a farm laborer. The bride owns a fine quarter section of Buena Vista county land. She is a familiar figure, as she has been filling her own hauling of stock and doing the role of farmer in every particular.

Care of Breeding Stock.

By Mattie P. Webster, Poultry Expert. It is now that the enthusiastic poultry breeder's interest and hopes of great things for the season is centered upon the birds in the breeding pens.

The successful breeder knows the vital importance of quality and vigor in the parents of the coming season's young stock has used the utmost care in selecting the inmates of the respective breeding pens, and surely one is excusable for intense interest in these breeders and for the pleasure experienced in working among and for them.

As caretakers and managers of our birds, very much depends upon us. We must provide comfortable, pleasant quarters for the breeders and allow each pen as large a yard as possible, so they will not be too closely confined.

It is better to have a double yard for each pen, sowing one with rye or oats, while birds are kept out of the yard until the green sprouts are ready for the birds to enjoy, and how they do relish the tender green food. The other yard being sown in the same manner as the first one will be ready that crop was very low. He was born

inclosure accompanying the said letter. These statements are true and express the real situation. And being true, what are the obvious measures to be taken by these members of congress to put into effect what they all conceded to be the absolute essentials to success in this war? Must we beg for men to drive rivets in the same breath that we conscript the flower of our youth to fire bullets—yes to receive them, too? If there is any reason why the youth of this country should be compelled to serve in the trenches at \$33 per month, and while the shells of the black-hearted snickers permitted to desert their shipbuilding posts upon the government's refusal to pay them \$300 per month, I as a patriotic American citizen would like to know the reason. And I am not alone in entertaining this sentiment.

The time has come, it seems to me when the American congress should realize, and also the American president, that this war is not quite 3,000 miles away, for if the reports of today be true this distance has been lessened at least by the seventy-four miles covered by the shells of the black-hearted snickers.

Why does not the navy league undertake to secure the enactment of a law conscripting every man, woman and child in America? Let that law provide that the deserter from his post shall be courtmartialled and shot whether that post be in the trenches in France, in the cornfields of Nebraska, the exemption boards thruout the nation, the shipbuilding yards or the pro-German eater of prohibited food.

If you want \$50 or \$100 for such propaganda either write or wire me and I will send it. If traitors are to be hauled any longer with gloves it is about time to put a horse shoe in the glove. —Sioux Falls Argus-Leader.

Storm Lashes. Miss Emma Reichter, who has heretofore managed her own farm without the assistance of a mere man, has been married to James Bullock, a farm laborer. The bride owns a fine quarter section of Buena Vista county land. She is a familiar figure, as she has been filling her own hauling of stock and doing the role of farmer in every particular.

It is now that the enthusiastic poultry breeder's interest and hopes of great things for the season is centered upon the birds in the breeding pens. The successful breeder knows the vital importance of quality and vigor in the parents of the coming season's young stock has used the utmost care in selecting the inmates of the respective breeding pens, and surely one is excusable for intense interest in these breeders and for the pleasure experienced in working among and for them.

As caretakers and managers of our birds, very much depends upon us. We must provide comfortable, pleasant quarters for the breeders and allow each pen as large a yard as possible, so they will not be too closely confined. It is better to have a double yard for each pen, sowing one with rye or oats, while birds are kept out of the yard until the green sprouts are ready for the birds to enjoy, and how they do relish the tender green food. The other yard being sown in the same manner as the first one will be ready that crop was very low. He was born

picked every vestige of green on their range. "Too much work" does someone say? I will admit it is work to so provide green food for the birds, but it is not worth it to secure a large percent of eggs strong in fertility? I think it is. We expect our flocks to be prolific layers of hatchable eggs from which we shall obtain healthy vigorous chicks. We do not expect too much of them if we do our part to secure such results. It is "up to us" to select the right kind of feed rations. A varied diet of the different grains, meat and green food should include an abundance of fresh water, which composes 65 per cent of the egg. Feed regularly and see that quality and quantity are both sufficient.

Breeding birds that are unattended by lice and mites will be a disappointment as the few eggs laid are liable to be either infertile or if they do hatch, give us weak chicks. It means constant vigilance and considerable effort to keep the quarters absolutely clean. We had tried several times to repair our chickens, but the breeders containing a grit shell and charcoal should have a place in each pen.

