At the head of this column may be found the names of those who have been selected as the democratic nominees for the offices to be filled at the election to be held on Nov. 7th. That the majority of them are invincible was virtually conceded by the republicans when they failed to give them opposition; that all of them are competent, worthy and invincible is our sincere belief, and it should be the endeavor of every man in the county who has his own and the public welfare at heart to have them elected.

Without undertaking to elaborate the views of the doctrinaire, it may be said that history has demonstrated that political parties are essential to the existence of a republic, and that organization and subordination are essential to the existence of a party; that its policies must be determined and its candidates selected in preliminary contests. We have had two main parties from the beginning and will, in all likelihood, have them to the end. Every one who desires to have any voice in political affairs must align himself with one or the other. Those who favor the greatest good to the greatest number should be members of the democratic party, and those who favor the wrongs of the classes as against the right of the masses should be republicans.

The democratic nominees for this election have been fairly selected by a primary in which all democrats had the right to participate, and it is now their duty to loyally submit to the will of the majority by supporting the nominees.

The places to be filled at this election are usually termed the minor offices, but they are of major importance to the people. The office of magistrate, in so far as its judicial functions are concerned, is of but little moment, yet the body of magistrates, with the county judge as presiding officer, compose the fiscal court, which as to the county, is the most important branch of government. Among other things, it has charge of the roads, a vexatious and expensive problem; it has the care of the paupers, it fixes the tax rate and disposes of the funds thus collected; in short it makes and foots the county's bills.

The republicans, remembering the fate of the bull that contested the right of way with the locomotive, have removed all obstructions from the path of the Honorable R. C. Warren, yet they are doing their utmost to tie his hands by electing a set of magistrates who will oppose his policy. That Mr. Warren is a lawyer of ability and experience, is capable of successfully coping with the many hard problems which will confront the county, no one questions, yet it is evident that he would be powerless with a set of magistrates able and anxious to thwart his plans.

It will devolve upon the next General Assembly to elect a United States Senator. It has leaked out that the republicans, with their usual gum shoe methods, are making every effort to capture that body. The powers that be in Washington are not satisfied with the past achievements of the State bosses in charge of the frappe bowl and have notified them that they must either accomplish something or stand aside and let others do the serving. A United States Senator from Kentucky would be a great feather in their caps, but certainly no democrat of Lincoln county wants to see his beloved State furnish one of that brand. The memory of Deboe should be sufficient to deter every one from such a desire. The rights of many people at this time are in serious need of National legislation and investigation. The falling out of two thieves connected with a prominent life insurance company has led to astounding disclosures. It has so far developed that the officers of three of the best known companies have been wasting and stealing the hard-earned money of their policy holders with an unheard of prodigality. These funds are mainly composed of the mites of poor men who have denied themselves that their families might not suffer when they are

taken, and they surely deserve protection, but they can hope for but little, if any, from a republican House and Senate, when they remember that the officers of these insurance companies have contributed hundreds of thousands of dollars to the republican campaign funds and out of the means of their policy holders. It is no secret that most of the presidential elections of recent years have been bought by the republicans with money contributed by corporations, mainly insurance companies, and they will never harm the geese that have laid the golden eggs.

It behooves the democrats therefore, for these reasons and many others, to stand together and give a long, strong and unanimous pull in behalf of their ticket. If this be done, and we are sure that it will, our nominees will be elected by an overwhelming majority.

THE Glasgow Times, whose editor, Congressman James M. Richardson, is one of the best posted politicians in the State, sounds the note of warning that there is danger of the next Kentucky Legislature being republican on joint ballot. In every close or doubtful district the republicans are putting out candidates and are waging the same contest that Dr. Hunter carried on in 1895, when a sufficient number of republicans were elected to defeat Senator Blackburn and elect W. J. Deboe. The republicans can not control the next Senate, but they can by a majority in the House over-balance the democratic majority in the Senate. Editor Richardson states that at present left over from the last national contest there is a campaign fund of something like \$3,000,000 at the disposal of the republicans. To what better purpose can this be put than to destroy the democratic party in Kentucky by the election of a republican Senator? What will be the result if \$250,000 are dumped into this State in the coming November election? It is worse than folly, he thinks to laugh this danger down. Gum shoe methods have won before and it can be done again. While we think Brer Richardson takes a too pessimistic view of things, he may be right. Any way take no chances, but elect every democratic Senator and Representative possible. Certainly Deboe was enough of republican Senators for an age, if not forever.

PRINCE PHILIP has sued for divorce because his wife, Princess Louise, of Saxe-Colnag and Gotha, runs him into needless expense. In her wardrobe were found 75 pairs of silk shoes, 120 pairs of other shoes, 60 parasols and about 100 hats. The grounds are not well taken. A husband is good for nothing else but to pay his wife's bills—it seems.

THE per capita of money in circulation is now \$31.08. Feel in your pockets and if you haven't that much you should get a hustle on yourself and find the reason.

President Roosevelt's statement that the South must and can solve existing difficulties is believed to settle definitely that he will not give his approval to any measure designed to reduce Southern representation in Congress.

Secretary Taft in his speech at Akron, O., said that Bryan would be the next standard bearer of the democratic party. We trust the fat and jovial secretary is right. Bryan is the greatest man in the country, not even excepting Roosevelt.—Frankfort Journal.

### THE LIVER QUARANTINE

Hurried eating has ruined many a man's stomach. The digestion-destroying process is gradual, often unnoticed at first. But it is only a short time until the liver balks, the digestive organs give way, and almost countless ills assail the man who endeavors to economize time at the expense of his health.

A torpid liver causes a quarantine of the entire system. It locks in the diseased germs and body poisons and affords them full play, inviting some serious illness.

In families where August Flower is used, a sluggish liver and constipation are unknown, so are all stomach ailments, as well as indigestion, dyspepsia, heartburn, headaches and kidney and bladder affections. No well-regulated family should be without this standard remedy.