Ruptured? Throw Away Your Truss!

For Many Years We Have Been Telling You That No Truss Will Ever Help You—We Have Told You the Harm That Trusses Are Doing. We Have Told You That the Only Truly Comfortable and Scientific Device for Holding Rupture is the Brooks Rupture Appliance—and That It Is SENT ON TRIAL TO PROVE IT

If you have tried most everything else, come to me. Where others fail is where I have my greatest success. Send attached coupon today and I will here Saturday and Monday my illustrated book on Rupture and its cure, showing my Appliance and giving you prices and names of many people who have used it with great success. It is instant relief when all others fail. Remember, I use no salves, no harness, no lies. I send on trial to prove what I say is true. You are the judge and once having seen my illustrated book and read it you will be as enthusiastic as my hundreds of patients whose letters you can also read. Fill out coupon below and mail today. It will worth your time whether you try my Appliance or not.

The above is C. E. Brooks, inventor of the Appliance, who cured himself and who is now giving others the benefit of his experience. If ruptured, write him today, at Marshall, Mich.

Pennsylvania Man Thankful

Mr. C. E. Brooks, Marshall, Mich. Dear Sir:—Perhaps it will interest you to know that I have been ruptured six years and have always had trouble with it till I got your Appliance. It is very easy to wear, fits neat and snug, and is not in the way at any time, day or night. In fact, at the times I did not know I had it on; it just adapted itself to the shape of the body, and it seemed to be a part of body as it clung to the spot, no matter what position I was in. It would be a veritable God-send to the unfortunate who suffer from rupture if all could procure the Brooks Rupture Appliance and wear it. They would think this quite remarkable as I am in my eighty-first year. I am an old veteran of the Civil War, born and raised in the town of New Boston, N. H., from where I enlisted in the 10th N. H. Vol. Inf. in Co. C. Holy Hill, Fla. E. A. RICHARDS.

Soundly Cured at Age of 81

Dear Sir:—Less than a year ago I sent to you for an appliance which came promptly. I at once put it on and it fitted perfectly. I have worn the appliance not quite ten and one-half months. It has cured my rupture. I tried the other day while the appliance was off, to see if I could force anything out of the opening to make a

Ten Reasons Why

- 1. It is absolutely the only Appliance of the kind on the market today, and in it are embodied the principles that inventors have sought after for years. 2. The Appliance for retaining the rupture can not be thrown out of position. Being an air cushion of soft rubber it clings closely to the body, yet never blisters or causes irritation. 3. Unlike the ordinary so-called pads, used in other trusses, it is not cumbersome or ungainly. 4. It is small, neat and pliable, and positively can not be detected thru the clothing. 5. There is nothing about it to get foul, and when it becomes soiled it can be washed without injuring it in the least. 6. There are no metal springs in the Appliance to torture one by cutting and bruising the flesh. All of the material of which the Appliance are made is of the very best that money can buy, making it a durable and safe Appliance to wear. 7. My reputation for honesty and fair dealing is so thoroughly established by a experience of over thirty years of dealing with the public, and my prices are so reasonable, my terms so fair, that there certainly should be no hesitancy in sending free coupon today. Remember I send my Appliance on trial to prove what I say is true. You are to be the judge. Fill out free coupon below and mail today.

Kenyon Speaks at Hampton

Hampton, April 11.—A crowd that packed the Windsor theater to the doors greeted Senator Kenyon here Tuesday afternoon to hear him in an address concerning the new liberty loan, and relating many of his experiences in the work of some of the men furnished by the Windsor orchestra, and added much to the patriotic features of the program.

Root and Herb Medicines.

Indian medicine men contend that the roots and herbs of some of the plants furnish a panacea for every ill which human flesh is heir. Be that as it may, it is interesting to note that the most successful remedy in the world for female ills, Lydia E. Pinkham's Vegetable Compound, was compounded more than forty years ago by Mrs. Lydia E. Pinkham, of Lynn, Mass., from the roots and herbs of the field, and today it is recognized from shore to shore as the standard remedy for female ills. —Adv.

George.

E. T. Gilman, for the past several years superintendent of Lyon county public schools, has been re-elected for another term. He was unopposed and received a unanimous vote.
